PROCLAMATION.

E. L. NEWCOMBE,
Sous-ministre de la Justice,
Canada.

CONSIDÉRANT que vu l'état de délabrement des travaux appelés écluses du canal de la Culbute, et considérant que pour les mettre en état permanent d'utilité il aurait fallu encourir de grands frais, tandis que d'un autre côté le trafic était insignifiant, les communications par chemins de fer ayant grandement amoindri l'utilité anticipée des travaux, il a été décidé en l'année 1889 d'abandonner l'idée de maintenir les eaux de la rivière à une hauteur artificielle, et un arrêté en conseil a été passé le vingt-quatrième jour d'octobre de la dite année à l'effet de laisser la rivière reprendre son niveau naturel.

Et considérant qu'il a été jugé à propos qu'un avis soit donné au public de l'abandon des dits travaux et barrages, savoir, les *écluses et barrages de la Culbute*, étant deux écluses combinées construites et situées sur le chenal nord de la rivière à L'Islet, sur le côté nord de l'île aux Allumettes, avec le barrage submergé entre L'Islet et la rive nord de l'île aux Allumettes, les dits travaux étant situés dans le township de Chichester, rang II ;

Le *pont de Chapeau* consistant en un pont de grand chemin construit sur le chenal de la Culbute aux rapides de Chapeau, entre le village Chapeau, île des Allumettes, et le dit township de Chichester ;

Les *travaux entre les chutes du Calumet et le Canal de la Culbute*, consistant de deux barrages submergés, un au chenal du Grand Calumet et l'autre au rapide Plat sur le chenal du Rocher Fendu, entre la rive sud de l'île du Calumet et une petite île dans le chenal sud de la rivière Ottawa.

Et autres travaux s'y rattachant.

Sachez donc que par et avec l'avis de notre Conseil privé pour le Canada, par Notre présente proclamation, Nous proclamons et déclarons que le dit canal de la Culbute et les écluses, barrages et autres travaux s'y rattachant, ont été et ils sont par le présent abandonnés comme travaux publics du Canada.

De ce qui précède Nos féaux sujets et tous ceux que les présentes peuvent concerner, sont par les présentes requis d'en prendre avis et d'agir en conséquence.

EN FOI DE QUOI, Nous avons fait émettre nos présentes Lettres Patentes, et à icelles fait apposer le Grand Sceau du Canada. TÉMOIN, Notre Très fidèle et Bien-aimé Cousin et Conseiller le Très honorable Sir GILBERT JOHN ELLIOT, Comte de Minto et Vicomte Melgund de Melgund, comté de Forfar, dans la pairie du Royaume-Uni, Baron Minto de Minto, comté de Roxburgh, dans la pairie de la Grande-Bretagne, Baronnet de la Nouvelle-Ecosse, Chevalier Grand-croix de Notre Ordre Très distingué de Saint-Michel et Saint-George, etc., etc., Gouverneur Général du Canada.

A Notre Hôtel du Gouvernement, en Notre cité d'OTTAWA, ce DOUZIÈME jour de MARS, dans l'année de Notre-Seigneur mil neuf cent quatre, et de Notre Règne la quatrième.

AVIS AUX CONSTRUCTEURS DE NAVIRES ET AUTRES.

Relativement à la présente guerre entre la Russie et le Japon, l'attention des constructeurs de navires et autres est attirée aux dispositions de l'*Acte concernant l'enrôlement à l'étranger*, 1870 (33 et 34 Vic. chap. 90) articles 8, 9 et 23 qui indiquent leurs devoirs et responsabilités en matière de construction et d'équipement de navires qui sont destinés ou qui peuvent être employés au service militaire ou maritime des belligérants.

L'article 8 décrète que toute personne dans les limites des possessions de Sa Majesté, et sans le permis royal, qui construit, met en commission, équipe ou expédie un navire avec intention ou connaissance, ou ayant cause raisonnable de croire que le dit navire doit être employé dans le service militaire ou maritime des belligérants, sera passible d'amende et d'emprisonnement et de la confiscation du navire et de son équipement.

Toute personne qui construit ou équipe un tel navire, en conformité d'un contrat passé avant le commencement de la guerre, ne sera pas passible de ces peines—

(i) Si du moment qu'une proclamation de neutralité est émise par Sa Majesté, elle donne avis au Secrétaire d'Etat qu'elle construit, fait construire ou équipe le dit navire dans les conditions mentionnées, et fournit tels détails du contrat, et de toutes choses s'y rattachant, faites ou à faire en vertu du dit contrat, que le Secrétaire d'Etat pourra exiger ;

(ii) Si elle donne telles cautions et prend ou laisse prendre telles autres mesures, s'il y a lieu, que le Secrétaire d'Etat jugera nécessaires pour garantir que le dit navire ne sera pas expédié, livré ou déplacé sans permis de Sa Majesté avant la fin de la guerre susdite.

Chaque fois que des propositions sont faites pour l'achat ou l'équipement de ces navires par des personnes qui ne divulguent pas la destination finale de ces navires, il sera du devoir de toutes personnes ayant connaissance de la chose d'en donner avis au Secrétaire de l'Intérieur afin qu'il puisse prendre les mesures qu'il est autorisé de prendre par le 23e article du dit acte, pour empêcher que ces vaisseaux soient employés en contravention au dit acte.

Il a plu à Sa Majesté l'Empereur de confirmer, le 27 de mars de l'annee courante, les "*Règlements concernant les prises maritimes.*"

Je communique aux autorités navales, pour leur gouverne, ces règlements, ainsi que le décret du Sénat dirigeant, daté le 18 de mai, No. 5406.

Au bureau du ministère de la Marine.

(No. 5406.)

Décret de Sa Majesté Impériale l'Autocrate de toutes les Russies, du Sénat dirigeant au Directeur du ministère de la Marine.

Par ordre de Sa Majesté Impériale, nous, le Sénat dirigeant, avons entendu le rapport du Directeur du ministère de la Marine, daté le 2 de mai 1895, No. 292, auquel il joint copie des règlements concernant les prises maritimes confirmés par Sa Majesté Impériale le 27 de mars 1895. Nous ordonnons que la copie sus-mentionnée soit imprimée de la manière ordinaire. Avis à cet effet doit être donné au bureau du Département des Impressions du Sénat, et le Directeur du ministère de la Marine doit être informé du décret. 18 mai 1895.

(Sur l'original des règlements suivants, les mots "Procédez en conséquence" sont écrits de la main de Sa Majesté Impériale. Tsarskoyé Selo, 27 mars 1895.)

RÈGLEMENTS CONCERNANT LES PRISES MARITIMES.

Règlements généraux.

1. Les dispositions des présents règlements sont applicables dans tous cas pour lesquels, en matières relatives aux prises maritimes, des règles spéciales sont

posées par des conventions entre la Russie et d'autres nations.

Observation.—Des règles spéciales sont en force au sujet de la saisie de la propriété d'un ennemi à terre ou à flot.

2. En conformité exacte de la déclaration de Paris du 4 (16) avril, 1856, les règles suivantes doivent être observées en appliquant les présents règlements :—

(1.) Les lettres de marque ne seront pas délivrées à des particuliers ;

(2.) Le pavillon neutre couvre la marchandise de l'ennemi, à l'exception de la contrebande de guerre.

(3.) La marchandise neutre, à l'exception de la contrebande de guerre, n'est pas saisissable sous pavillon ennemi ; et

(4.) Les blocus, pour être obligatoires, doivent être effectifs, c'est-à-dire, maintenus par une force suffisante pour interdire réellement l'accès du littoral de l'ennemi.

3. Pour la capture d'une prise on doit se servir de la force ouverte ou de ruses de guerre permissibles, mais on ne doit jamais avoir recours aux violations de la bonne foi.

4. Dans l'application des dispositions des présents règlements qui limitent le droit d'arrêter, visiter, saisir et confisquer les vaisseaux d'une puissance hostile ou neutre ou de ses sujets, le gouvernement impérial en fait une condition de réciprocité, et se réserve le droit de s'écarter des susdites règles vis-à-vis d'une puissance hostile ou neutre qui n'est pas supposée observer ces règles, et d'agir selon les circonstances spéciales de chaque cas en particulier.

5. Seront considérés des prises, (1) les vaisseaux et cargaisons de l'ennemi ou d'une nation neutre qui ont été saisis ; et (2) les vaisseaux ou cargaisons russes ou neutres, et les vaisseaux ou cargaisons d'une nation alliée, qui ont été repris de l'ennemi après avoir été capturés par lui, si leur saisie ou reprise a été effectuée dans les circonstances spécifiées dans les présents règlements.

ARTICLE I.—ARRÊT, VISITE ET SAISIE DE VAISSEAUX ET DE CARGAISONS, ET LEUR CONFISCATION COMME PRISES.

Chapitre I.—*Quels vaisseaux et cargaisons sont sujets à être arrêtés, visités, saisis et confisqués.*

6. En temps de guerre en mer, les vaisseaux marchands (tous les vaisseaux ne formant pas partie d'une flotte sont considérés marchands) peuvent être assujétis à être arrêtés et visités dans le but de constater quelle est leur nationalité, et savoir s'ils observent la neutralité. Les vaisseaux marchands convoyés par des navires de guerre d'une puissance alliée ou neutre ne seront pas soumis à la visite si le commandant du convoi donne l'assurance quant au nombre de vaisseaux convoyés, leur nationalité et la destination de leurs cargaisons et aussi qu'il n'y a pas de contrebande de guerre à bord. L'arrêt et la visite de ces vaisseaux ne sont permissibles que dans les circonstances suivantes :—

(1.) Si le commandant refuse de donner l'assurance indiquée plus haut ;

(2.) S'il déclare que quelques-uns des vaisseaux ne naviguent pas sous son escorte ; et

(3.) S'il est évident qu'un vaisseau escorté se prépare à faire quelque chose qui constitue une violation de neutralité.

7. La nationalité d'un vaisseau doit être établie en conformité des lois du pays sous le pavillon duquel il navigue, ou à la flotte à laquelle il prétend appartenir. Les vaisseaux marchands achetés d'une puissance hostile ou de ses sujets par des personnes d'une nationalité neutre doivent être considérés comme des vaisseaux de l'ennemi, à moins qu'il ne soit prouvé que leur achat doit être regardé, d'après les lois de la nation à laquelle les acheteurs appartiennent, comme ayant été définitivement conclu avant que les acheteurs aient reçu information de la déclaration de guerre, ou que les vaisseaux furent achetés en la manière indiquée après que les acheteurs eurent reçu cette information, mais que l'achat fut fait de parfaite bonne foi, et non dans le but de protéger la propriété de l'ennemi.

8. La neutralité est censée être violée dans les circonstances décrites dans les articles 11 et 12.

9. Les vaisseaux et cargaisons qui, conformément aux dispositions des présents règlements, paraissent être passibles de la confiscation comme prises, doivent être saisis.

10. Les navires de guerre et les vaisseaux marchands de l'ennemi sont passibles de la confiscation comme prises, ainsi que tous les articles à bord, sauf—

(1.) Les articles destinés à l'usage particulier de l'équipage ou des passagers ; et

(2) Les articles qui appartiennent au gouvernement d'une puissance neutre ou à ses sujets, et ne constituent pas contrebande de guerre. Néanmoins, le gouvernement impérial se réserve le droit de permettre, sur la base de la réciprocité, d'exempter de la confiscation tous ou une classe particulière de vaisseaux et cargaisons hostiles, à l'exception, toutefois, des cas où ces vaisseaux ou cargaisons sont passibles de confiscation pour les raisons indiquées aux articles 11 et 12 concernant les vaisseaux neutres.

Observation.—Toute propriété trouvée dans un navire ennemi doit être considérée comme propriété de l'ennemi jusqu'à preuve du contraire.

11. Les vaisseaux marchands d'une nationalité neutre sont passibles de confiscation comme prises dans les cas suivants :—

(1.) Lorsque ces vaisseaux sont trouvés en voie de transporter à l'ennemi ou à un port de l'ennemi—

(*a.*) Des articles et munitions requis pour tirer avec des armes à feu, ou des objets ou substances employés pour causer des explosions, quel que soit le montant de ces choses ;

(*b.*) D'autres articles de contrebande de guerre se montant en volume ou en poids à plus que la moitié de la cargaison entière ;

(*c.*) Les forces militaires de l'ennemi ;—pourvu que dans tous ces cas il ne soit pas prouvé que les capitaines des vaisseaux concernés ignoraient la déclaration de guerre ;

(2.) Lorsque ces vaisseaux sont trouvés en voie de forcer un blocus, et qu'il ne soit pas prouvé que les capitaines ignoraient l'établissement du blocus ;

(3.) Lorsque ces vaisseaux résistent par la force des armes, l'arrêt, la visite, ou la saisie ; et

(4.) Lorsqu'ils ont pris part aux opérations hostiles de l'ennemi.

12. La cargaison de vaisseaux marchands d'une nationalité neutre est passible de confiscation comme prise.—

(1) Lorsque cette cargaison est contrebande de guerre en voie de transport à l'ennemi ou à un port de l'ennemi, et qu'il n'est pas prouvé que le capitaine du vaisseau ignorait la déclaration de guerre ;

(2.) Lorsque la cargaison est à bord d'un vaisseau passible de confiscation sous les titres 2-4 de l'article 11, et qu'il n'est pas prouvé que cette cargaison appartienne aux Russes, ou à des neutres qui n'ont pris aucune part aux infractions entraînant confiscation.

13. Les articles réputés contrebande de guerre sont énumérés dans une déclaration distincte pour le renseignement du public. Ceux de ces articles qui constituent réellement l'armement et les provisions d'un vaisseau d'une nationalité neutre sont exemptés de la confiscation.

14. Dans les cas où la contrebande de guerre est seule passible de confiscation, et non le vaisseau qui la porte (article 11, titre 1, article 12, titre 1), le vaisseau même doit être détenu jusqu'à ce que la contrabande de guerre soit délivrée. La livraison doit avoir lieu, au choix du commandant faisant la saisie, soit à l'endroit même où la saisie a lieu, ou après que le navire capturé aura été conduit dans un port.

Chapitre 2.—*Conditions et conséquences de l'arrêt, visite et saisie des vaisseaux et cargaisons.*

15. Le droit d'arrêter, visiter et saisir des vaisseaux et cargaisons hostiles ou suspects appartient aux navires de la marine impériale. Les vaisseaux de la marine marchande sont autorisés à le faire seulement—

(1.) Lorsqu'ils sont attaqués par des vaisseaux hostiles ou suspects ; et

(2.) Lorsqu'ils viennent au secours de navires russes ou alliés exposés à l'attaque.

Les vaisseaux et cargaisons saisis pour ces raisons par des vaisseaux marchands doivent être remis par eux à la garde de l'autorité spécifiée aux articles 23 et 24, et ils auront le droit de réclamer, advenant la confiscation des vaisseaux et cargaisons comme prises, la récompense fixée pour leur saisie.

Observation.—Les limitations fixées dans le présent article pour les vaisseaux marchands ne doivent pas s'étendre aux cas pour lesquels des règles spéciales peuvent être posées en vertu de l'article 4 des présents règlements.

16. L'arrêt, la visite et la saisie de vaisseaux hostiles ou suspects est permis dans toutes les parties de la mer et autres eaux, à l'exception des eaux qui sont sous la domination d'une puissance neutre, ou dont les opérations de guerre sont exclues par conventions internationales spéciales.

17. A la déclaration de la guerre, les opérations militaires en mer commenceront au temps indiqué par le gouvernement impérial. Dans le cas d'une trêve, ces opérations seront restreintes conformément aux conditions de la trêve, et une fois la paix conclue elles cesseront, au moment où les navires de la flotte reçoit avis de la conclusion d'une trêve ou de la paix.

18. Lorsqu'un commandant saisit un vaisseau marchand ou sa cargaison, il est de son devoir de rédiger un rapport sur les raisons et les circonstances de la saisie, et aussi prendre les mesures nécessaires pour la conservation du vaisseau ou cargaison capturé. De plus, lorsque le vaisseau même est saisi—

(1.) Le commandant détiendra temporairement, ainsi que le vaisseau, indépendamment de la question s'ils doivent être considérés comme prisonniers de guerre ou non, le capitaine, le subrécargue, et les autres membres de l'équipage dont le témoignage pourrait, de l'avis du commandant faisant la saisie, être nécessaire pour jeter de la lumière sur le cas à l'enquête qui doit être instituée conformément à la procédure dans les questions de prises ; et

(2.) Une liste sera faite des papiers trouvés dans le vaisseau, et ils seront scellés.

19. Le capitaine d'un vaisseau marchand qui a été saisi, et aussi les propriétaires du vaisseau ou de sa cargaison, et les agents des propriétaires, s'ils se trouvent là, ont le droit d'être présents aux procédures spécifiées dans la première partie de l'article 18 et sous le titre 2 du même article, pour faire leurs observations et suggestions à leur égard, et apposer leurs sceaux sur tous objets et cales sur lesquels des sceaux sont apposés.

20. A la saisie d'un navire de guerre, le commandant du navire faisant la capture procèdera conformément à l'article 351 des Règlements de marine (édition de 1899).

21. Dans les cas exceptionnels, lorsque la préservation d'un vaisseau capturé paraît impossible à cause de son mauvais état ou complète inutilité, le danger de sa reprise par l'ennemi, ou la grande distance ou le blocus des ports, ou encore à cause du danger menaçant le navire qui a fait la capture ou le succès de ses opérations, il est permissible pour le commandant, sur sa propre responsabilité, de brûler ou couler le vaisseau capturé, après avoir enlevé toutes les personnes à bord, et autant que possible de la cargaison, et vu à la sûreté des papiers du vaisseau et de tous autres objets qui peuvent être nécessaires pour jeter de la lumière sur le cas à l'enquête qui doit être instituée conformément à la procédure suivie dans les questions de prises. Le commandant rédigera un rapport, en conformité de l'article 353 des Règlements de marine (édition de 1899), sur les circonstances qui l'ont forcé de détruire le vaisseau capturé.

22. Les vaisseaux capturés et leurs cargaisons seront conduits par le navire qui fera la capture à des ports russes, ou, s'il n'y en a pas dans ces parages, à des ports d'une puissance alliée ou à la flotte d'opération russe. Dans le cas de tempête, ou autre nécessité extrême, le navire qui a fait la capture pourra se réfugier, avec le vaisseau capturé, dans le port d'une puissance neutre. En ce qui regarde la durée et les conditions de son séjour dans tel port, le commandant du navire qui a fait la capture devra obéir aux règlements établis par le gouvernement de l'endroit.

23 Quand le vaisseau capturé ou sa cargaison a été conduit à un port russe ou à la flotte d'opération, il sera remis à l'autorité navale avec les papiers du bord (article 18 et 21). L'autorité navale, après avoir pris connaissance des papiers qui ont été scellés, prendra des mesures pour la prise de possession, l'inventaire et la préservation de la propriété qui lui a été remise, et aussi, au cas d'absolue nécessité, pour la vente à l'enchère publique de tous articles parmi ceux qui lui auront été remis que leur nature ou leur condition ne permet pas de conserver. Le commandant du navire qui a fait la capture ou son représentant, ainsi que les personnes spécifiées à l'article 19, ont droit d'être présents à ces procédures, et de faire leurs observations et leurs suggestions en ce qui les concerne.

24. En l'absence de l'autorité navale, les droits et les devoirs de telle autorité, spécifiés à l'article 23, seront assumés (1) dans des ports russes, par l'autorité locale du port, des douanes ou de la police ; et (2) dans des ports d'une nation alliée, après convention entre le Directeur du ministère de la Marine et le ministre des Affaires étrangères avec les autorités étrangères compétentes, par l'agence navale russe locale ou le consulat russe ou autre autorité.

25. L'autorité compétente (articles 23 et 24) notifiera immédiatement le tribunal des prises le plus rapproché de l'arrivée au port du vaisseau ou de la cargaison, et, après avoir pris les mesures spécifiées à l'article 23, mettra à la disposition du tribunal le capitaine, les passagers et les autres membres de l'équipage du vaisseau capturé qui ont été détenus pour témoigner dans l'espèce, ainsi que tous les papiers qui s'y rapportent.

26. Des règles détaillées de procédure dans l'arrêt, la visite et la saisie, ainsi que pour l'enlèvement et la remise des vaisseaux capturés et des cargaisons sont établis dans des instructions approuvées par le Conseil de l'Amirauté.

Chapitre 3.—*Conditions et conséquences de la confiscation des vaisseaux capturés et de leurs cargaisons.*

27. La confiscation de vaisseaux capturés et de leurs cargaisons devra être accomplie en conformité des ordres de l'autorité navale compétente. La confiscation d'autres vaisseaux et de leurs cargaisons qui ont été saisis ne peut s'exécuter qu'en conformité de la décision du tribunal des prises.

28. La propriété capturée n'est sujette à confiscation que si elle appartient à cette catégorie d'articles qui peuvent être confisqués comme prises (articles 10 et 12), et si sa saisie remplit les conditions prescrites (articles 2, 3, et 15-17). Au cas contraire la propriété doit être libérée et rendue à son propriétaire primitif.

29. Si la propriété qui devrait être rendue au propriétaire original a été rendue ou libérée sur paiement d'un dépôt, la somme totale produite par la vente ou payée en dépôt doit être remise au propriétaire. S'il appert que la propriété qui devrait être remise a été détruite par ordre du commandant de marine, ou a péri par la faute ou la négligence des fonctionnaires dont le devoir était de la préserver, l'équivalent de la valeur de la propriété qui a été détruite ou qui a péri doit être payé au propriétaire, l'estimation devant être basée sur tels renseignements qui sont donnés.

30. Outre la restitution de la propriété qui devrait être renvoyée, ou le paiement de l'équivalent de sa valeur (articles 28 et 29), il pourra être accordé une indemnité spéciale au propriétaire primitif pour des pertes causées par la saisie de la propriété, quand il est reconnu que la propriété a été saisie sans raison suffisante, ou que la saisie était une transgression des conventions (articles 16 et 17). Si la propriété est renvoyée dans une condition endommagée, une indemnité peut être accordée au propriétaire pour ses pertes, s'il est prouvé que le dommage a été causé par la faute ou la négligence des fonctionnaires dont le devoir était de préserver la propriété.

31. La propriété saisie dans des eaux qui sont sous la domination d'une puissance neutre, ou dont les opérations de guerre sont exclues en vertu de conventions internationales spéciales, ne doit pas être rendue à son propriétaire primitif, et il ne sera pas indemnisé des pertes causées par le dommage fait à la propriété ou par sa détention, à moins que demande n'en soit faite par la puissance neutre concernée, ou par une puissance qui a signé les conventions susdites, et à moins que telle demande ne soit faite dans un délai d'un an du jour où la propriété a été saisie. Si aucune demande n'est faite dans le temps spécifié, la propriété capturée

sera confisquée au profit de l'Etat, et aucune part de prise ne sera payée au capteur.

32. Les sommes devant être payées en vertu des articles 29-31 comme l'équivalent de la valeur de la propriété détruite ou des pertes subies par la saisie de propriété ou le dommage causé, seront tirées des fonds du gouvernement, et le remboursement de cette dépense doit être réclamé, de la manière prescrite par la loi, dans les cas où telle réclamation peut légitimement être faite, des personnes par l'agence desquelles cette dépense a été encourue.

33. Les objets confisqués comme prise deviennent la propriété de la nation. Ces objets doivent être estimés, et tous ceux d'entre eux que les autorités navales ne jugent pas à propos de garder seront vendus à l'enchère publique. Dans les deux cas des parts de prises seront payées pour la capture de la propriété en question.

Observation.—L'estimation et la vente des prises sont exécutées en conformité de règles établies par le directeur du ministère de la Marine de concert avec le ministre des Finances.

34. En ce qui concerne les vaisseaux russes et étrangers et leurs cargaisons repris de l'ennemi, et l'enlèvement et livraison de ces vaisseaux et cargaisons, les règles générales concernant la saisie, l'enlèvement et livraison de vaisseaux hostiles et suspects seront observées, ainsi que les règlements spéciaux suivants :

(1.) La propriété reprise de l'ennemi, bien qu'elle puisse déjà avoir été confisquée comme prise par l'ennemi, doit être rendue, sur une décision du tribunal des prises, au propriétaire primitif, avec l'obligation de payer les parts de prises pour la reprise et les dépenses encourues en rapport avec la reprise; et s'il est trouvé quelque propriété de l'ennemi à bord du vaisseau repris, cette propriété sera considérée comme prise et sera confisquée en vertu des règles générales ;

(2.) Les vaisseaux du gouvernement russe et leurs cargaisons repris de l'ennemi seront remis au gouvernement sans l'intervention d'un tribunal, sur l'ordre de l'autorité navale compétente ; et

(3.) La propriété d'un étranger reprise de l'ennemi sera rendue à l'étranger, et il ne lui sera fait aucune réclamation pour parts de prises ou pour les dépenses de la reprise, s'il est prouvé que la propriété ne pouvait légitimement être considérée comme prise par l'ennemi, mais aurait dû être libérée ; dans ce cas aucune part de prise ne sera payée pour la reprise.

SECTION II.—PARTS DE PRISES.

Chapitre I.—*Droit aux parts de prises.*

35. Les parts de prises sont payées à ces parties de la flotte (escadre, division ou navire) par lesquelles la capture ou la reprise d'une prise a été effectuée, ou qui, lors de la capture ou de la reprise, participaient aux opérations de guerre en compagnie de ces parties, ou qui ont contribué à leur succès par leur présence.

36. Les chefs d'escadres et de divisions reçoivent une part des parts de prise accordées aux parties de la flotte qui sont sous leur commandement. Toutes les autres personnes servant dans la marine, y compris les volontaires, n'ont droit à une part des parts de prises qui peuvent être accordées à des parties de la flotte, que si ces personnes, lors de la capture ou de la reprise de la prise, accompagnaient la partie de la flotte concernée, ou si, bien qu'appartenant à cette partie de la flotte, elles étaient absentes par suite de blessures ou mutilations reçues dans la guerre en question, ou parce qu'elles avaient été envoyées ailleurs pour des raisons en rapport avec les opérations en cours.

37. Les troupes de terre à bord des navires de guerre n'ont droit à une part de parts de prises que lors qu'elles ont directement participé à la capture ou à la reprise d'une prise, ou ont agi de concert avec les forces navales dans les opérations lors de la capture ou de la reprise.

38. Outre les personnes spécifiées aux articles 35-37, il est dû une part des parts des prises aux personnes qui ont exposé la prise en donnant avis et information aux autorités navales, quoique ces personnes n'aient aucunement participé à la capture ou à la reprise de la prise.

39. Des parts de prises seront payées aux personnes spécifiées aux articles 35-37 selon le rang, la désignation ou les devoirs assignés à chacune lors de la capture ou de la reprise d'une prise.

40. Une personne donnant des informations concernant une prise (article 38) recevra 4 pour cent de la somme fixée, les déductions régulières ayant été faites (article 46), comme part de prise.

41. Les parts dues à des personnes qui sont mortes après les opérations pour lesquelles des parts de prises ont été accordées, et les parts dues à des personnes tuées avant la conclusion des opérations de l'engagement où eurent lieu ces opérations, seront divisées entre leurs veuves et descendants directs en conformité des lois générales de succession ; si les défunts n'ont laissé aucun descendant direct, mais seulement des veuves, le total des parts de prises sera payé à celles-ci ; s'il n'existe ni descendants directs ni veuves, les parts seront remises au Fonds des invalides ; et dans les cas régis par les dispositions de l'article 19 des règlements concernant le Fonds des pensions navales les parts seront payées à ces fonds.

Chapitre 2.—*Montant des parts de prises et sa distribution.*

42. Pour la capture, par des navires de la marine impériale, de propriété dans la suite confisquée comme prise, les parts de prises sont payées comme suit, après que les déductions régulières ont été faites (article 46) : (1) pour des navires de guerre de l'ennemi, leurs équipages et cargaisons, s'ils ont été capturés dans un engagement, les trois quarts de la valeur de la prise ; s'ils ont été capturés sans combat, la moitié de la prise ; (2) pour des vaisseaux marchands et leurs cargaisons, s'ils ont été capturés dans un combat, la pleine valeur de la prise ; s'ils ont été capturés sans combat, les trois quarts de la valeur ; et (3) pour la propriété de l'ennemi trouvée dans des vaisseaux russes ou étrangers repris de l'ennemi, la pleine valeur de la prise.

43. Pour la capture de vaisseaux de l'ennemi et de leurs cargaisons, il est payé des parts de prises égales à la pleine valeur de la prise.

44. Pour la capture de propriété (1) détruite par ordre d'un commandant de marine et, après les procédures régulières, jugée passible de confiscation ; (2) libérée conformément à la décision d'un tribunal des prises, par la suite infirmée ; ou (3) renvoyée par l'autorité compétente en conformité des conditions d'un armistice ou de la paix, les parts de prises seront fixées dans chaque cas d'après les circonstances par le Conseil de l'Amirauté, mais elles ne devront pas excéder les limites spécifiées aux articles 42 et 43.

45. Pour la reprise de vaisseaux russes ou étrangers et de leurs cargaisons saisis par l'ennemi, une somme équivalente à un huitième de la valeur de la propriété reprise est payable comme parts de prises ; mais si la reprise a été effectuée dans des circonstances exceptionnellement difficiles et dangereuses, il pourra être payé une somme n'excédant pas un quart de la valeur.

46. La valeur de la propriété capturée ou reprise est le montant réalisé par sa vente, ou, si elle n'est pas vendue, la valeur estimée, déduction faite de ces montants (1) des droits de douane payables sur les vaisseaux marchands et leurs cargaisons conformément aux règlements de la douane ; et (2) la dépense encourue par le transport, le déchargement, l'empaquetage, l'estimation et la conservation de la propriété, ainsi que les dépenses de la vente si vente il y a eu. Du montant total réalisé de cette manière, 10 pour cent sera payé au Fonds des invalides.

Observation.—Lors de la restitution à ses propriétaires primitifs de la propriété reprise de l'ennemi, ou de l'argent déposé pour obtenir la libération de telle propriété, les propriétaires (excepté dans le cas du gouvernement) devront rembourser les dépenses spécifiées au paragraphe 2 de cet article.

47. Les parts de prises pour la capture de prises par des navires de la marine impériale sont divisées entre les personnes qui ont droit d'y participer, conformément à des tableaux spéciaux. Dans ces tableaux les personnes qui ont droit à des parts de prises sont divisées par classes, selon le degré de leur responsabilité et selon leurs grades, désignations et devoirs divers dans le service, et aussi selon la mesure de leur participation dans la capture de la prise, et il est assigné un certain nombre de parts à chaque personne appartenant à une classe particulière. Ces tableaux, après

revision par le Conseil de l'Amirauté, sont soumis à l'approbation de Sa Majesté Impériale.

48. Au cas de la capture d'une prise par des vaisseaux marchands, les propriétaires des vaisseaux qui font la capture reçoivent de un quart à une demie des parts de prises totales, d'après les damages soufferts par leurs vaisseaux en capturant la prise. Chaque propriétaire reçoit une part correspondante à sa part dans la propriété des vaisseaux. Le reste des parts de prises est divisé entre les équipages des vaisseaux qui ont fait la capture, selon les règlements régissant la division des parts de prises pour la capture de prises par des navires de guerre, avec telles modifications que pourront nécessiter les diverses conditions du service dans la marine marchande.

49. La détermination du montant des parts de prises pour la capture d'une prise par des vaisseaux marchands, et la division même des parts de prises pour la reprise de l'ennemi de vaisseaux russes et de leurs cargaisons qui ne sont pas propriété du gouvernement russe, ainsi que de vaisseaux étrangers et de leurs cargaisons, sont du ressort des tribunaux des prises. Dans tous les autres cas la détermination du montant des parts de prises et sa division sont confiées à des commissions spéciales et au conseil de l'Amirauté, sous la régie de règlements établis par le Directeur du ministère de la Marine, de concert avec les ministres des Finances et de la Guerre.

ARTICLE III—CONSTITUTION DES TRIBUNAUX DE PRISES ET PROCÉDURE DANS LES CAUSES DE PRISES.

CHAPITRE I.—*Constitution des tribunaux des prises.*

50. L'enquête dans les causes de prises est confiée (1) à des tribunaux des prises de port ou de l'Amirauté, et (2) au Conseil de l'Amirauté comme au tribunal suprême des prises.

51. Les tribunaux des prises de port sont établis par le Directeur du ministère de la Marine aux ports russes, et, s'il est nécessaire, et avec la sanction du gouvernement étranger concerné, à des ports d'une puissance alliée. Les tribunaux des prises d'Amirauté sont établis sous l'Amirauté ayant un commandement distinct.

52. Un tribunal des prises de port est composé d'un président et de cinq membres. Le président d'un tribunal de port est choisi, par un ordre impérial, parmi les fonctionnaires du département judiciaire de marine d'un grade non inférieur à celui de colonel. Le tribunal des prises se compose aussi de deux membres choisis par le Directeur du ministère de la Marine parmi les officiers d'état-major du département de la Marine, de deux membres choisis par le ministre de la Justice parmi les fonctionnaires du département judiciaire qui ont une connaissance pratique de la loi marchande et de la procédure judiciaire, et d'un membre choisi par le ministre des Affaires étrangères parmi les fonctionnaires de son département. En l'absence du président du tribunal des prises, ses devoirs sont remplis par le membre le plus ancien du tribunal. Sont adjoints à un tribunal des prises de port un procureur, un secrétaire (officier payeur), et un interprète, ainsi que des commis et employés en tel nombre qui sera nécessaire. Le procureur d'un tribunal des prises est choisi par le Directeur du ministère de la Marine parmi des personnes qui ont complété un cours d'études légales, ou qui, dans leur service, ont fait montre d'une bonne connaissance de la loi, et qui ont pratiqué la loi. La nomination du secrétaire du tribunal appartient au Directeur du ministère de la Marine, et le choix de l'interprète, des commis et employés appartient au président du tribunal des prises. L'interprète, s'il n'est pas déjà au service du gouvernement, devra prêter serment avant de commencer ses services au tribunal.

53. Le président, les membres, le procureur et le secrétaire d'un tribunal des prises de port, si la rémunération qu'ils reçoivent dans leurs autres postes n'est pas moindre que celle assignée aux fonctionnaires des tribunaux de marine qui occupent des postes semblables, ne recevront aucune rémunération spéciale pour leurs services au tribunal des prises ; au président, aux membres, au procureur et au secrétaire d'un tribunal des prises, si leur rémunération est moindre que celle indiquée ci-dessus, ou s'ils ne reçoivent aucune rémunération, il sera permis, dans le premier cas, de retirer une rémunération suffisante pour compléter le montant indiqué, et, dans le dernier cas, une rémunération égale à celle des membres de tribunaux de marine remplissant les mêmes fonctions.

54. Il est considéré qu'un tribunal des prises de port est proprement constitué si, en outre du président ou de son *locum tenens*, du procureur et du secrétaire, les personnes suivantes sont présentes :

(1.) Pour la décision de la question principale dans les cas spécifiés aux paragraphes 1-3 de l'article 58, pas moins de trois membres—un du ministère de la Marine, un du ministère de la Justice et un du ministère des Affaires étrangères ;

(2.) Pour la décision de toutes les autres questions du ressort des tribunaux des prises, pas moins de deux membres, dont un du ministère de la Justice.

55. Les tribunaux des prises établis à des ports d'une puissance alliée devront être constitués d'après des principes analogues à ceux prescrits par ces règlements, après convention entre le Directeur du ministère de la Marine et le ministre des Affaires étrangères d'une part, et les autorités étrangères compétentes d'autre part.

56. Un tribunal des prises d'Amirauté est composé d'un amiral, sous la présidence d'un des commandants supérieur des navires d'une escadre ou d'une division, de quatre officiers d'état-major de marine, les devoirs de procureur étant assignés à un fonctionnaire de la division judiciaire, et ceux de secrétaire et d'interprète aux autres officiers de l'escadre de division. Un tribunal des prises de l'Amirauté est considéré proprement constitué s'il y a présent le président et pas moins de trois membres, ainsi que les personnes qui remplissent les devoirs de procureur et de secrétaire.

57. Le tribunal suprême des prises est formé par l'addition, sur un ordre impérial, aux membres du Conseil d'Amirauté, de deux sénateurs du quatrième département ou du département civil de cassation du Sénat dirigeant, et d'un fonctionnaire du ministère des Affaires étrangères. Les devoirs de procureur du tribunal suprême des prises sont assignés à un fonctionnaire légal du ministère de la Marine, et les devoirs de secrétaire par un fonctionnaire administrateur de ce département. Le tribunal suprême des prises est régulièrement constitué s'il y a présent, en outre des fonctionnaires faisant office de procureur et de secrétaire, pas moins de trois membres du Conseil d'Amirauté et un sénateur ; et lorsqu'elles ont à décider des cas spécifiés aux titres 1-3 de l'article 58, le membre député par le ministère des Affaires étrangères devra en outre être présent.

Chapitre 2.—*Procédure dans les causes de prises.*

58. Il est du ressort des tribunaux des prises de décider, en vertu des règles de procédure établies aux articles 50-63, les cas suivants :

(1.) La confiscation ou la libération des vaisseaux marchands capturés et de leurs cargaisons, ou des sommes réalisées par la vente de ces vaisseaux et cargaisons, ou payées comme sécurité pour des vaisseaux et cargaisons libérés ;

(2.) La compensation pour les pertes subies par la saisie, la destruction, la perte, le dommage des vaisseaux marchands et de leurs cargaisons ;

(3.) La libération de vaisseaux marchands et de leurs cargaisons repris de l'ennemi à leurs propriétaires primitifs, et l'établissement des sommes payées par ces propriétaires pour parts de prises et dépenses ; et

(4.) L'établissement du montant des parts de prises devant être payées pour la capture des vaisseaux d'un ennemi et de leurs cargaisons, et la division de ce montant.

Observation.—Les règles de procédure dans des tribunaux de prises établis à des ports d'une puissance alliée devront être déterminées par analogie aux règles prescrites par ces règlements, après convention entre le Directeur du ministère de la Marine et le ministre des Affaires étrangères d'une part et les autorités étrangères compétentes d'autre part.

59. Dans les cas où l'on éprouverait quelque difficulté en ce qui concerne la procédure dans les causes de prises, les règles prescrites par ces règlements devront être considérées conjointement avec les dispositions des codes de procédure civile et criminelle.

PARTIE I.—*Procédure dans les causes de confiscation ou de libération de vaisseaux capturés ou de cargaisons, ou de sommes réalisées par la vente de ces vaisseaux ou cargaisons, ou payées comme garantie pour des vaisseaux ou cargaisons libérées.*

60. Dans les causes de confiscation ou de libération de vaisseaux capturés ou de cargaisons, ou de sommes réalisées par la vente de ces vaisseaux ou cargaisons, ou payées comme sécurité pour des vaisseaux ou des cargaisons libérées, les parties suivantes sont reconnues: Le procureur, représentant les intérêts du trésor public et les propriétaires primitifs de la propriété capturée ou leurs agents, et, en l'absence des propriétaires ou de leurs agents, le capitaine du vaisseau capturé. Dans toutes les questions affectant la reconnaissance du droit à des parts de prises ou au montant des parts de prises, le commandant du navire qui a fait la capture, ou son agent, a droit d'être considérée comme partie.

61. Il est permis aux parties :—

(1.) D'être présentes à toutes les procédures du tribunal des prises et de donner des explications sur tout sujet traité durant ces procédures ;

(2.) De produire des témoignages à l'appui de leurs assertions, et, avec la permission du président du tribunal, de poser des questions aux personnes examinées ;

(3.) De faire, oralement ou par écrit des demandes ou des déclarations concernant la cause ; et

(4.) D'examiner le compte rendu original des procédures, et d'obtenir des copies de ce compte rendu et des extraits de papiers et de documents.

62. L'époque et l'endroit des sessions du tribunal des prises sont fixés par le président du tribunal, astreint néanmoins aux prescriptions des articles 64 et 73. Il sera donné avis de l'époque et de l'endroit des sessions au procureur du tribunal et à toutes personnes concernées dans la cause, qui ont fait connaître au tribunal leur adresse à l'endroit où il est convoqué.

63. Les déclarations de personnes qui seront examinées devant un tribunal des prises, et qui ne savent pas le russe, pourront être prises par écrit. Ces déclarations, ainsi que tous documents dans une langue étrangère, seront traduites en russe.

64. Dès qu'avis est reçu de l'arrivée de propriété capturée, le tribunal des prises se réunira aussitôt que possible et procèdera à l'examen de toutes personnes appartenant au navire qui a fait la capture, et aux vaisseaux capturés, ainsi que toute personne qui se présente volontairement (article 60), et dont le tribunal considère le témoignage nécessaire. Dans les cas où la propriété capturée a été conduite à un port autre que l'endroit où siège le tribunal, celui-ci se rendra à cet endroit pour l'audition des témoignages, ou enverra l'un de ces membres dans ce but, et si ceci ne peut se faire avant le jour fixé pour le départ des vaisseaux, le tribunal priera les autorités navales locales ou autres autorités d'entendre les témoignages.

65. Outre l'audition des témoignages (article 64), le tribunal s'il est nécessaire, de sa propre initiative ou sur demande de personnes concernées dans la cause, se rendra ou bien enverra un ou plus de ses membres pour inspecter la propriété capturée, ou la fera examiner par des experts.

66. Il est loisible au tribunal des prises de libérer la propriété capturée avant la conclusion de la cause, sur réception de securité en argent égale à la valeur de la propriété. La valeur de la propriété sera déterminée par une estimation faite, sous la direction d'un membre du tribunal, par des estimateurs assermentés, ou, en l'absence de ces derniers, par au moins deux experts.

67. La propriété capturée peut être vendue à l'enchère publique avant la conclusion de la cause, sur demande des parties et avec le consentement du tribunal, si cette propriété, à cause de sa nature ou de sa mauvaise condition, ne peut être conservée, et aussi si la valeur de la propriété, de l'avis des experts, ne justifie pas la dépense de sa conservation. De plus, il est loisible au tribunal de faire vendre la propriété avant la conclusion de la cause s'il ne semble pas nécessaire à la décision de la cause que cette propriété soit gardée plus longtemps, et si les parties ont signifié leur consentement à la vente.

68. Si la propriété capturée est amenée à un port d'une puissance alliée où il n'y a pas de tribunal des prises d'établi, les procédures spécifiées aux articles 64 et 65, après convention entre le Directeur du ministère de la Marine et le ministre des Affaires étrangères d'une part et les autorités étrangères compétentes d'autre part, seront conduites par l'agent de marine ou le conseil russe local, ou par une personne spécialement nommée, en présence d'au moins deux témoins—des sujets russes si possible—résidant à l'endroit en question. Après la conclusion de ces procédures, la cause relative à la propriété capturée sera renvoyée au plus proche tribunal des prises, avec tous les papiers qui s'y rapportent. En même temps, il est loisible au susdit agent de marine, consul, ou personne spécialement nommée de prendre les mesures prévues à l'article 66 et dans la première partie de l'article 67 concernant la propriété capturée, s'il semble inopportun d'attendre que le tribunal des prises prenne les mesures en question.

69. Après la conclusion des procédures mentionnées aux articles 64 et 66, le tribunal des prises procèdera au jugement de la cause et décidera d'abord sans délai de la libération de toutes parties de la propriété capturée dont la plus longue détention, dans les circonstances, paraît inutile.

70. Si cela paraissait nécessaire dans l'intérêt de la cause, le tribunal pourvoira à la recherche d'autres preuves dans la cause, et ordonnera l'échange des papiers entre les parties, et les requerra de produire des preuves complémentaires, fixant un délai pour tel échange et production de preuves. L'examen des témoins produits par les parties par suite de cet ordre du tribunal peut être fait par le tribunal lui-même ou, sur sa demande, par les autorités navales qui n'ont pas pris part à la capture de la propriété qui forme le sujet de l'enquête, ou bien par une des personnes désignées à l'article 68.

71. Dans les causes concernant des vaisseaux marchands de nationalité neutre, ou des vaisseaux marchands dont la nationalité est douteuse, ou des cargaisons de ces vaisseaux, si, en outre d'objets de contrebande de guerre, les cargaisons en question contiennent d'autres objets, le tribunal des prises de port, en l'absence des propriétaires primitifs de la propriété capturée, adressera une sommation publique à ces propriétaires. Un tribunal des prises d'Amirauté renverra sans délai ces causes au plus proche tribunal des prises de port pour plus ample action, se réservant le droit, quant à toute propriété capturée qui n'a pas été libérée par le tribunal d'Amirauté en vertu de l'article 69, de prendre les mesures prescrites à l'article 66, et dans la première partie de l'article 67, s'il semble inopportun d'attendre que ces mesures puissent être prises par le tribunal des prises de port.

72. Par les avis publiés mentionnés à l'article 71, les propriétaires primitifs sont sommés de comparaître devant le tribunal des prises de port et d'y produire toute preuve en leur possession se rapportant à la cause dans un délai spécifié dans l'avis. Ce délai est fixé par le tribunal, qui prend en considération la localité où il est établi et autres circonstances, mais ce délai ne devra pas être moindre qu'un mois, ou plus que quatre mois, de la date de la dernière publication. Les avis sont publiés trois fois, dans trois numéros consécutifs du "Government Messager" et de deux journaux publiés en des langues étrangères en Russie, ces journaux devant être choisis par le Directeur du ministère de la Marine. Si nécessaire, le texte de l'avis peut être communiqué aux éditeurs des journaux par télégramme. Les dépenses encourues pour ces avis sont payées à même la somme réalisée par la vente de la prise, ou, si la prise n'est pas vendue, à même les fonds du gouvernement ; en ce dernier cas, la dépense encourue est ou déduite de la valeur de la prise (article 46), ou remboursée par le propriétaire original (article 46, observation), ou bien payée par le trésor public (article 82).

73. La session où il doit être décidé de la question principale, dans une cause en rapport avec laquelle une sommation aux propriétaires primitifs a été publiée, ne doit pas être fixée pour une date précédant la comparution des propriétaires ou de leurs agents devant le tribunal, ou l'expiration du délai fixé dans l'avis pour leur comparution.

74. Le procès devant un tribunal des prises commence par un rapport d'un des membres du tribunal,

expliquant les circonstances de la cause. Après que ce membre a expliqué les points principaux, le tribunal entend les déclarations du procureur et de telles personnes, concernées dans la cause, présentes au tribunal. Ayant décidé, d'après sa considération intime, de la signification et de la force relative de la preuve faite dans la cause, le tribunal donne sa décision sur la question principale, ou des décisions distinctes sur diverses question relevant de la cause. Le tribunal rend une décision ordonnant la confiscation ou la libération de la propriété, même si la propriété en question a été détruite par un commandant de marine. Si la propriété a été capturée dans les eaux d'une puissance neutre, ou dans des eaux d'où les opérations de guerre sont exclues en vertu de conventions internationales spéciales, toute décision rendue par le tribunal pour la confiscation de la propriété est sujette à la condition qu'aucune demande de restitution ne sera faite dans le délai d'un an du jour de la capture (article 31).

75. Les décisions d'un tribunal des prises sont rendues à la majorité des voix. S'il y a égalité de votes le président a le vote prépondérant.

76. La décision du tribunal dans une cause est annoncée par le président à la séance dans laquelle elle est formée. En annonçant une décision le président fixe un jour auquel les parties peuvent comparaître pour la lecture de la décision écrite du tribunal, et il explique aussi aux parties les mesures qu'il faut prendre pour interjeter appel de la décision, et le délai fixé pour cette fin. La décision et la sentence du tribunal doivent être dressés sous quinze jours de la date où la décision est annoncée, et doit contenir un énoncé des considérations sur lesquelles elle est fondée. La décision et les sentences d'un tribunal sont supposés être publiés le jour fixé pour leur lecture.

77. Les parties, y compris le commandant du navire qui a fait la capture, ou son agent, a le droit d'interjeter appel. L'appel, accompagné d'autant de copies qu'il y a de parties dans la cause, doit être déposé au tribunal qui a rendu la décision, sous un mois de la publication de la décision (article 96). Si pour des raisons spéciales on laisse expirer le délai fixé pour interjeter appel, il incombe au tribunal qui doit décider l'appel, de dire si le délai fixé pour l'appel peut être prolongé. Les pétitions demandant la prorogation du droit d'appeler doivent être déposées sous quinze jours de la date de la publication de la décision du tribunal déclarant que le délai pour interjeter appel est expiré. Des appels spéciaux contre la décision du tribunal refusant de proroger le délai fixé pour l'appel doivent être transmis sous quinze jours de la date de la publication de cette décision.

78. En recevant l'appel, le tribunal des prises en communique des copies au procureur et aux autres personnes concernées dans la cause dont les intérêts sont lésés par l'appel, si ces personnes ont donné avis de leurs adresses dans la localité où le tribunal est établi ; si elles ne l'ont pas fait, les copies de l'appel qui leur sont destinées resteront dans le tribunal. Les appels originaux sont transmis avec les dossiers des procédures dans la cause au tribunal suprême des prises, auquel sont aussi transmis les appels spéciaux, mentionnés à l'article 77 contre le refus du tribunal des prises de proroger le délai pour interjeter appel. Toutes déclarations de personnes concernées dans la cause au sujet des appels qui leur sont communiqués doivent être envoyées par ces personnes directement au tribunal suprême des prises avant la date fixée pour l'audition de la cause par ce dernier tribunal.

79. Si un appel n'est pas interjeté sous le délai fixé, toute décision à l'effet que la propriété capturée doit être confisquée sera exécutée aussitôt que le délai expire. Si un appel est interjeté, l'exécution de cette décision sera retardée jusqu'à ce que l'appel soit décidé.

80. Une décision à l'effet que la propriété capturée soit libérée doit être exécutée immédiatement après la publication de cette décision, si elle est conforme aux conclusions du procureur, et a l'assentiment du commandant du navire qui a fait la capture ou de son agent. Si ces conditions ne sont pas remplies, cette décision ne peut être mise en force avant que le délai fixé pour interjeter appel soit expiré. Si cet appel est interjeté, la propriété capturée sera évaluée en la manière décrite dans l'article 66. Le tribunal peut, sa discrétion, permettre la libération de la susdite propriété avant la décision de l'appel, soit sur le dépôt comme garantie d'une somme de deniers égale à la valeur de la propriété telle qu'estimée par évaluation, ou sans ce dépôt. S'il s'élève quelque différend au sujet du droit de propriété des objets libérés, la remise de la propriété au propriétaire primitif doit être retardée jusqu'à ce que ce différend soit réglé de la manière voulue par la loi, ou jusqu'à ce que les parties réclamant la propriété ait payé un dépôt en deniers égal à la valeur de la propriété.

81. Du moment que la personne ou le département qui est chargé de la garde de la propriété capturée a reçu avis de la décision que cette propriété doit être libérée sans paiement d'un dépôt, tous les frais encourus pour la garde de cette propriété seront supportés par les propriétaires primitifs.

82. La propriété capturée qu'on a décidé de libérer et qui n'est pas réclamée sous six mois de la date à laquelle la décision devient légalement obligatoire, peut être vendue à l'enchère publique. Si dans le cours de dix ans à compter de la date à laquelle la décision devient loi personne ne vient légalement réclamer la propriété qu'il a été décidé de libérer, cette propriété, ou la somme réalisée par la vente, tombera dans le trésor public, lequel se chargera de toutes les dépenses de la garde de cette propriété ou de ces deniers.

83. Les règles posées pour les tribunaux des prises dans les articles 62 et 73-76 sont applicables à la procédure dans les enquêtes d'appels contre les décisions des tribunaux des prises par le tribunal suprême des prises, et aussi au mode de publication des décisions de ce tribunal.

84. Le tribunal suprême des prises ne s'occupe que des parties des décisions d'un tribunal des prises dont il est interjeté appel par des personnes concernées dans la cause. L'annulation de décisions à l'effet que la propriété capturée doit être libérée et remise à son propriétaire primitif sans aucune demande d'un dépôt, malgré la circonstance qu'un appel a été interjeté (article 80), entraîne l'adjudication en la manière prescrite dans les articles 44 et 49, d'une part de prise correspondante à la valeur de telle portion des parts de prises libérées que le tribunal suprême des prises jugera passible de confiscation comme prise.

85. Il n'y a pas d'appel des décisions du tribunal suprême des pisesi ; une fois rendues, des copies doivent être communiquées aux autorités navales compétentes pour exécution.

86. Les pétitions, déclarations, appels et autres documents dans des causes dans les tribunaux des prises et dans le tribunal suprême des prises, aussi bien que les dossiers de ces tribunaux, sont exempts du droit du timbre ou autres droits. Les personnes, autres que le procureur, qui obtiennent des copies de documents ont à payer 40 kopecks par feuille. Aucune remunération n'est fixée pour la conduite des causes dans les tribunaux des prises ou dans le tribunal suprême des prises.

PARTIE II.—*Procédure dans les causes relatives à la compensation pour pertes dues à la détention, destruction, pertes ou avaries des vaisseaux marchands et marchandises, au retour à leurs propriétaires primitifs des vaisseaux marchands et cargaisons repris de l'ennemi, et au règlement des parts de prises et frais payables par ces propriétaires, et aussi à l'établissement du montant des parts de prises pour la capture des navires et cargaisons de l'ennemi par des vaisseaux marchands et la distribution de ces parts.*

87. Les causes concernant,—

(1.) La compensation pour pertes dues à la capture, destruction, perte ou avaries des vaisseaux marchands et leurs cargaisons ;

(2.) La remise à leurs propriétaires primitifs des vaisseaux marchands et cargaisons repris de l'ennemi, et le règlement des parts de prises et des frais payables par ces propriétaires ; et

3. L'établissement du montant des parts de prises pour la capture des navires et cargaisons de l'ennemi par des vaisseaux marchands, et la distribution des parts, sont traités conformément aux règles posées dans les articles 60-86, sauf les exceptions et additions spécifiées plus bas (articles 88-93).

88. Les causes concernant la compensation pour pertes dues à la capture, destruction, perte ou avaries

des vaisseaux et cargaisons marchands, sont traitées par des tribunaux des prises de port, et ne peuvent être instituées que sur la pétition des personnes qui ont souffert des pertes, ou leurs agents, et le procureur comme représentant les intérêts du gouvernement, ont le droit d'être parties à ces causes.

89. Les causes mentionnées à l'article 88 sont traitées simultanément avec les causes concernant la confiscation ou libération de la propriété capturée, et les décisions rendues sont basées sur la preuve présentée ou indiquée par les parties. Les décisions dans les causes concernant les pertes sont rendues simultanément avec celles concernant la confiscation ou libération de la propriété capturée, ou sinon, séparément. Appel peut être interjeté des décisions concernant les pertes sous un mois, et cet appel constitue un empêchement à l'exécution de la décision dont est appel.

90. Les causes concernant la remise à leurs propriétaires primitifs des vaisseaux et cargaisons marchands repris à l'ennemi, et le règlement du montant des parts de prises et des frais payables par ces propriétaires, sont traitées par les tribunaux des prises de l'Amirauté, que si les propriétaires de la propriété reprise, ou leurs agents, sont présents ; s'ils ne sont pas présents, les tribunaux de l'Amirauté passent les causes aux tribunaux des prises de port, pour être décidées.

91. Dans les causes mentionnées à l'article 90, les propriétaires primitifs de la propriété reprise, ou leurs agents, et le commandant du navire qui a fait la reprise ou son agent et le procureur jouissent des droits de parties. En traitant de ces causes, les tribunaux des prises de port, si c'est nécessaire, adresse une sommation aux propriétaires absents au moyen de la publication d'un avis, et à la comparution des propriétaires ou de leurs agents, ou à l'expiration du délai fixé pour leur comparution, les tribunaux prononcent leur décision sur la question principale. Dans ces causes il peut être interjeté appel des décisions des tribunaux des prises sous un mois.

92. La remise de la propriété capturée à ses propriétaires primitifs est permissible (1) avant que la décision ait été rendue et soit devenue légalement obligatoire—seulement à la condition que les propriéteires déposent en garantie une somme égale à tout montant qu'ils peuvent être appelés à payer pour ports de prises et frais (articles 45, 46. observation, et 66) ; et (2) après que la décision sera devenue légalement obligatoire—à la condition que les propriétaires paient la part de prise et les frais pour lesquels ils sont trouvés passibles. A part des causes visées par l'article 67 (première partie) et 82, la vente de propriété reprise est aussi permissible si le propriétaire primitif fait une demande pour sa vente. Lorsque la propriété qui aurait dû être remise tombe au gouvernement (article 82) ce dernier paie toutes les dépenses et aussi la part de prise.

93. Les causes concernant le règlement du montant de parts de prise pour la capture de navires et cargaisons de l'ennemi par des vaisseaux marchands, et la distribution des parts, sont traitées par les tribunaux des prises. Ces causes sont instituées sur la pétition des membres de l'équipage du vaisseau qui a fait la capture, et ces personnes et le procureur ont le droit d'être parties. Dans ces causes il peut être interjeté appel des décisions des tribunaux des prises sous un mois.

(Signé) MICHAEL,
Président du conseil impérial.

INSTRUCTIONS.—*Sur la procédure dans l'arrêt, la visite et la saisie, et aussi dans l'enlèvement et la livraison des vaisseaux et cargaisons capturés.*

§ 1. Les navires de la marine impériale, agissant en vertu des "Règlements concernant les prises maritimes" quand il s'agira d'arrêter, visiter et saisir les vaisseaux marchands, et aussi d'enlever et livrer des vaisseaux et cargaisons capturés, se guideront sur les règles suivantes, en sus de toutes déclarations et autres ordres émis par le gouvernement à l'occasion de la guerre.

Observation.—Inter alia, il sera nécessaire de définir le territoire neutre en mer et les autres eaux où les opérations de guerre sont exclues par conventions internationales spéciales, et où en vertu de l'article 16 des "Règlements concernant les prises maritimes" il n'est pas permissible d'arrêter, visiter et saisir des navires et cargaisons.

ARRÊTER.—*Procédure.*

§ 2. Un navire désirant en arrêter un autre doit se diriger sur lui, hisser son pavillon, et tirer un coup de canon à blanc dans sa direction. En même temps un signal peut être donné selon le Code international.

Afin d'arrêter un vaisseau la nuit, il est nécessaire en tirant le coup à blanc, d'exposer les feux de têtes de mâts et les feux distinctifs.

Refus d'arrêter.

§ 3. Si, malgré le coup de canon tiré le vaisseau n'arrête pas, un boulet doit être lancé au delà de l'avant du vaisseau fuyant. S'il persiste à marcher, il est permissible de tirer sur lui et de le poursuivre afin de le forcer à arrêter.

En commençant à tirer sur le vaisseau, il est bon de tirer le premier coup au-dessus de sa coque entre les mâts. Mais cette modération n'est pas obligatoire, surtout si c'est un vapeur qui ayant l'avantage de la vitesse peut espérer échapper à celui qui le poursuit.

Tout vaisseau qui a fait une tentative évidente pour échapper à un croiseur, ce qui a obligé ce dernier à le poursuivre et d'employer la force pour l'arrêter, est passible d'être saisi; toutefois le commandant du croiseur, s'il le juge à propos après avoir arrêté un vaisseau, peut le soumettre à une visite comme préliminaire, et agir ensuite selon le résultat de la visite.

VISITE.—*Procédures préliminaires.*

§ 4. Pour la visite un officier d'expérience et plusieurs hommes de l'équipage doivent être choisis ; un aide garde-magasin, etc., peut avantageusement être inclu. Deux officiers ayant quelque connaissance des langues étrangères doivent être inclus, s'il y en a à bord.

§ 5. Il est bon que quelques relais d'officiers et d'hommes soient choisis d'avance pour la visite. Les officiers et hommes envoyés pour faire la visite doivent être armés de revolvers. Il est utile de convenir d'avance de quelques simples signaux (avec une rame, un mouchoir, un petit pavillon, etc.)

Lorsque la chasse commence, les officiers choisis pour la visite doivent préparer leurs hommes, et prendre la latitude et la longitude du navire impérial.

§ 6. Le croiseur impérial doit s'approcher aussi près que possible du vaisseau qu'il arrête, avec toutes les précautions voulues.

Observation—Il est nécessaire de se rappeler les graves conséquences d'une collision. Le vaisseau peut appartenir à l'ennemi, on peut s'attendre à des actes hostiles, et un désir d'avarier le croiseur par une collision.

§ 7. Après que la chaloupe avec les officiers et les homme a poussé au large, le croiseur impérial devra rester en une telle position durant la visite que ceux qui sont à bord pourront garder la chaloupe en vue tout le temps, et voir ce qui se passe sur le vaisseau qui est visité. Les canons doivent être chargés, et les canonniers à leurs pièces.

Les officiers à bord.

§ 8. Lorsque le détachement atteint le vaisseau arrêté, il faut prendre note dans la chaloupe de son nom et de son port. Un officier accompagné de deux hommes montera alors sur le pont. Si deux officiers sont envoyés pour la visite, les officiers et un homme monteront à bord.

Observation.—Les hommes qui restent ne doivent monter sur le pont que lorsque l'examen des papiers est fini, et que la visite de tout le vaisseau commence. Le nombre d'hommes à envoyer à bord dépend de la dimension du vaisseau et de l'opinion des officiers (*e. g.*, il peut y en avoir quatre, six, ou plus.)

§ 9. Le plus jeune officier doit rester sur le pont tout le temps, et ne doit pas descendre. Son devoir est de surveiller tout ce qui se passe sur le pont du vaisseau qui est visité, et aussi d'avoir l'œil sur la chaloupe et les signaux de son propre navire. Le marin qui l'a accompagné à bord doit l'aider. L'examen des papiers et du vaisseau doit être fait par l'officier supérieur. Si un officier seulement est envoyé faire la visite, les devoirs de l'officier subalterne doivent être remplis par le plus ancien des deux marins qui sont montés sur le pont avec l'officier.

§ 10. La conduite des officiers et hommes envers le capitaine, l'équipage et les passagers doit être polie et de toute manière digne de la profession navale.

Si le vaisseau qui a été arrêté offre de la résistance à la visite il est passible de la saisie.

Examen des papiers.

§ 11. L'examen commence par une demande au capitaine—

(*a*) de déclarer le nom et la nationalité de son vaisseau.

(*b*) de nommer son port de destination, et celui de partance.

(*c*) produire son journal du bord et tous les papiers concernant le vaisseau et la cargaison.

Ci-jointe est une liste des principaux papiers du bord que portent les vaisseaux marchands de certaines nationalité (Annexe I.)

§ 12. En s'occupant d'examiner les papiers, l'officier doit porter une attention spéciale au journal du bord, et doit s'efforcer de se rendre compte de toutes les circonstances du voyage, l'endroit sur la carte où le capitaine croit se trouver, et les dernières entrées dans le journal.

§ 13. En examinant les papiers relatifs à la nationalité du vaisseau, l'officier doit noter le port d'enregistrement, le numéro du registre, les noms et la nationalité des armateurs, l'endroit où, et quand le vaisseau a été construit, et aussi s'il a été acheté de sujets de l'ennemi après la déclaration de guerre, dans le but de protéger la propriété de l'ennemi.

§ 14. En examinant les papiers relatifs à la cargaison, l'officier doit déterminer la nature et le montant des marchandises, l'endroit d'où elles ont été apportées et leur destination, et les noms et la nationalité des consignateurs et des consignataires. En même temps, il importe de s'assurer s'il se trouve parmi les marchandises de la contrebande de guerre*, et quels sont les propriétaires de la cargaison, sujets de l'ennemi ou d'une puissance neutre.

§ En exminant les papiers concernant la composition de l'équipage et des passagers, l'officier doit s'assurer de la nationalité et de l'occupation de ces personnes, et doit s'efforcer de déterminer s'il se trouve parmi les passagers des personnes appartenant aux troupes de l'ennemi, et lesquels de l'équipage peuvent être détenus en vertu de l'article 18 des "Règlements concernant les prises maritimes".

§ 16. Après avoir compléter l'examen des papiers du bord, l'officier doit demander au capitaine de produire toutes malles qui peuvent être à bord, et doit les visiter pour voir si elles contiennent quelque correspondance de l'ennemi et des colis adressés aux ports de l'ennemi.

§ 17. L'officier doit prendre note de tous papiers qui lui sont montrés, et doit prendre par écrit tout ce qu'il juge nécessaire. En examinant les papiers, il peut, à sa discrétion, adresser des questions au capitaine, au second, et aux autres membres de l'équipage.

Conséquences de l'examen des papiers.

§ 18. L'officier doit clore l'examen et détenir le vaisseau dans les cas suivants :—

(*a.*) S'il est prouvé que le vaisseau appartient à l'ennemi ;

(*b.*) S'il n'existe pas de papier du bord, surtout des papiers propres à prouver la nationalité du vaisseau et de vérifier les circonstances de son voyage ; ou si les papiers du navire sont jetés à la mer, ou détruits d'autre manière ;

(*c.*) Si parmi les papiers il s'en trouve qui porte l'officier à soupçonner que le vaisseau appartient à l'ennemi ;

(*d.*) Si l'officier arrive à la conclusion que les papiers ne sont pas véridiques.

(*e.*) S'il appert par les papiers que le vaisseau a été acheté de sujets de l'ennemi par le sujet d'un Etat neutre, et qu'il y a raison de supposer qu'une vente simulée a eu lieu dans le but de protéger la propriété de l'ennemi.

§ 19. Si l'officier est convaincu que les papiers sont en parfait ordre, que le vaisseau est réellement neutre, que parmi les marchandises à bord il ne peut y avoir de contrebande de guerre destinée à l'ennemi, et généralement qu'il n'existe aucune raison pour détenir le vaisseau, il doit le quitter sans délai, conformément aux règles posées aux §§ 28, 29 et 30. (Fin de la visite.)

§ 20. Si l'officier a des doutes sur l'exactitude des renseignements obtenus de l'examen des papiers, surtout si le vaisseau est en destination d'un port de l'ennemi, ou s'il a raison de supposer, d'après les indices généraux des mouvements, direction et position du vaisseau arrêté, que la destination éventuelle du vaisseau ou de sa cargaison est un port de l'ennemi, il doit procéder à l'examen et visite de tout le vaisseau, afin de s'assurer s'il y a quelque contrebande de guerre parmi sa cargaison.

Visite du vaisseau.

§ 21. La visite de tout le vaisseau doit être conduite par l'officier avec l'aide de quelques-uns de ses hommes qui quitteront la chaloupe sur un signal à cet effet.

§ 22. Le nombre des matelots venant à bord peut-être de quatre, six, huit ou plus selon la dimension du vaisseau à visiter et l'opinion de l'officier. S'il appert que le nombre d'hommes dans la chaloupe n'est pas suffisant, il peut par un signal au navire en appeler d'autres. Les hommes choisis pour la visite doivent être intelligents, actifs et d'expérience

§ 23. La visite de la cale est très difficile, vu qu'elle peut créer des plaintes de la part des neutres qui en souffrent sans le mériter. En conséquence l'officier doit d'abord décider quelle partie de la cargaison paraît la plus suspecte d'après le manque de précision des papiers, et doit diriger son attention à cette partie-là. La conduite de l'officier et des hommes doit être polie, mais ils ne doivent pas hésiter à faire leur devoir en tout et partout.

§ 24. Tant que dure la visite des cales, l'officier doit insister à ce que le capitaine soit présent tout le temps; il n'est pas de rigueur que le second du capitaine soit présent, à moins de nécessité absolue.

§ 25. Le capitaine présent à la visite est tenu, à la demande de l'officier qui dirige la visite, d'ouvrir toutes les serrures et cales que l'officier désire visiter, d'indiquer tous objets qui exigent d'être maniés spécialement, et montrer comment ouvrir certains colis (coffres, barils) qui sont choisis pour un examen plus soigneux. Si le capitaine refuse d'ouvrir une cale lorsqu'il en est requis par l'officier visiteur, le vaisseau est passible de détention.

§ 26. Tant que dure la visite l'officier peut afin de faciliter la besogne, poser des questions à l'équipage et aux passagers, afin d'obtenir les explications nécessaires concernant le vaisseau et la cargaison. Il est bon aussi de faire attention à certains signes extérieurs, par exemple, aux marques qui sont sur les cheminées des vapeurs de certaines compagnies et qui pourraient être recouvertes par la peinture.

§ 27. L'officier doit s'abstenir de pousser plus loin la visite du vaisseau du moment qu'il s'est convaincu que la cargaison ne contient pas de contrebande de guerre, et qu'il n'y a rien de suspect dans le vaisseau. Chaque article qui a été déplacé doit être remis à sa place aussi promptement et soigneusement que possible, conformément aux instructions du capitaine.

Fin de la visite.

§ 28. Une fois la visite terminée, l'officier inscrira dans le journal du bord. en langue russe, le temps et l'endroit de la visite (latitude et longitude), le nom du navire, le nom de son commandant, et le résultat de la visite. L'entrée doit être faite en conformité de la formule ci-jointe (Annexe 3).

§ 29. Avant de quitter le vaisseau, l'officier demandera au capitaine de lui donner par écrit un certificat (dans sa propre langue, si c'est possible) à l'effet qu'il n'a aucun sujet de plainte, ou, s'il a à se plaindre, de le mettre en écrit.

§ 30. En quittant le vaisseau, l'officier doit informer le capitaine qu'il ne doit pas continuer sa route tant que lui-même n'aura pas rejoint le navire impérial et fait rapport au commandant. L'officier dressera un rapport par écrit de sa visite.

§ 31. Si le vaisseau est passible de saisie, l'officier donnera un signal à cet effet, et retournera à son navire, emportant avec lui les papiers et amenant le capitaine et les autres personnes dont les déclarations peuvent être utiles.

---

*Quant à la contrebande de guerre, voir Annexe II.

DÉTENTION.

§ 32. La détention des vaissaaux et des cargaisons dépend entièrement de l'autorité du commandant du navire impérial. La procédure à suivre est comme ci-dessous :—

Commission.

§ 33. Une commission de trois officiers (dont l'un est l'officier qui conduit la visite) doit être formée sur le navire impérial, et cette commission dressera un protocol détaillé de toutes les procédures et découvertes qui ont eu lieu à la visite, et la présentera au commandant pour sa confirmation.

Rédaction du protocol.

§ 34. Le protocol doit être écrit en langue russe. Il doit décrire en détail la nationalité, la classe, et le nom du vaisseau ; les noms du capitaine et des armateurs ; le nombre de l'équipage et leur nationalité ; toutes les circonstances se rattachant à l'arrêt du vaisseau ; tous les papiers produits par le capitaine, et le contenu de ces papiers ; toutes les circonstances se rattachant à l'examen des papiers et la visite du vaisseau ; toute information concernant la cargaison, et tout ce qui a été trouvé dans le vaisseau ; toutes les déclarations du capitaine subrécargue, chef d'équipage, et autres personnes interrogées.

Protêt du capitaine.

§ 35. Le contenu du protocol doit être traduit oralement au capitaine, et il doit être requis de signer le protocol. Toutefois, il n'est pas obligé de le signer. Une note doit être faite sur le protocol à l'effet qu'il a été lu et traduit au capitaine.

Tout protêt du capitaine (en écrit) doit être annexé au protocol, et tout inexactitude doit être expliqués sur le protocol même.

Observation.—Vu que la rédaction du protocol et l'examen du capitaine et autres personnes de l'équipage peut occuper un temps considérable, le croiseur est autorisé à contraindre le vaisseau marchand de prendre une certaine route, pendant que le croiseur continue sa visite en le suivant.

Décision du commandant.

§ 36. Aussitôt que le protocol a été rédigé et signé par les membres de la commission, il doit être soumis au commandant, qui affixera sa décision au protocol. En décidant si le vaisseau ou cargaison doit être détenu il doit se guider sur les considérations suivantes :—

§ 37. Les vaisseaux ci-dessous sont passibles de détention :—

1. *Tous les navires de guerre et les vaisseaux marchands de l'ennemi* (voir articles 9 et 10 des Règlements concernant les prises maritimes.

Observation.—En conformité de conventions internales spéciales conclues par le gouvernement impérial, certains navires de l'ennemi sont considérés non passibles de capture, mais ces navires sont toutefois passibles de détention si leur manière d'agir est telle que décrite sous le titre 2 (*a*), (*b*), (*c*), (*d*), du présent paragraphe (voir la deuxième partie de l'article 10 des Règlements concernant les prises maritimes ").

2. *Les vaisseaux marchands neutres :*

(*a*) S'ils sont en voie de transporter à l'ennemi une quantité quelconque d'articles requis pour tirer avec des armes à feu, d'objets ou substances employés pour causer des explosions, ou de troupes de l'ennemi (voir titre 1 de l'article 11 des Règlements concernant les prises maritimes ") ;

(*b*) S'ils sont en voie de transporter à l'ennemi d'autre contrebande de guerre jusqu'à un montant excédant en volume et en poids une moitié de la cargaison entière (voir titre 1, (*b*) de l'article 11 des susdits règlements).

Observation.—Si le total de cette contrebande de guerre est moindre que la moitié de la cargaison, le vaisseau ne devra être détenu que jusqu'à ce que la contrebande ait été livrée ; la livraison pourra se faire, à la discrétion du commandant, soit à l'endroit où le bateau été a détenu ou après qu'il a été amené au port (voir l'article 14 des règlements susdits).

(*c*.) S'ils sont découverts en rupture de blocus effectif dont avis a été donné (voir article 2 et titre 2 de l'article 11 des règlements susdits) ;

(*d*). S'ils ont opposé résistance armée à l'arrêt et à la visite (voir titre 3 de l'article 11 des règlements susdits) ;

(*e*). S'ils ont participé à des opérations hostiles de l'ennemi (voir titre 4 de l'article 11 des règlements susdits).

3. *Tous les vaisseaux suspects, même s'ils sont sous un pavillon neutre*, (voir article 16 des règlements susdits). Les faits suivants et autres semblables sont des raisons de considérer comme suspect un vaisseau marchand :

(*a*). Si le vaisseau n'arrête ses machines ou ne met en panne sur la sommation du croiseur, et que ce dernier soit par conséquent obligé de lui donner la chasse et d'user de force pour l'arrêter (voir § 3 de ces instructions.

(*b*). Si le vaisseau n'a pas de papier de bord ou a des papiers faux et suspects (voir § 18 de ces instructions, titres (*b*), (*c*), (*d*) ;

(*c*). S'il y a raison de croire que le vaisseau a été fictivement vendu à un sujet d'une puissance neutre après la déclaration de la guerre (voir § 18 de ces instructions) ;

(*d*). Si après l'arrêt du navire il a été fait résistance à la visite, ou si le capitaine a refusé d'ouvrir la cale à la demande de l'officier visiteur (voir § § 10 et 25 de ces instructions).

Cargaisons.

§ 38. Les cargaisons suivantes peuvent être détenues:

1. Des cargaisons de l'ennemi transportées dans des vaisseaux de l'ennemi (voir article 10 des " Règlements concernant les prises maritimes ") ;

2. Des cargaisons de l'ennemi ou des cargaisons neutres dans des vaisseaux neutres qui ont enfreint la neutralité comme suit (voir article 12 des règlements susdits) :

(*a*) Dans des vaisseaux neutres qui ont participé à des opérations hostiles de l'ennemi ;

(*b*). Qui ont offert résistance armée à l'arrêt, à la visite, ou à la détention ; et

(*c*). Qui ont été découverts en rupture de blocus.

3. Toutes les cargaisons réputées contrebande de guerre à l'exception des armes et des approvisionnements qui font partie de l'équipement d'un vaisseau neutre lui-même (voir article 12, titre 1, et article 13 des règlements susdits).

Lorsque des vaisseaux ou des cargaisons sont détenus, l'on observe la règle que les articles à l'usage personnel de l'équipage ou des passagers ne doivent pas être détenus (voir article 10, titre 1, des règlements susdits).

A l'exception des cas ci-dessus, les règles suivantes doivent être observées :

(1). Un pavillon neutre couvre la marchandise de l'ennemi, à l'exception de la contrebande de guerre (voir article 2, titre 2, des règlements susdits).

(2). La marchandise neutre, à l'exception de la contrebande de guerre, n'est pas saisissable sous pavillon ennemi, (voir article 2, titre 3, et article 10, titre 2, des règlements susdits).

TRANSPORT—*Mode de Transport.*

§ 39. Les vaisseaux et les cargaisons capturés pourront être conduits, à la discrétion du commandant du croiseur impérial, soit à un port ou soit à la flotte d'opération. Ils peuvent être escortés par le croiseur lui-même, ou être envoyés au port indépendamment en charge d'un officier et d'un équipage russe ; les officiers commandants seront gouvernés par les règles établies aux articles 351-353 du Code Naval, édition de 1899. Si un vaisseau capturé est envoyé seul, les papiers de bord originaux et les documents relatifs à sa capture devront rester en les mains du commandant du croiseur, et des copies devront en être données à l'officier mis en charge.

Destruction des vaisseaux capturés.

§ 40. Dans les cas suivants et autres cas exceptionnels similaires, le commandant du croiseur impérial a le droit de brûler ou de couler le vaisseau capturé, après avoir transbordé les personnes qui le montaient, et, si possible, tout ou partie de la cargaison, et aussi tous papiers et articles qui peuvent être nécessaires à l'instruction de la cause au tribunal des prises :

(1.) Quand il est impossible de garder le vaisseau capturé à cause de sa mauvaise condition.

(2.) Quand il y a danger que le vaisseau soit repris par l'ennemi.

(3.) Quand le vaisseau capturé est de très peu de valeur, et que sa conduite prendrait trop de temps et causerait une trop grande dépense de charbon.

(4.) Quand, à cause de la distance ou du blocus des ports où le vaisseau devrait être conduit, il semble difficile de l'y conduire.

(5.) Quand le transport peut empêcher le succès des opérations de guerre dans lesquelles le croiseur impérial est engagé, ou l'exposer au danger.

Le commandant devra faire un rapport, signé par lui et par tous ses officiers, expliquant les circonstances qui l'ont forcé de détruire le vaisseau capturé. Il devra transmettre le rapport à son officier supérieur à la première occasion.

Observations.—Quoique l'article 21 des règlements de 1895, concernant les prises maritimes, permet que le vaisseau soit brûlé ou coulé par le commandant " sur sa propre responsabilité," ce dernier n'encourt aucune responsabilité si le vaisseau capturé est vraiment exposé à la confiscation comme prise, et si les circonstances exceptionnelles où se trouve le navire impérial demandent impérieusement la destruction du vaisseau capturé.

Remplacement de son propre navire par le navire capturé.

§ 41. S'il appert qu'un navire capturé, et qui devrait être détruit en vertu de l'article précédent, est, sous le rapport de la construction et de la navigabilité, meilleur que le navire impérial, le commandant a le droit de remplacer son propre navire par la prise, et de brûler ou couler son propre navire.

Entrée de ports neutres.

§ 42. Un navire impérial, pendant qu'il conduit des vaisseaux capturés, peut entrer dans le port d'une puissance neutre qui n'a pas défendu dans sa déclaration de neutralité (ou dans quelque autre déclaration officielle) la visite de ses ports par des navires de guerre des belligérants avec leurs prises.

De plus, un croiseur impérial peut se réfugier dans le port d'une puissance neutre avec des vaisseaux capturés au cas de tempête ou autre nécessité urgente (comme bris des machines, insuffisance de provisions, poursuite par un ennemi plus fort) ; dans ce cas le commandant est obligé, en ce qui regarde la durée et les autres conditions de son séjour dans le port neutre, de se conformer aux règlements établis par le gouvernement de la localité.

LIVRAISON

A des ports russes ou à la flotte d'opération.

§ 43. Dès qu'un vaisseau capturé ou une cargaison a été amenée à un port russe il doit être livré à l'autorité naval locale (ou en son absence à l'autorité du port, des douanes ou de la police), avec tous les papiers et toutes les personnes à bord qui ont été détenues pour l'instruction de la cause.

Si les vaisseaux capturés et les cargaisons sont amenés à la flotte d'opération, ils devront être livrés à l'officier qui commande l'escadre.

L'autorité navale compétente ou autre autorité devra ouvrir les papiers scellés et prendre des mesures pour recevoir la propriété livrée, pour en faire l'inventaire et pour la conserver, ainsi que faire les démarches nécessaires pour la vente a l'enchère publique de tels articles qui, vu leur nature ou leur condition ne peuvent être gardés.

Les personnes suivantes ont droit d'être présentes à ces procédures : premièrement, le commandant ou un des officiers du navire impérial qui a fait la capture ; et, deuxièmement, le capitaine du vaisseau capturé, ainsi que les propriétaires du vaisseau et de la cargaison, ou leurs agents, si les propriétaires ou leurs agents sont à cet endroit.

Toutes les personnes présentes ont le droit de faire des suggestions et des observations concernant les procédés de l'autorité locale qui a pris charge du vaisseau ou de la cargaison.

A des ports étrangers.

§ 44. Si le vaisseau ou la cargaison capturé est amené à un port d'une puissance alliée, la livraison devra être faite à l'agence navale russe locale, ou au consulat russe ou à quelque autre autorité à laquelle, en vertu d'une convention entre le gouvernement russe et la puissance étrangère concernée, le devoir de recevoir des prises est assigné.

Avis aux autorités.

§ 45. Le commandant d'un navire impérial est obligé d'informer sans délai le Directeur du ministère de la Marine, à la première occasions, par télégramme, de la capture de vaisseaux et de cargaisons ainsi que de leur transport à un port et de leur livraison.

ANNEXE II À LA § 14 DES INSTRUCTIONS APPROUVÉES PAR LE CONSEIL D'AMIRAUTÉ, 20 SEPTEMBRE 1900, (MINUTES No. 4487, ARTICLE 38076.)

Conformément à l'article 13 des "Règlements concernant les prises maritimes" avis est donné dans une déclaration spéciale pour renseignement général, des objets réputés contrebande de guerre. Ci-suit la désignation de ces objets :—

(*a.*) Toutes sortes d'armes, armes portatives, et canons, montés et démontés ;

(*b.*) Les articles et munitions pour tirer avec des armes à feu, tels que projectiles pour canons, mèches pour projectiles, balles, capsules, cartouches, étuis de cartouches, poudre, nitre, soufre ;

(*c.*) Les objets ou substances employés pour causer des explosions, tels que torpilles et mines, dynamite, pyroxyline, et autres composés explosifs ;

(*d.*) Les articles appartenant à l'artillerie, au génie, et au train militaire, tels que affûts de canon, fourgons, coffres à munitions, forges portatives, cuisines de campagne, wagons à instruments, pontons, chevalets pour ponts, harnais de train, etc. ;

(*e.*) Les articles d'équipement et d'habillement militaires, boîtes à cartouches, havresacs, bandoulières, cuirasses, outils de tranchées, tambours, marmites, selles, harnais, articles finis pour uniformes, tentes, etc. ;

(*f.*) Les vaisseaux de haut bord en destination d'un port de l'ennemi, même sous pavillon marchand neutre s'il appert d'après la construction de leurs coques, leurs installations internes, et autres détails qu'ils sont construits pour des fins de guerre, et se rendent au port de l'ennemi pour être vendus ou livrés à l'ennemi ;

(*g.*) En général, tous autres articles destinés directement à la guerre sur terre et sur mer s'ils sont en voie d'être transportés pour l'ennemi, ou à sa destination.

Par l'expression "en destination de l'ennemi" s'entend transporter à sa flotte, à un de ses ports, ou même à un port neutre, s'il est de toute évidence que ce dernier est simplement une station intermédiaire à l'ennemi, ce dernier étant virtuellement la dernière destination.

Les actes suivants sont censés être sur le même pied que la contrebande de guerre, avec les mêmes résultats pour un vaisseau ou une cargaison neutre :—

1. Le transport des troupes de l'ennemi, de détachements militaires, et de simples soldats ; et
2. Le transport des dépêches de l'ennemi, c'est-à-dire correspondance d'affaires entre les chefs de l'ennemi et leurs agents qui sont sur un navire ou sur un territoire appartenant à l'ennemi ou occupé par lui.

FORMULE D'INSCRIPTION AU SUJET DE LA VISITE D'UN VAISSEAU.

Le de , en l'année 1901, en la latitude longitude , le croiseur impérial russe de 1re classe "Rurik" commandé par le capitaine a arrêté le vapeur (ou le vaisseau à voiles, barque, goélette, etc.) portant le pavillon neutre hollandais. Le vapeur arrêta immédiatement ses machines (ou le vaisseau à voiles mis en panne). D'après la visite l'on constata que le vapeur était nommé le ; les papiers du navire (les nommant) furent trouvés en règle, et il n'y avait pas de contrebande de guerre à bord. La visite dura deux heures (de heures à heures).

VU un Mémorandum daté le 25 mars 1904, du ministre de l'Intérieur, soumettant que le paragraphe 5 de l'article 101 de l'*Acte des terres fédérales* décrète que le ministre de l'Intérieur pourra faire faire des examens des aspirants aux commissions d'arpenteurs fédéraux, ou à l'étude de la profession comme clercs sous brevet, aux époques et endroits qu'il prescrira, par l'un des membres du bureau d'examinateurs, ou par un examinateur spécial, qui sera un arpenteur fédéral, ou arpenteur-topographe fédéral, et qui sera nommé par arrêté en conseil.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT que l'article 33 des règlements concernant les mines quartzeuses, établis par arrêté en conseil du 21 de mars 1898, déclare que le détenteur d'une concession minière sur des terres fédérales vacantes aura titre à tous les droits de surface, y compris l'usage de tout le bois qui s'y trouve pour des fins minières ou de construction relativement à l'exploitation de la dite concession dans le but de développer les minéraux qu'elle contient ;

Et considérant qu'il est représenté que des emplacements de mines quartzeuses sont quelques fois jalonnés que pour le bois qui s'y trouve,—

A ces causes, il plaît au Gouverneur général en conseil d'ordonner que l'article 33 des dits règlements de mines quartzeuses soit et il est par le présent rescindé, et remplacé par le suivant :—

"Le détenteur d'une concession minière sur les terres fédérales vacantes aura titre à tous les droits de surface y compris la faculté d'abattre sans payer de droits tout le bois sur l'emplacement qui sera nécessaire pour l'exploiter, mais non pour la vente ou le trafic, sauf là où le bois a été concédé ou vendu préalablement à la date de l'inscription. L'agent des bois peut, toutefois, permettre à tout mineur libre d'abattre et d'enlever de l'emplacement du bois pour son propre usage dans son exploitation minière, s'il ne peut s'en procurer autrement dans une distance raisonnable, mais nul tel permis ne concédera le droit d'abattre ou d'enlever du bois dont le détenteur de l'emplacement a besoin pour ses propres opérations minières.

"Dans le territoire du Yukon, le bois sur un emplacement minier sera, sujet aux droits existants lors de la demande de la concession, réservé jusqu'à ce que le régistrateur des mines certifie que ce bois est requis pour servir dans des opérations minières sur cet emplacement minier, et alors le droit de se servir de ce bois, ou d'une partie de ce bois, sans payer de droits, peut être donné au détenteur de cet emplacement minier par l'agent des bois et des terres de la Couronne avec l'approbation du commissaire du territoire. Le commissaire peut, toutefois, autoriser l'agent des bois à émettre un permis à tout mineur libre pour abattre et enlever de cet emplacement minier le bois dont il a besoin pour ses propres opérations minières lorsque ce bois ne peut s'obtenir autrement dans une distance raisonnable de l'endroit de ses opérations minières.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT que le paragraphe (*a*) de l'article 43 des règlements concernant la concession de mines quartzeuses sur les terres fédérales, établis par l'arrêté en conseil du 21 de mars 1898, déclare que dans aucun cas les frais d'arpentage ne seront considérés comme améliorations ou travail fait sur une concession, à moins que l'arpentage soit fait sous un an de la date de l'enregistrement de la concession, auquel cas les frais d'arpentage n'excédant pas $100 seront comptés comme travail fait sur l'emplacement ; et par un arrêté en conseil daté le 21 de janvier 1901, l'article 31 des dits règlements a été modifié de façon que si l'arpentage d'un emplacement minier a été fait sous un an à compter de la date à laquelle l'emplacement a été enregistré, le coût de cet arpentage, n'excédant pas $100, sera compté comme travail fait sur l'emplacement pour cette année-là.

Il plaît au Gouverneur en conseil d'ordonner que les dits articles des susdits règlements soient et ils sont par le présent modifiés comme suit :—

Les frais de l'arpentage d'une concession minière, n'excédant pas $100, toutefois, seront acceptés au lieu de travail représentatif sur la concession pour l'année dans laquelle l'arpentage est fait, que ce soit la première année ou non, pourvu qu'avis de cet arpentage soit immédiatement inséré pendant au moins soixante jours dans un journal publié ou circulant dans le district dans lequel l'emplacement est situé, ce journal devant être approuvé par le registrateur des mines, et pourvu aussi que le propriétaire de l'emplacement, avant la première publication de cet avis, fasse afficher dans un endroit bien en vue sur l'emplacement, et dans le bureau du registrateur des mines pour le district, un avis de son intention d'annoncer l'arpentage de l'emplacement, et aussi une copie du plan de l'arpentage préparé et attesté sous serment par un arpenteur fédéral. L'arpentage sera accepté comme définissant absolument les bornes de l'emplacement arpenté, pourvu qu'il reste non protesté dans le cours de la publication. Toutefois, si dans le délai spécifié l'arpentage est protesté, le protêt sera entendu et il en sera décidé conformément aux dispositions du paragraphe 2 de l'article 43*a* des règlements miniers. La publication de l'avis d'arpentage comme susdit, sera accepté au lieu de l'avis et la publication exigés par les paragraphes (*d*) et (*e*) de l'article 43 des dits règlements concernant les mines quartzeuses. Mais si l'avis d'arpentage n'est donné qu'après que la dépense exigée par le paragraphe (*a*) de l'article 43 des règlements aura été encourue, alors l'avis exigé par le dit article des règlements doit être donné.

JOHN J. McGEE,
42–4 Greffier du Conseil privé.

(51) FLEUVE ST-LAURENT EN HAUT DE MONTRÉAL—LAC ST-LOUIS—CANAL SOULANGES, ENTRÉE D'AVAL—FEU SUR LA JETÉE SUD SUPPRIMÉ.

EDWARD the SEVENTH, by the Grace of God, of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas King, Defender of the Faith, Emperor of India.

To all to whom these presents shall come, or whom the same may in anywise concern,—Greeting :

A PROCLAMATION.

E. L. NEWCOMBE,
Deputy of the Minister of
Justice, Canada.

WHEREAS in view of the facts that the Culbute Canal locks on the Ottawa River were much decayed and that in order to make them permanently effective considerable cost would have been entailed, while, on the other hand, the traffic was of inconsiderable extent, the railway facilities having greatly lessened the anticipated usefulness of the works, it was decided in the year 1889 to abandon the idea of maintaining the waters of the river at an artificial height, and an Order in Council was passed on the twenty-fourth day of October in that year to the effect that the river should be allowed to resume its natural level ;

And whereas it is deemed expedient that public notice should be given of the abandonment of the said works and the dams, that is to say ; *The Culbute Locks and Dams*, being two combined locks constructed and situated on the North Channel of the River at L'Islet, on the north side of the Allumette Island with the submerged dam between L'Islet and the north shore of Allumette Island said works being located in the Township of Chichester, Range II ;

The Chapeau Bridge consisting of a highway bridge built across the Culbute Channel at the Chapeau, Rapids between Chapeau Village, Allumette Island and the said Township of Chichester ;

The works between Calumet Falls and the Culbute Canal consisting of two submerged dams, one at the Grand Calumet Channel and the other at the Flat Rapid on the Rocher Fendu channel, between the south shore of Calumet Island and a small Island in the south channel of the Ottawa River ;

And other works associated therewith.

Now Know Ye that We, by and with the advice of our Privy Council for Canada, do, by this Our proclamation, proclaim and declare that the said Culbute Canal and the locks, dams and other works associated therewith have been and the same are hereby abandoned as public works of Canada.

Of all which Our loving subjects and all others whom these presents may concern, are hereby required to take notice and to govern themselves accordingly.

In Testimony whereof, We have caused these Our Letters to be made Patent and the Great Seal of Canada to be hereunto affixed. Witness, Our Right Trusty and Right Well-beloved Cousin and Councillor the Right Honourable Sir Gilbert John Elliot, Earl of Minto and Viscount Melgund of Melgund, County of Forfar, in the Peerage of the United Kingdom, Baron Minto of Minto, County of Roxburgh, in the Peerage of Great Britain, Baronet of Nova Scotia, Knight Grand Cross of Our Most Distinguished Order of Saint Michael and Saint George, etc., etc., Governor General of Canada.

At Our Government House, in Our City of OTTAWA, this TWELTH day of MARCH, in the year of Our Lord one thousand nine hundred and four, and in the fourth year of Our Reign.

By Command,

AT THE GOVERNMENT HOUSE AT OTTAWA.

Thursday, the 26th day of April, 1904.

PRESENT:

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 6th April, 1904, from the Minister of the Interior, stating that Captain Henry Havelock Norwood, of Dawson, has applied to the Department of the Interior for the right to take, carry away and divert 3,000 miner's inches of the unentered and unappropriated water of Bonanza Creek during a period of twenty-five years, with the object of using the same in connection with mining operations or for selling or leasing such water to the owners or lessees of mining property, the water to be stored in a reservoir created by the erection of a dam at or below the junction of Carmack's Fork with Bonanza Creek, in the Yukon Territory.

The Minister observes that by an Order in Council dated the 3rd of August, 1898, provision is made for the disposal of the right to divert and use the water from any stream or lake, and the right of way through and entry upon any mining ground for the purpose of constructing ditches and flumes to convey such water for mining purposes, in the Yukon Territory ; and by an Order in Council dated the 7th of December, 1901, the right of the owner of a water privilege to dispose of the water included in his grant was rescinded.

The Minister recommends, as the portions of the territory upon which the applicant in this case desires to distribute the water for which he has applied, have not a sufficient water supply to work the gold bearing areas thereof during the greater part of the year, that he be authorized to permit Captain Norwood to construct a reservoir at the point indicated and to store, divert, distribute and dispose of the above quantity of the unentered and unappropriated water of Bonanza Creek for a period of twenty-five years for use in connection with mining operations, upon the following terms and conditions :—

1. That the applicant's right to store, divert, distribute and dispose of water from Bonanza Creek shall be confined to the unentered and unappropriated water only, the in-take and out-take of water to be measured in a manner satisfactory to the Government Mining Engineer, so as to ensure that the applicant reserves and diverts the waste waters only, which in the spring and autumn of the year would otherwise be allowed to escape.

2. That before the construction of the dam be commenced the applicant shall secure the ownership of all claims in good standing, the operations on which would be interfered with by reason of the construction of the dam and the storing of the water.

3. That the applicant shall within one year from this date furnish proof through and by the Government Mining Engineer to the satisfaction of the Minister of the Interior, that he has expended not less than $5,000 in the actual construction of the works necessary for the storage of the water. He shall also prosecute the construction of his water scheme with reasonable diligence to the satisfaction of the Minister of the Interior and shall complete all the works necessary for the storage and diversion of the quantity of water applied for not later than the 1st day of June, 1907.

4. That a weir shall be constructed above the dam to measure the water flowing into the reservoir and one at the dam to measure the water flowing from such reservoir.

5. That the price to be charged for the water shall be fixed and controlled by the Governor General in Council.

6. That permission to store water shall not be given until a certificate issued by the Government Mining Engineer to the effect that he is satisfied as to the safety of the dam constructed, and the holder of this water right shall at all times be responsible for any damage or loss which may be occasioned by any leak, break, or imperfection in any part of the works and he shall grant suitable indemnity to the satisfaction of the Minister of the Interior for any such damage or

loss which may be occasioned by any leak, break or imperfection in any part of the works and he shall grant suitable indemnity to the satisfaction of the Minister of the Interior for any such damage or loss.

7. That if at the end of one year from this date the applicant has not succeeded in obtaining control of all the mining claims in good standing, the operations on which would be interfered with by the backing up of the water, the right granted him to store and divert water shall be cancelled.

8. That should any portion of the Government road along Bonanza Creek, be submerged by reason of the storage of water, the applicant shall be required to divert and build such road at a higher point, to the satisfaction of the Minister of Public Works.

9. That this grant shall be subject to the rights of such miners as are working on the stream above or below the dam or ditch-head, or of any other persons lawfully using the waters of Bonanza Creek for any purpose whatsoever.

The Minister further recommends that the present Order in Council shall come into force sixty days after its first insertion in "The Yukon Official Gazette," unless otherwise ordered by the Governor General in Council within that period.

The Committee submit the same for approval.

JOHN J. McGEE,
Clerk of the Privy Council.

AT THE GOVERNMENT HOUSE AT OTTAWA.

Wednesday, the 23rd day of March, 1904.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

WHEREAS under the Regulations for the disposal of coal lands, the property of the Dominion Government in Manitoba, the North-west Territories and British Columbia, established by Order in Council, dated 19th May, 1902, provision is made for the sale of lands containing anthracite coal at an upset price of $20.00 an acre, and for coal other than anthracite at an upset price of $19.00 an acre, subject to the payment of royalty at the rate of ten cents per ton of 2,000 pounds on the output of the mine ;

And whereas it is represented that settlers in the vicinity of coal mines have in the past been able to secure their supply of coal for fuel purposes at the rate of from $1.00 to $1.50 per ton, delivered at the pit's mouth ; but that recently, where only a limited number of mines are being operated in any locality, there has been a tendency on the part of the mine owner to object to this class of trade, as loading the coal directly into cars is probably more convenient for him then disposing of it to the settler ;

And whereas there appears to be no reason why the settlers should be required to pay an additional price for having the coal carried by rail to the nearest station if they can have the hauling done themselves,—

Therefore, the Governor General in Council is pleased to order and doth hereby order that the Regulations for the disposal of coal lands above referred to be amended by providing that all sales of such lands shall in the future be made subject to the provision that actual settlers shall be entitled to buy, at the pit's mouth, whatever coal they may require for their own use, but not for barter or sale, at a price not to exceed $1.75 per ton, and that the patent which may be issued for coal lands shall be made subject to such provision.

JOHN J. McGEE,
Clerk of the Privy Council.

He was accompanied by the astronomer Seeberg and two Jakoots: Vassily Gorokhov, with the surname Chichak, and Nicolas Protodiakonow, with the surname Omook. The party seems to have been carried away by the ice.

As the researches hitherto made have been in vain a reward of five thousand (5000) roubles is offered by the Academy of Sciences for finding the whole expedition, or any part of it, and a reward of two thousand five hundred (2500) roubles for giving the first exact indications of tracing the party.

NOTICE TO MARINERS.

GOVERNMENT RIFLE RANGES, MCNAB'S ISLAND.

Owing to the extreme range of the Lee-Metford or Magazine Rifle, with which the musketry training of the troops will in future be conducted, and with a view to the better protection of the public, it has been found necessary to demarcate more clearly the area of water seawards, and to the south of above ranges, liable to be struck by spent or ricochet bullets. This area has been marked by four spar buoys, placed at intervals between the Thrum Cap Shoal and the Eastern Passage, at a distance of three thousand yards from the stop butts. The buoys mark the extreme limits of the danger zone. The spars are painted red, and are surmounted by cross heads painted red and white.

Notice is therefore hereby given that any ship or boat passing inside these buoys, during the hours of practice, incurs serious risk, and no attempt should, under any circumstances, be made to cross the aforesaid area as long as the red flag hoisted at the south end of McNab's Island is left flying.

This notice will have effect from the 2nd May, 1904.

PROCLAMATION.

E. L. NEWCOMBE,
Sous-ministre de la Justice,
Canada.

CONSIDÉRANT que vu l'état de délabrement des travaux appelés écluses du canal de la Culbute, et considérant que pour les mettre en état permanent d'utilité il aurait fallu encourir de grands frais, tandis que d'un autre côté le trafic était insignifiant, les communications par chemins de fer ayant grandement amoindri l'utilité anticipée des travaux, il a été décidé en l'année 1889 d'abandonner l'idée de maintenir les eaux de la rivière à une hauteur artificielle, et un arrêté en conseil a été passé le vingt-quatrième jour d'octobre de la dite année à l'effet de laisser la rivière reprendre son niveau naturel.

Et considérant qu'il a été jugé à propos qu'un avis soit donné au public de l'abandon des dits travaux et barrages, savoir, les *écluses et barrages de la Culbute*, étant deux écluses combinées construites et situées sur le chenal nord de la rivière à L'Islet, sur le côté nord de l'île aux Allumettes, avec le barrage submergé entre L'Islet et la rive nord de l'île aux Allumettes, les dits travaux étant situés dans le township de Chichester, rang II ;

Le *pont de Chapeau* consistant en un pont de grand chemin construit sur le chenal de la Culbute aux rapides de Chapeau, entre le village Chapeau, île des Allumettes, et le dit township de Chichester ;

Les *travaux entre les chutes du Calumet et le Canal de la Culbute*, consistant de deux barrages submergés, un au chenal du Grand Calumet et l'autre au rapide Plat sur le chenal du Rocher Fendu, entre la rive sud de l'île du Calumet et une petite île dans le chenal sud de la rivière Ottawa.

Et autres travaux s'y rattachant.

Sachez donc que par et avec l'avis de notre Conseil privé pour le Canada, par Notre présente proclamation, Nous proclamons et déclarons que le dit canal de la Culbute et les écluses, barrages et autres travaux s'y rattachant, ont été et ils sont par le présent abandonnés comme travaux publics du Canada.

De ce qui précède Nos féaux sujets et tous ceux que les présentes peuvent concerner, sont par les présentes requis d'en prendre avis et d'agir en conséquence.

En foi de quoi, Nous avons fait émettre nos présentes Lettres Patentes, et à icelles fait apposer le Grand Sceau du Canada. **Témoin**, Notre Très fidèle et Bien-aimé Cousin et Conseiller le Très honorable Sir **Gilbert John Elliot**, Comte de Minto et Vicomte Melgund de Melgund, comté de Forfar, dans la pairie du Royaume-Uni, Baron Minto de Minto, comté de Roxburgh, dans la pairie de la Grande-Bretagne, Baronnet de la Nouvelle-Ecosse, Chevalier Grand-croix de Notre Ordre Très distingué de Saint-Michel et Saint-George, etc., etc., Gouverneur Général du Canada.

A Notre Hôtel du Gouvernement, en Notre cité d'OTTAWA, ce DOUZIÈME jour de MARS, dans l'année de Notre-Seigneur mil neuf cent quatre, et de Notre Règne la quatrième.

Par ordre,

Sous-Secrétaire d'Etat.

AVIS DU GOUVERNEMENT.

SECRÉTARIAT D'ÉTAT DU CANADA.

AVIS est donné par le présent que l'Académie Impériale des Sciences à St-Pétersbourg offre une récompense pour tout renseignement qui tendra à la découverte de l'Expédition polaire du baron Toll.

Le baron Edward Toll, chef de l'Expédition polaire envoyée par l'Académie des Sciences, quitta l'île Bennett, sise au nord de la Nouvelle Sibérie, le 26 octobre (8 novembre) 1902, prenant une direction sud. Il était accompagné par l'astronome Seeberg et deux Jakoots : Vassily Gorokhov, surnommé Chichak, et Nicolas Protodiakonow, surnommé Omook. Le parti semble avoir été entraîné par la glace.

Vu que jusqu'à présent les recherches ont été vaines, une récompense de cinq mille (5000) roubles est offerte par l'Académie des Sciences pour trouver l'expédition en tout ou en partie, et une récompense de deux mille cinq cents (2500) roubles pour donner les premières indications exactes des traces du parti.

(*Avis de l'Intérieur No.* 4.)

DIVISION DES PHARES D'ONTARIO.

(51) Fleuve St-Laurent en haut de Montréal—Lac St-Louis—Canal Soulanges, entrée d'aval—Feu sur la jetée sud supprimé.

A compter de l'ouverture de la navigation en 1904, le feu blanc à gaz à occultations montré d'une lanterne sur une charpente à jour en acier sur l'extrémité est de la jetée sud à l'entrée d'aval du canal Soulanges ne sera plus entretenu, et la structure sera démolie, vu que l'établissement de bouées à gaz et de feux d'alignement sur la jetée nord rendent ce feu inutile.

(60) FLEUVE ST-LAURENT EN HAUT DE QUÉBEC—ALIGNEMENT DE LA POINTE À BASILE—TOUR POUR LE FEU POSTÉRIEUR.

Le feu postérieur de l'alignement de la Pointe à Basile, qui indique l'axe du chenal des navires depuis le voisinage du Cap Rouge jusqu'à son intersection avec l'alignement d'aval de St-Antoine, sera dorénavant montré d'une tour érigée à l'endroit autrefois occupé par le hangar temporaire d'où le feu était préalablement montré et par la balise de jour, qui sont démolis tous deux.

La tour est un bâtiment en bois, carré, avec côtés en pente, peinturé en blanc, surmonté d'une lanterne en bois, peinturée en rouge. La hauteur de la tour de sa base à la girouette est de 25 pieds.

AT THE GOVERNMENT HOUSE AT OTTAWA.

Thursday, the 26th day of April, 1904.

PRESENT:

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 6th April, 1904, from the Minister of the Interior, stating that Captain Henry Havelock Norwood, of Dawson, has applied to the Department of the Interior for the right to take, carry away and divert 3,000 miner's inches of the unentered and unappropriated water of Bonanza Creek during a period of twenty-five years, with the object of using the same in connection with mining operations or for selling or leasing such water to the owners or lessees of mining property, the water to be stored in a reservoir created by the erection of a dam at or below the junction of Carmack's Fork with Bonanza Creek, in the Yukon Territory.

The Minister observes that by an Order in Council dated the 3rd of August, 1898, provision is made for the disposal of the right to divert and use the water from any stream or lake, and the right of way through and entry upon any mining ground for the purpose of constructing ditches and flumes to convey such water for mining purposes, in the Yukon Territory; and by an Order in Council dated the 7th of December, 1901, the right of the owner of a water privilege to dispose of the water included in his grant was rescinded.

The Minister recommends, as the portions of the territory upon which the applicant in this case desires to distribute the water for which he has applied, have not a sufficient water supply to work the gold bearing areas thereof during the greater part of the year, that he be authorized to permit Captain Norwood to construct a reservoir at the point indicated and to store, divert, distribute and dispose of the above quantity of the unentered and unappropriated water of Bonanza Creek for a period of twenty-five years for use in connection with mining operations, upon the following terms and conditions:—

1. That the applicant's right to store, divert, distribute and dispose of water from Bonanza Creek shall

be confined to the unentered and unappropriated water only, the in-take and out-take of water to be measured in a manner satisfactory to the Government Mining Engineer, so as to ensure that the applicant reserves and diverts the waste waters only, which in the spring and autumn of the year would otherwise be allowed to escape.

2. That before the construction of the dam be commenced the applicant shall secure the ownership of all claims in good standing, the operations on which would be interfered with by reason of the construction of the dam and the storing of the water.

3. That the applicant shall within one year from this date furnish proof through and by the Government Mining Engineer to the satisfaction of the Minister of the Interior, that he has expended not less than $5,000 in the actual construction of the works necessary for the storage of the water. He shall also prosecute the construction of his water scheme with reasonable diligence to the satisfaction of the Minister of the Interior and shall complete all the works necessary for the storage and diversion of the quantity of water applied for not later than the 1st day of June, 1907.

4. That a weir shall be constructed above the dam to measure the water flowing into the reservoir and one at the dam to measure the water flowing from such reservoir.

5. That the price to be charged for the water shall be fixed and controlled by the Governor General in Council.

6. That permission to store water shall not be given until a certificate issued by the Government Mining Engineer to the effect that he is satisfied as to the safety of the dam constructed, and the holder of this water right shall at all times be responsible for any damage or loss which may be occasioned by any leak, break, or imperfection in any part of the works and he shall grant suitable indemnity to the satisfaction of the Minister of the Interior for any such damage or loss which may be occasioned by any leak, break or imperfection in any part of the works and he shall grant suitable indemnity to the satisfaction of the Minister of the Interior for any such damage or loss.

7. That if at the end of one year from this date the applicant has not succeeded in obtaining control of all the mining claims in good standing, the operations on which would be interfered with by the backing up of the water, the right granted him to store and divert water shall be cancelled.

8. That should any portion of the Government road along Bonanza Creek, be submerged by reason of the storage of water, the applicant shall be required to divert and build such road at a higher point, to the satisfaction of the Minister of Public Works.

9. That this grant shall be subject to the rights of such miners as are working on the stream above or below the dam or ditch-head, or of any other persons lawfully using the waters of Bonanza Creek for any purpose whatsoever.

The Minister further recommends that the present Order in Council shall come into force sixty days after its first insertion in "The Yukon Official Gazette," unless otherwise ordered by the Governor General in Council within that period.

The Committee submit the same for approval.

JOHN J. McGEE,
Clerk of the Privy Council.

QUEBEC.

(75) RIVER ST. LAWRENCE—SHIP CHANNEL BETWEEN QUEBEC AND MONTREAL—GRONDINES—CHANGES IN AIDS TO NAVIGATION.

The lights and beacons maintained at Grondines have been re-arranged to mark the axis of the improved ship channel, and on the opening of navigation this spring, the new arrangement will be put in operation, as follows :

1. *Old range lights discontinued.*—The old range lights at Grondines heretofore maintained will be discontinued and the buildings removed. These are the lights entered in the List of Lights under Nos. 1285 and 1826.

2. *Grondines point range lights.*—The axis of the cut dredged through Batture Cap à la Roche, immediately above Cap à la Roche, will be marked by a range of lights to be known as Grondines point range lights.

The front light is shown from a tower standing on a concrete pier, built where the low beacon of Grondines point day beacons formerly stood.

Lat. N. 46° 34′ 44″
Long. W. 72 4 22

The tower is an open steel skeleton frame, square in plan, with sloping sides, surmounted by a square, galvanized iron lantern, the whole painted red. The pier is whitewashed. The tower is 29 feet high from the pier to the ventilator on the lantern.

The back light is shown from the tower heretofore used as a day beacon on the extremity of Grondines point, east of Grondines village church and close to an old stone windmill ; it is also 8,300 feet N. 84° E. from the front tower.

It is an enclosed wooden structure, square in plan, with sloping sides, surmounted by a square, wooden lantern, the whole painted white. It is 61 feet high from its base to the ventilator on the lantern.

The light is a fixed white light, elevated 66 feet above the level of the river, and should be visible 8 miles in the line of range. The illuminating apparatus is catoptric.

This light should be inserted in the List of Lights as No. 1,284.

3. *Grondines upper range.*—The axis of the cut dredged through Batture des Belles Filles, opposite Cap Levraut, will be marked by range lights shown from towers replacing the day beacons formerly marking the same alignment. These lighthouses will be known as Grondines upper range.

The front tower stands on the site of the low beacon, about 2½ miles above the Grondines point back light.

Lat. N. 46° 35′ 9″
Long. W. 72 6 16

The back tower stands on the site of the high beacon, 6,800 feet N. 62° E. from the front light. It is an enclosed wooden structure, square in plan, with sloping sides, surmounted by a square, wooden lantern, the whole painted white. It is 40 feet high from its base to the ventilator on the lantern.

The light is a fixed white light, elevated 68 feet above the level of the river, and should be visible 9 miles in the line of range. The illuminating apparatus is catoptric. This light should be inserted in the List of Lights as No. 1,286.

4. *Sailing directions.*—Upward bound vessels leave the alignment of Ste. Emélie range lights and take that of the Grondines point range lights at Cap à la Roche bend, taking the turn after passing buoys 87Q and 88Q and completing it before reaching buoys 91Q and 92Q. They keep the alignment of Grondines point lights until they have passed buoy 97Q, when they gradually swing into the alignment of Grondines upper range lights. There is a wide channel at this bend. The Grondines upper range lights must be kept in one until Bastican range lights are coming on, the turn being made opposite buoy No. 110Q. Care must be taken not to overrun the alignment of the Bastican lights. N. to M. No. 30 (75) 28-4-04.

UNITED STATES OF AMERICA.

(78) Lake Erie — Conneaut — Wreck.

On 11th March, 1904, the car ferry "Shenango," operating between Conneaut and Canadian ports, was destroyed by fire while lying about 1,000 feet outside of the piers, fast in the ice. The vessel burned to the water's edge and then, after several hours, sank to the bottom with twenty-six empty steel gondola cars aboard.

A red spar buoy has been placed marking the eastern limit of the wreck. The buoy stands 6 feet out of water, is on the range of the west pier lights, and is lighted at night with a *red* lantern. Vessels will clear the wreck by keeping to the eastward of the buoy.

(79) Lake Erie—Fairport—Hydrographic information — Wrecks.

The entrance to Fairport harbour is almost completely cut off by a narrow bar across the channel 1,000 feet beyond the ends of the piers, on which the depth is but 9 feet. Small vessels drawing not to exceed 12 feet can enter the harbour by keeping in a line 50 feet west of the west pier.

Arrangements have been completed for dredging at Fairport, and it is expected to have a channel cut through the bar by 15th April.

The wreck of the yacht "Idler" lies 300 feet north of the end of the west pier and projects 60 feet into the channel.

The wreck of the tug "McCormick" lies 250 feet northeast of the light on the east pier, and a canal boat wreck lies between the "McCormick" and the light.

(80) Lake Erie — Cleveland harbour — Hydrographic information — Caution.

A depth of 21 feet at mean stage is available in the channel between the main entrance and the Lake Shore railway bridge. The January freshet caused a general shoaling in the outer harbour, and a depth not to exceed 18 feet at mean stage is available for vessels entering the east basin and 15 feet for vessels entering the west basin.

The piles and buoys marking the location of the works in progress at the main entrance and at the east end of the harbour in the prolongation of the east breakwater have all been carried away. These works are dangerous obstructions, and vessels using the main entrance should keep in the prolongation of the jettied channel for at least 1,500 feet beyond the breakwater. The works at the east end extend 3,500 feet eastward in the prolongation of the existing structure. All of the usual piles, buoys and lights will be set to mark these works during April.

(81) Lake Erie — Lorain harbour — Hydrographic information.

The January freshet caused a general shoaling in the jettied channel between the range light and the shore end of the east pier. Over this area the available depth at mean stage is 17 feet, 150 feet out from the ore dock 18·5 feet at 100 feet, and 20 feet at 50 feet. Beyond the range light the depth is not less than 20 feet in the usual track of vessels.

The wreck of the fish tug "Louisa" lies alongside of the west pier at the outer light, with 12 feet of water over her. There is a dangerous lump in the channel 300 feet south and 175 feet east of the range light, on which the depth is 14 feet. A stake boat sunk during the January freshet has not yet been located and may be somewhere in the channel.

All of the piles and buoys marking the location of the construction works beyond the end of the piers have been carried away and these works form dangerous obstructions. All vessels entering or leaving the harbour should keep in the prolongation of the jettied channel for ½ mile beyond the outer light.

The superstructure of the east pier extends out 200 feet beyond the end of the completed work. The end of this work is not marked. All of the usual piles and buoys to mark the work under construction will probably be set during April.

(82) Lake Erie — Toledo harbour approach — Maumee straight channel and river — Buoys moved.

On the opening of navigation, 1904, Maumee straight channel inner gas buoy No. 34, moored in 15 feet of water, on the northwestern side of the inner end of the straight channel in Maumee bay, western end of Lake Erie, will be moved about 400 feet northeastward to indicate the new angle in the channel made by cutting away the northwestern bank.

Also the Middle Ground buoy No. 38, a red 25-foot spar, located at the upper end and outer edge of the Middle Ground, Maumee river, will be moved about 800 feet up the river to indicate the new angle in the channel of Maumee river, made by recent widening.

NOTICE TO MARINERS.

Government Rifle Ranges, McNab's Island.

Owing to the extreme range of the Lee-Metford or Magazine Rifle, with which the musketry training of the troops will in future be conducted, and with a view to the better protection of the public, it has been found necessary to demarcate more clearly the area of water seawards, and to the south of above ranges, liable to be struck by spent or ricochet bullets.

This area has been marked by four spar buoys, placed at intervals between the Thrum Cap Shoal and the Eastern Passage, at a distance of three thousand yards from the stop butts. The buoys mark the extreme limits of the danger zone. The spars are painted red, and are surmounted by cross heads painted red and white.

Notice is therefore hereby given that any ship or boat passing inside these buoys, during the hours of practice, incurs serious risk, and no attempt should, under any circumstances, be made to cross the aforesaid area as long as the red flag hoisted at the south end of McNab's Island is left flying.

This notice will have effect from the 2nd May, 1904.

By order,

H. M. BIDDULPH,
Major, D.A.A. General.

AVIS DU GOUVERNEMENT.

SECRÉTARIAT D'ÉTAT DU CANADA.

AVIS est donné par le présent que l'Académie Impériale des Sciences à St-Pétersbourg offre une récompense pour tout renseignement qui tendra à la découverte de l'Expédition polaire du baron Toll.

Le baron Edward Toll, chef de l'Expédition polaire envoyée par l'Académie des Sciences, quitta l'île Bennett, sise au nord de la Nouvelle Sibérie, le 26 octobre (8 novembre) 1902, prenant une direction sud. Il était accompagné par l'astronome Seeberg et deux Jakoots : Vassily Gorokhov, surnommé Chichak, et Nicolas Protodiakonow, surnommé Omook. Le parti semble avoir été entraîné par la glace.

Vu que jusqu'à présent les recherches ont été vaines, une récompense de cinq mille (5000) roubles est offerte par l'Académie des Sciences pour trouver l'expédition en tout ou en partie, et une récompense de deux mille cinq cents (2500) roubles pour donner les premières indications exactes des traces du parti.

QUÉBEC.

(75) FLEUVE ST-LAURENT—CHENAL DES NAVIRES ENTRE QUÉBEC ET MONTRÉAL—GRONDINES—CHANGEMENTS DANS LES AIDES À LA NAVIGATION.

Les feux et balises entretenus aux Grondines ont été ré-arrangés pour marquer l'axe du chenal des navires amélioré, et à l'ouverture de la navigation, ce printemps, le nouvel arrangement sera mis en fonctionnement, comme suit :—

1. *Vieux feux d'alignement supprimés.*—Les vieux feux d'alignement aux Grondines jusqu'à présent entretenus seront supprimés, et les bâtiments démolis. Ce sont les feux inscrits dans la Liste des phares sous les numéros 1285 et 1286.

2. *Feux d'alignement de la pointe des Grondines.*—L'axe de la tranchée draguée dans la batture du Cap à la Roche, immédiatement en amont du Cap à la Roche, sera marqué par un alignement de feux qui seront appelés feux d'alignement de la pointe des Grondines.

Le feu antérieur est montré d'une tour reposant sur une pile en béton, construite là où se trouvait autrefois la balise d'aval des balises de jour de la pointe aux Grondines.

Lat.	N.	46°	34′	44″
Long.	O.	72	4	19

La tour est une charpente en acier, de forme carrée, avec côtés en pente, surmontée d'une lanterne carrée en fer galvanisé, le tout peinturé en rouge. La pile est blanchie à la chaux. La tour est à 29 pieds de hauteur depuis la pile jusqu'au ventilateur sur la lanterne.

Le feu est blanc fixe, à 33 pieds au-dessus du fleuve, et devrait être visible à 7 milles dans l'alignement. L'appareil lumineux est catoptrique. Ce feu doit être inséré dans la Liste des phares comme numéro 1283.

Le feu postérieur est montré de la tour qui servait autrefois de balise de jour sur l'extrémité de la pointe des Grondines, à l'est de l'église du village des Grondines, et tout près d'un vieux moulin à vent en pierre; il est aussi à 8,300 pieds N. 84° E. de la tour antérieure.

C'est une structure en bois de forme carrée, avec côtés en pente, surmontée d'une lanterne carrée en bois, le tout peinturé en blanc. Elle a 61 pieds de hauteur depuis sa base jusqu'au ventilateur sur la lanterne.

Le feu est blanc fixe, à 66 pieds au-dessus du niveau du fleuve, et devrait être visible à 8 milles dans l'alignement. L'appareil lumineux est catoptrique.

Ce feu devra être inséré dans la Liste des phares comme numéro 1284.

3. *Alignement supérieur des Grondines.*—L'axe de la tranchée draguée dans la batture des Belles Filles, vis-à-vis le Cap Levraut, sera marqué par des feux d'alignement montrés de tours qui remplacent les balises de jour qui marquaient autrefois le même alignement. Ces phares seront appelés alignement supérieur des Grondines.

La tour antérieure repose sur l'emplacement de la balise basse, environ 2¼ milles en haut du feu postérieur de la pointe des Grondines.

Lat.	N.	46°	35′	9″

La tour postérieure repose sur l'emplacement de la balise haute, à 6,800 pieds N. 62° E. du feu antérieur. C'est une structure carrée en bois, avec côtés en pente, surmontée d'une lanterne carrée en bois, le tout peinturé en blanc. Elle a 40 pieds de hauteur depuis sa base jusqu'au ventilateur sur la lanterne.

Le feu est blanc fixe, à 68 pieds au-dessus du niveau du fleuve, et devrait être visible à 9 milles dans l'alignement. L'appareil lumineux et catoptrique. Ce feu doit être inscrit dans la Liste des phares comme numéro 1286.

4. *Route à suivre.*—Les vaisseaux qui remontent quittent l'alignement des feux de Ste-Émélie et prennent celui des feux de la pointe des Grondines à la courbe du Cap à la Roche, commençant le tour après avoir passé les bouées 87Q et 88Q, et le complétant avant d'atteindre les bouées 91Q et 92Q. Ils gardent l'alignement des feux de la pointe des Grondines jusqu'à ce qu'ils aient passé la bouée 97Q, alors ils arrivent graduellement dans l'alignement des feux d'alignement en haut des Grondines. A cette courbe le chenal est large. Les feux d'alignement en haut des Grondines doivent être tenus en conjonction jusqu'à ce que les feux d'alignement de Bastiscan soient en vue, le tour étant fait vis-à-vis la bouée numéro 110Q. Il faut veiller à ne pas dépasser l'alignement des feux de Batiscan.

L'époux qui a l'intention de demander un bill de divorce doit faire connaître cette intention, ainsi que les noms de l'autre époux et la cause du divorce, par avis inséré durant six mois avant la présentation de sa pétition pour obtenir le bill, dans la *Gazette du Canada* et dans deux journaux du district où il avait sa résidence habituelle à l'époque de séparation d'avec son conjoint, s'il résidait alors dans la province de Québec, le Manitoba, la Colombie Britannique, ou les Territoires du Nord-Ouest,—ou du comté ou des comtés-unis, s'il résidait dans une autre province ; mais si ce nombre de journaux ne s'y trouve pas, l'avis sera publié dans le district, le comté ou les comtés-unis voisins. Dans les provinces de Québec et de Manitoba, les insertions seront faites dans un journal anglais et un journal français, s'il en existe des deux langues dans le district : autrement, elles se feront en anglais et en français au même journal.

Il doit être signifié, à la diligence de l'époux pétitionnaire, un mois au moins avant la présentation de la pétition, une copie de cet avis à l'autre époux en personne, si cela est possible.

Les allégations de la pétition seront appuyées de la déclaration du pétitionnaire faite en vertu de "l'Acte de la preuve en Canada, 1893."

Huit jours avant l'ouverture du Parlement, le pétitionnaire déposera au bureau du greffier du Sénat, une copie en langue anglaise ou française du bill de divorce qui doit être présenté, et en même temps une somme suffisante pour payer la traduction et l'impression et tirage à 600 exemplaires anglais et 200 exemplaires français de ce bill.

La pétition en obtention d'un bill de divorce n'est présentée que lorsque le pétitionnaire a versé au bureau du greffier du Sénat une somme de $200.

La pétition, au moment de sa présentation, doit être accompagnée de la preuve de la publication d'avis, d'une déclaration qu'il a été signifié une copie de l'avis, et d'une copie du bill qui doit être présenté.

ORDERS IN COUNCIL.

[Ref. 462,029.]

AT THE GOVERNMENT HOUSE AT OTTAWA.

Tuesday, the 26th day of April, 1904.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 6th April, 1904, from the Minister of the Interior, stating that on the 17th day of October, 1903, the Mining Recorder at Dawson granted to Mrs. Ellen Acklen and Mr. Douglas S. Mackenzie the right to divert 5,000 miner's inches of the unentered and unappropriated waters of the Left Fork of Twelve Mile River, a tributary of the Yukon River, for use on certain placer mining claims situated on the Right Limit of the Klondike River near its mouth, in accordance with the provisions of the Regulations for the diversion and use of water in the Yukon Territory, established by the Order in Council of the 3rd day of August, 1898.

The Minister observes that by an Order in Council dated the 7th of December, 1901, the right of the owner of a ditch or water privilege to dispose of the water covered by his grant was rescinded, but the grantees in this case have applied for the right to sell whatever quantity of the water included in their grant may not be required for working the claims to which the said grant is appurtenant and the Government Mining Engineer has recommended that this application be granted upon certain terms and conditions, which recommendation has been approved by the Commissioner of the Yukon Territory.

The Minister recommends, as portions of the territory upon which the applicants desire to distribute a portion of the water included in this grant, namely, Bonanza, Bear and Hunker Creeks, have not a sufficient water supply to work the gold-bearing areas thereof during the greater part of the year, that he be authorized to permit the applicants in this case to sell and distribute for mining purposes on Bonanza, Bear and Hunker Creeks and their several tributaries, the water to which they are entitled under the above grant, upon the following terms and conditions :—

1. That within one year from the date upon which the grant was made the grantees shall expend on the work required for the diversion of the water not less than $5,000.00 and shall satisfy the Minister of the Interior through and by the Government Mining Engineer, that not less than this amount has been expended in *bona fide* construction work in connection with their grant.

2. That the grantees shall prosecute the construction of their water scheme with reasonable diligence to the satisfaction of the Minister of the Interior, and shall complete all the works necessary for the diversion of the full amount of 5,000 miner's inches not later than the 17th day of October, 1907.

3. That the price to be charged for the water which the grantees may be permitted to dispose of shall be at a rate to be fixed by the Governor General in Council, the grantees, however, not to be compelled to make, at their own expense, connections for the delivery of water from the main pipe to any claim or claims, the owners of which may wish to be supplied with water for mining purposes from their works.

4. That if the grantees fail to comply with any of the terms and conditions above provided, of which failure the Minister of the Interior shall be the sole and final judge, their right to dispose of any portion of the water included in their grant will immediately be cancelled.

The Minister further recommends that the present Order in Council shall come into force sixty days after its first insertion in "The Yukon Official Gazette" unless otherwise ordered by the Governor General in Council within that period.

The Committee submit the same for approval.

JOHN J. McGEE,
48–4 Clerk of the Privy Council.

AT THE GOVERNMENT HOUSE AT OTTAWA.

Saturday, the 21st day of May, 1904.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

Therefore the Governor General in Council is pleased to order that section 4 of the Oyster Fishery Regulations established by Order in Council of the 28th December, 1893, as amended by the Order in Council of the 13th September, 1901, and section 6 of the Oyster Fishery Regulations of the 28th December, 1893, shall be and the same are hereby rescinded, and the following substituted therefor :—

"4. Oysters shall not be fished for, caught, killed, "bought, sold or had in possession, from the 21st day "of May to the 22nd day of September in each year, "both days inclusive :—Provided that this prohibi"tion shall come into force in Richmond Bay, Prince "Edward Island on the 21st day of May, 1904, and "elsewhere on the 21st day of May, 1905."

"6. No person shall fish for, catch, kill or buy, sell "or have in possession any round oysters of a less "size than three inches in diameter of shell, nor any "long oysters measuring less than three and a half "inches of outer shell.

"Round oysters of a less size than three inches in "diameter, and long oysters measuring less than three "and a half inches on the outer shell, and that may "be accidentally caught, shall be returned to the "water alive, at the cost and risk of the person so "fishing, on whom, in every case, shall devolve the "proof of actual liberation.

"Provided always that persons holding fishery "licences, may obtain from the Minister of Marine "and Fisheries, permission to fish for and catch small "oysters for the purpose of planting or stocking "oyster beds."

JOHN J. McGEE,
48 3 Clerk of the Privy Council.

AT THE GOVERNMENT HOUSE AT OTTAWA

Monday, the 16th day of May, 1904.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

WHEREAS it is deemed advisable to consolidate the Rules and Regulations relative to the exportation of Live Stock from Canada to Europe and the different amendments thereto,—

Therefore the Governor General in Council is pleased in virtue of the provisions of section 3 of chapter 36 of the Act 54–55 Victoria, "The Live Stock Shipping Act," to make and doth hereby make the annexed Rules and Regulations for governing the Exportation of Live Stock from Canada to Europe.

The Governor General in Council is further pleased to order that all previous Rules and Regulations and Orders in Council prescribing them for such exportation of Live Stock, be cancelled.

JOHN J. McGEE,
Clerk of the Privy Council.

REGULATIONS RESPECTING THE SHIPPING OF LIVE STOCK FROM CANADA.

Pursuant to the authority vested in the Governor in Council by the third section of the Act respecting the shipping of Live Stock, 54-55 Victoria, chapter 36, intituled "An Act respecting the shipping of Live Stock," the following regulations are prescribed for ships engaged in the transportation of live stock from any port or place in Canada to any port or place out of Canada, not being a port or place in the United States of America, or in Newfoundland, or in St. Pierre, or Miquelon, or in Bermuda, or in any of the West India Islands, or in Mexico, or in South America.

Interpretation:—The expression 'cattle' means bulls, oxen, cows and heifers one and two years old, and the expression 'horses' includes mares.

APPLICATION FOR INSPECTION.

No. 1. The master, owner, or agent of every ship intending to take on board live stock for transportation from Canada, shall, if such ship requires to be inspected under the provisions of the Act hereinbefore mentioned, apply for inspection in writing to the Inspector of the port at which the live stock is to be shipped, whereupon the Inspector will take the steps necessary to inspect the vessel, and determine whether she is a safe, seaworthy and suitable ship for the transportation of live stock on the voyage intended.

(2) If the Inspector approves of the vessel he should notify the owner, master or agent, that he may proceed to fit up the ship as required by these regulations, but if the vessel has been previously fitted for the transportation of live stock, in a manner not consistent with these regulations, the Inspector shall require compliance with these requirements in all respects before issuing his certificate.

(3) Live stock must not be carried on any part of the vessel where they will interfere with the proper management of the ship, or with the efficient working of the necessary boats, or with the requisite ventilation of the vessel.

CATTLE AND SHEEP.

Space.

No. 2. Fat cattle carried on the upper or spar deck must be given a space of 2 feet 6 inches clear in width, by 8 feet clear in length, and not less than 6 feet 3 inches in height each ; and in no case shall more than four head of cattle be allowed in each pen, except at the end of a row, where 5 cattle may be allowed together ; provided, however, that 5 cattle each 1,000 lbs. weight or under, commonly known as stockers, may be carried in a pen instead of 4 fat cattle, provided that when 5 stockers are carried in a pen instead of 4 fat cattle, the pen shall not be less than 10 feet 8 inches clear in width. Cows in calf are to be given the same space as fat cattle are given.

In ships fitted with permanent iron fittings with alley-ways not less than 3 feet in width, and fitted with approved and sufficient means of ventilation, fat cattle may be carried on the second deck in a space of 2 feet 6 inches in width, provided that no cattle are carried on the hatches. If cattle are carried on the hatches, the space for each animal in the compartment must be 2 feet 8 inches in width. Cattle carried on the third deck must in all cases have a space of 2 feet 8 inches in width.

(2) United States cattle shipped from any port in Canada, carried on the upper or spar deck must be allowed a space of 2 feet 6 inches in width by 8 feet in depth per head, but such United States cattle when so shipped between decks must be allowed a space of 2 feet 8 inches in width by 8 feet in depth, except in the case of regular cattle ships with satisfactory ventilation, which may fit with an allowance of 2 feet 6 inches in width. No more than four (4) head of cattle will be allowed in each pen, except at the end of a row where five may be allowed together. Provided, however, that cattle under 1,000 lbs. in weight may be allowed a width of 2 feet 3 inches.

(3) Pens for sheep shall not be less than 7 feet in height divided into two equal compartments, and not more than 8 or 10 sheep will be counted equal to one fat ox according to the discretion of the Inspector.

DECKS.

No. 3. Cattle shall not be carried on more than three decks ; and every deck on which cattle are carried must be provided with sufficient ventilation as hereinafter prescribed.

UPPER DECK FITTINGS.

No. 4. *Stanchions, Wooden.*—Stanchions must be of good sound spruce timber, not less than 3 by 5½ inches, placed at proper distances from centres, against ship's rail and secured to the rail by a hook of not less than ⅝-inch wrought iron with nut-screw. If the bulwarks are open, the foot of stanchions must be secured by filling pieces 2 x 3 inches placed outside of rail stanchions, to which the outside planking shall be nailed, and the whole secured by through bolts and nuts. A piece of 2 x 3 inches or 2-inch plank shall be fastened to outside of stanchion and run up to underneath rail to chock stanchion down. Outside stanchions shall extend up sufficient height to form stanchions for a hand-rail where necessary for the protection of the seamen. If the bulwarks are not open, the foot of the stanchion shall be secured by a bracing of 2 x 3-inch sound lumber from the back of each stanchion. Outside stanchions at top of pen shall be properly secured to fore and aft stringer beams or plate not less than 5½ x 2 inches. Inside stanchions must be placed directly in line without board stanchions, to be set up so that the 5½-inch way of the stanchions shall set fore and aft, and properly secured at top to fore and aft stringer beams or plates not less than 5½ x 2 inches, firmly secured at foot to deck and floorings to keep from lifting.

Stanchions, Iron —These may be used in place of wooden stanchions and should not be less than 2 inches in diameter, set in iron sockets above and below and fastened with nut and bolt.

Beams.—Beams or rafters must be of good sound lumber 2 x 6 inches, suitably placed, to run clear across the ship where practicable. Should any house or deck fittings be in the way, then butt up close to same. These beams shall be shouldered on the stanchions and made secure with chocks nailed or otherwise properly fastened to stanchions.

Angle Iron Frames.—Angle iron frames fitted from side to side on upper deck, 10 feet 8 inches apart, may be used instead of wooden stanchions and beams.

Head or Breast Boards.—Head-boards shall be not less than 1½ x 12 inches, of good sound lumber, and well secured on the pen side of the stanchions. A double stanchion to secure head-board shall be set up at each end of pen. A bolt of iron ⅝ inch in diameter shall pass through the double stanchions and head-board secured by a nut and screw. All head-boards shall have holes bored through them at proper distances, to tie the animals.

Foot-boards.—Foot-boards shall be of the same material as head-boards, properly nailed to stanchions on the inside of same.

Division Boards.—Division boards shall be of 1½ inch x 12-inch sound lumber, fitted perpendicularly and arranged so that they divide the animals into pens of four, or, at end of row into pens of five.

Flooring.—Flooring for the deck shall be of sound 1-inch boards laid fore and aft on scantlings 2 x 3 inches laid athwart ship on the deck at 18-inch centres, and the whole well secured. Where very heavy cattle are stalled thicker flooring should be used.

It is optional with the owners whether they use sheathing on their ship with wooden decks, or whether they secure the foot-locks to the decks, but iron decks must in all cases be sheathed. Cement may be used instead of wood sheathing with foot-locks moulded in the same.

Foot-locks.—Foot-locks shall be of good sound spruce or pine lumber, or hardwood, 1½ x 3 inches, laid fore and aft of ship, properly secured to sheathing or deck, placed 17, 16, 22 and 16 inches apart (the first one distant 17 inches from the trough), nailed when practicable with 4-inch nails through into deck strips and braced by similar locks placed athwart 18 inches apart and nailed through the deck strips.

Outside Planking.—All the outside planking on open and closed rail ships, must be properly laid fore and aft of ship and nailed to the backs of stanchions, and battened after the 1st November. Nothing less than 1¼-inch spruce or pine is to be used for this purpose.

Planking Roof of Shelter Deck to be Erected on Upper Deck.—The planks or boards to be nailed on this deck should be not less than 1-inch sound lumber 12 inches wide, laid on purlins, with 4 inches of space between the boards ; the space to be fitted with a block of 4 x 1 inch at back and front plates or stringers and at the purlins to give additional support to the second covering, which is to be of boards of the same dimensions, laid over the 4-inch openings of lower boarding.

UNDER DECK FITTING.

Stanchions. — Stanchions shall be of good sound spruce lumber not less than 3 x 5½ inches set up at proper distances from centres so that the 5¼-inch way of same shall stand fore and aft and jammed in tight between the two decks, properly braced on head and from side to side of ship ; this bracing shall be of 2 x 3-inch spruce or pine, and be properly butted against each stanchion. Where it is found impracticable to run these braces across ship, by reason of hatches, &c., coming in the way, then they shall be well braced from hatch coamings and from the obstruction which prevents running braces from side to side. The heads of these stanchions shall be braced fore and aft by 2 x 3-inch pieces well nailed on each stanchion and running fore and aft close up to the lower edge of the ship beams and butted at each end of compartment and against themselves, or chocked in underneath beam and well nailed to heads of stanchions. If upper and lower decks are wood then the stanchions set up between decks may be secured by well cleating to each deck by heads and heels of same.

Head or Breast Boards, Foot-boards, Division Boards Flooring and Foot-locks shall be of the same dimensions as those on the upper deck and fastened in the same manner, and shall have holes bored at proper distances to tie animals.

Troughs.—Suitable troughs whether on upper or under decks shall be formed on the foot-boards about 12 inches wide, when required. Troughs for sheep must be kept water-tight.

Casing for Steering Gear.—A suitable casing must be placed over the ship's steering gear when found necessary.

ALLEYWAYS.

Alleyways in front and between pens used for feeding and watering cattle must have a width of three feet, except at ends of alleyways in bow and stern of ship, and where obstructions, less than three feet in length, occur, the width may be reduced to a mimimum of eighteen inches; alleyways in front and between pens used for feeding and watering horses must have a minimum width of three feet. Two or more athwartship alleyways at least eighteen inches wide must be left on each side of deck so that scuppers can be readily reached and kept clear of obstructions. For sheep athwartship alleyways not less than eighteen inches wide in the clear shall be left between pens and fore and-aft alleyways three feet wide in front of each pen, except at obstructions and at ends of alleyways, as provided for cattle, there may be a minimum width of eighteen inches. When two tiers of sheep are carried, the minimum width of fore-and-aft alleyways in bow and stern of ship shall be two feet clear of all obstructions. Sufficient space must be left at the sides of the hatches to permit the feed in the hold to be readily removed and handled. No feeds or other obstruction shall be placed or stowed in alleyways.

VENTILATION.

No. 5. Each compartment containing cattle must have at least four bell-mouthed ventilators, of not less than 18 inches inside diameter, and with top exceeding 7 feet in height, two situated at each end of the compartment, or have some other system of ventilation of which the Inspector approves, but in every case the ship must always be supplied with a sufficient number of fans worked by steam to ensure good and sufficient ventilation for the cattle.

No. 6. No cattle shall be loaded along the alleyways by engine room unless side of said engine room is covered by 1-inch lumber making a 3-inch air-space between.

No. 7. No cattle shall be loaded on hatches on decks above cattle, nor shall any merchandise, freight or food for cattle be loaded on said hatches, but said hatches shall at all times be kept clear, but cattle may be carried on the lowest hatch provided that a space on such hatch of twelve feet square be at all times kept clear and free; and no cattle shall be carried on any part of the vessel, where in ordinary course of navigation, they would interfere with the proper management of the vessel, or would interfere with the efficient working of the boats.

MISCELLANEOUS.

No. 8. Convenient and suitable stowage shall be provided under deck for feed for cattle; but hay to the extent of 50 pounds for each head of cattle for consumption in the River and Gulf of St. Lawrence, may be stowed on deck properly covered, and must be the first hay used. The Inspector must be satisfied as to the quality and quantity of food and water provided for the cattle. Hay must be in bales and grain in bags, and bales and bags must be marked in a legible manner with the name of the person who ships the cattle for which the feed is intended, and the cattle shipper shall furnish the Inspector with a statement of the quantity of hay and grain supplied by him, and the number of cattle shipped by him for the intended voyage.

No. 9. All vessels will carry not less than 4 hogshead of over 100 gallons capacity, for each 100 head of cattle, and these shall be filled with fresh cold water before sailing and re-filled as emptied, unless the vessel is fitted with water pipes suitably placed and fitted with taps for watering the cattle.

No. 10. Shippers of cattle will require to furnish a foreman and attendants to take charge of the cattle on board ship, and there shall be three attendants including the foreman for every one hundred head of cattle upon steamships having water pipes extending the entire length of both sides of compartments, but upon steamships not so fitted there shall be four attendants, including the foreman, for every one hundred head of cattle shipped. Shippers are required to notify the Inspector at least twelve hours before the sailing of the ship of the name of the foreman to be in charge of their shipment and of the names of the attendants, and must furnish the Inspector with satisfactory evidence of their sobriety, experience, ability and general good conduct, and every such foreman and cattle attendant shall sign the ship's articles of agreement before the ship clears on her intended voyage, and be subject to the authority of the master, and the Inspector shall see that the eating and sleeping accommodations for the cattle attendants and foreman are as good as the same accommodations provided for the crew of the ship. Every ship's articles of agreement signed by the foreman and attendants shall clearly state the wages to be paid to each. The foreman and attendants must report themselves to the Inspector at least six hours before the sailing of the ship.

No. 11. Cattle will be tied with a rope not less than ⅝ inch in diameter, which shall not be used more than once.

No. 12. False decks on which cattle have been loaded must be removed and the manure and dirt cleaned away before the ship receives another cargo of cattle.

No. 13. The Inspector may, in case he finds any of the fittings are worn, decayed or unsound, require the same to be replaced before he clears the vessel. He will also supervise the loading of cattle and see that they are properly stowed and tied and that all the requirements of these regulations have been complied with.

No. 14. Water condensers shall be on board in good working order and of sufficient capacity to provide eight gallons every twenty four hours, of fresh cold water for each head of cattle carried, whether the ship is fitted with water ballast tanks or not.

[Ref. 462,028.]

AT THE GOVERNMENT HOUSE AT OTTAWA.

Thursday, the 26th day of April, 1904.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 6th April, 1904, from the Minister of the Interior, stating that Captain Henry Havelock Norwood, of Dawson, has applied to the Department of the Interior for the right to take, carry away and divert 3,000 miner's inches of the unentered and unappropriated water of Bonanza Creek during a period of twenty-five years, with the object of using the same in connection with mining operations or for selling or leasing such water to the owners or lessees of mining property, the water to be stored in a reservoir created by the erection of a dam at or below the junction of Carmack's Fork with Bonanza Creek, in the Yukon Territory.

The Minister observes that by an Order in Council dated the 3rd of August, 1898, provision is made for the disposal of the right to divert and use the water from any stream or lake, and the right of way through and entry upon any mining ground for the purpose of constructing ditches and flumes to convey such water for mining purposes, in the Yukon Territory ; and by an Order in Council dated the 7th of December, 1901, the right of the owner of a water privilege to dispose of the water included in his grant was rescinded.

The Minister recommends, as the portions of the territory upon which the applicant in this case desires to distribute the water for which he has applied, have not a sufficient water supply to work the gold bearing areas thereof during the greater part of the year, that he be authorized to permit Captain Norwood to construct a reservoir at the point indicated and to store, divert, distribute and dispose of the above quantity of the unentered and unappropriated water of Bonanza Creek for a period of twenty-five years for use in connection with mining operations, upon the following terms and conditions :—

1. That the applicant's right to store, divert, distribute and dispose of water from Bonanza Creek shall be confined to the unentered and unappropriated water only, the in-take and out-take of water to be measured in a manner satisfactory to the Government Mining Engineer, so as to ensure that the applicant reserves and diverts the waste waters only, which in the spring and autumn of the year would otherwise be allowed to escape.

2. That before the construction of the dam be commenced the applicant shall secure the ownership of all claims in good standing, the operations on which would be interfered with by reason of the construction of the dam and the storing of the water.

3. That the applicant shall within one year from this date furnish proof through and by the Government Mining Engineer to the satisfaction of the Minister of the Interior, that he has expended not less than $5,000 in the actual construction of the works necessary for the storage of the water. He shall also prosecute the construction of his water scheme with reasonable diligence to the satisfaction of the Minister of the Interior and shall complete all the works necessary for the storage and diversion of the quantity of water applied for not later than the 1st day of June, 1907.

4. That a weir shall be constructed above the dam to measure the water flowing into the reservoir and one at the dam to measure the water flowing from such reservoir.

5. That the price to be charged for the water shall be fixed and controlled by the Governor General in Council.

6. That permission to store water shall not be given until a certificate issued by the Government Mining Engineer to the effect that he is satisfied as to the safety of the dam constructed, and the holder of this water right shall at all times be responsible for any damage or loss which may be occasioned by any leak, break, or imperfection in any part of the works and he shall grant suitable indemnity to the satisfaction of the Minister of the Interior for any such damage or loss which may be occasioned by any leak, break or imperfection in any part of the works and he shall grant suitable indemnity to the satisfaction of the Minister of the Interior for any such damage or loss.

7. That if at the end of one year from this date the applicant has not succeeded in obtaining control of all the mining claims in good standing, the operations on which would be interfered with by the backing up of the water, the right granted him to store and divert water shall be cancelled.

8. That should any portion of the Government road along Bonanza Creek, be submerged by reason of the storage of water, the applicant shall be required to divert and build such road at a higher point, to the satisfaction of the Minister of Public Works.

9. That this grant shall be subject to the rights of such miners as are working on the stream above or below the dam or ditch-head, or of any other persons lawfully using the waters of Bonanza Creek for any purpose whatsoever.

The Minister further recommends that the present Order in Council shall come into force sixty days after its first insertion in "The Yukon Official Gazette," unless otherwise ordered by the Governor General in Council within that period.

The Committee submit the same for approval.

JOHN J. McGEE,
46-4 Clerk of the Privy Council.

(96) RIVER ST. LAWRENCE—SHIP CHANNEL BETWEEN QUEBEC AND MONTREAL—SOREL—CABLES LAID FOR EXPERIMENTAL PURPOSES—CAUTION.

Experiments are being made in the river St. Lawrence opposite Sorel by this Department with an electrical device for guiding steamers in narrow channels.

Two parallel lines of cable will be laid this week following the line of the shore in the vicinity of Sorel point for a distance of about 2 miles. These lines of cable will be, respectively, at distances of about 500 and 1,000 feet from the shore. They will not be in the ship channel.

Vessels are requested not to anchor within half a mile of the shore at Sorel point during the time that these experiments are being conducted.

Small buoys will mark the position of the cables, and signboard notices will be placed on shore.

It is earnestly requested that care be taken not to interfere with this experiment, which is being made in the interests of navigation.

NOTICE TO MARINERS.

GOVERNMENT RIFLE RANGES, MCNAB'S ISLAND.

Owing to the extreme range of the Lee-Metford or Magazine Rifle, with which the musketry training of the troops will in future be conducted, and with a view to the better protection of the public, it has been found necessary to demarcate more clearly the area of water seawards, and to the south of above ranges, liable to be struck by spent or ricochet bullets.

This area has been marked by four spar buoys, placed at intervals between the Thrum Cap Shoal and the Eastern Passage, at a distance of three thousand yards from the stop butts. The buoys mark the extreme limits of the danger zone. The spars are painted red, and are surmounted by cross heads painted red and white.

Notice is therefore hereby given that any ship or boat passing inside these buoys, during the hours of practice, incurs serious risk, and no attempt should, under any circumstances, be made to cross the aforesaid area as long as the red flag hoisted at the south end of McNab's Island is left flying.

This notice will have effect from the 2nd May, 1904.

By order,

(75) RIVER ST. LAWRENCE—SHIP CHANNEL BETWEEN QUEBEC AND MONTREAL—GRONDINES—CHANGES IN AIDS TO NAVIGATION.

The lights and beacons maintained at Grondines have been re-arranged to mark the axis of the improved ship channel, and on the opening of navigation this spring, the new arrangement will be put in operation, as follows :

1. *Old range lights discontinued.*—The old range lights at Grondines heretofore maintained will be discontinued and the buildings removed. These are the lights entered in the List of Lights under Nos. 1285 and 1826.

2. *Grondines point range lights.*—The axis of the cut dredged through Batture Cap à la Roche, immediately above Cap à la Roche, will be marked by a range of lights to be known as Grondines point range lights.

The front light is shown from a tower standing on a concrete pier, built where the low beacon of Grondines point day beacons formerly stood.

Lat.	N.	46°	34′	44″
Long.	W.	72	4	22

The tower is an open steel skeleton frame, square in plan, with sloping sides, surmounted by a square, galvanized iron lantern, the whole painted red. The pier is whitewashed. The tower is 29 feet high from the pier to the ventilator on the lantern.

The light is a fixed white light, elevated 33 feet above the level of the river, and should be visible 7 miles in the line of range. The illuminating apparatus is catoptric. This light should be inserted in the List of Lights as No. 1,283.

The back light is shown from the tower heretofore used as a day beacon on the extremity of Grondines point, east of Grondines village church and close to an old stone windmill ; it is also 8,300 feet N. 84° E. from the front tower.

It is an enclosed wooden structure, square in plan, with sloping sides, surmounted by a square, wooden lantern, the whole painted white. It is 61 feet high from its base to the ventilator on the lantern.

The light is a fixed white light, elevated 66 feet above the level of the river, and should be visible 8 miles in the line of range. The illuminating apparatus is catoptric.

This light should be inserted in the List of Lights as No. 1,284.

3. *Grondines upper range.*—The axis of the cut dredged through Batture des Belles Filles, opposite Cap Levraut, will be marked by range lights shown from towers replacing the day beacons formerly marking the same alignment. These lighthouses will be known as Grondines upper range.

The front tower stands on the site of the low beacon, about 2½ miles above the Grondines point back light.

Lat.	N.	46°	35′	9″
Long.	W.	72	6	16

The tower is an enclosed wooden structure, square in plan, with sloping sides, surmounted by a square, wooden lantern, the whole painted white. It is 18 feet high from its base to the ventilator on the lantern.

The light is a fixed white light, elevated 28 feet above the level of the river, and should be visible 8 miles in the line of range. The illuminating apparatus is catoptric. This light should be inserted in the List of Lights as No. 1,285.

The back tower stands on the site of the high beacon, 6,800 feet N. 62° E. from the front light. It is an enclosed wooden structure, square in plan, with sloping sides, surmounted by a square, wooden lantern, the whole painted white. It is 40 feet high from its base to the ventilator on the lantern.

The light is a fixed white light, elevated 68 feet above the level of the river, and should be visible 9 miles in the line of range. The illuminating apparatus is catoptric. This light should be inserted in the List of Lights as No. 1,286.

4. *Sailing directions.*—Upward bound vessels leave the alignment of Ste. Emélie range lights and take that of the Grondines point range lights at Cap à la Roche bend, taking the turn after passing buoys 87Q and 88Q and completing it before reaching buoys 91Q and 92Q. They keep the alignment of Grondines point lights until they have passed buoy 97Q, when they gradually swing into the alignment of Grondines upper range lights. There is a wide channel at this bend. The Grondines upper range lights must be kept in one until Bastican range lights are coming on, the turn being made opposite buoy No. 110Q. Care must be taken not to overrun the alignment of the Bastican lights. N. to M. No. 30 (75) 28-4-04.

On 11th March, 1904, the car ferry "Shenango," operating between Conneaut and Canadian ports, was destroyed by fire while lying about 1,000 feet outside of the piers, fast in the ice. The vessel burned to the water's edge and then, after several hours, sank to the bottom with twenty-six empty steel gondola cars aboard.

A red spar buoy has been placed marking the eastern limit of the wreck. The buoy stands 6 feet out of water, is on the range of the west pier lights, and is lighted at night with a *red* lantern. Vessels will clear the wreck by keeping to the eastward of the buoy.

(79) LAKE ERIE—FAIRPORT—HYDROGRAPHIC INFORMATION — WRECKS.

The entrance to Fairport harbour is almost completely cut off by a narrow bar across the channel 1,000 feet beyond the ends of the piers, on which the depth is but 9 feet. Small vessels drawing not to exceed 12 feet can enter the harbour by keeping in a line 50 feet west of the west pier.

Arrangements have been completed for dredging at Fairport, and it is expected to have a channel cut through the bar by 15th April.

The wreck of the yacht "Idler" lies 300 feet north of the end of the west pier and projects 60 feet into the channel.

The wreck of the tug "McCormick" lies 250 feet northeast of the light on the east pier, and a canal boat wreck lies between the "McCormick" and the light.

(80) LAKE ERIE — CLEVELAND HARBOUR — HYDROGRAPHIC INFORMATION — CAUTION.

A depth of 21 feet at mean stage is available in the channel between the main entrance and the Lake Shore railway bridge. The January freshet caused a general shoaling in the outer harbour, and a depth not to exceed 18 feet at mean stage is available for vessels entering the east basin and 15 feet for vessels entering the west basin.

The piles and buoys marking the location of the works in progress at the main entrance and at the east end of the harbour in the prolongation of the east breakwater have all been carried away. These works are dangerous obstructions, and vessels using the main entrance should keep in the prolongation of the jettied channel for at least 1,500 feet beyond the breakwater. The works at the east end extend 3,500 feet eastward in the prolongation of the existing structure. All of the usual piles, buoys and lights will be set to mark these works during April.

(81) LAKE ERIE — LORAIN HARBOUR — HYDROGRAPHIC INFORMATION.

The January freshet caused a general shoaling in the jettied channel between the range light and the shore end of the east pier. Over this area the available depth at mean stage is 17 feet, 150 feet out from the ore dock 18·5 feet at 100 feet, and 20 feet at 50 feet. Beyond the range light the depth is not less than 20 feet in the usual track of vessels.

The wreck of the fish tug "Louisa" lies alongside of the west pier at the outer light, with 12 feet of water over her. There is a dangerous lump in the channel 300 feet south and 175 feet east of the range light, on which the depth is 14 feet. A stake boat sunk during the January freshet has not yet been located and may be somewhere in the channel.

All of the piles and buoys marking the location of the construction works beyond the end of the piers have been carried away and these works form dangerous obstructions. All vessels entering or leaving the harbour should keep in the prolongation of the jettied channel for ½ mile beyond the outer light.

The superstructure of the east pier extends out 200 feet beyond the end of the completed work. The end of this work is not marked. All of the usual piles and buoys to mark the work under construction will probably be set during April.

(82) LAKE ERIE — TOLEDO HARBOUR APPROACH — MAUMEE STRAIGHT CHANNEL AND RIVER — BUOYS MOVED.

On the opening of navigation, 1904, Maumee straight channel inner gas buoy No. 34, moored in 15 feet of water, on the northwestern side of the inner end of the straight channel in Maumee bay, western end of Lake Erie, will be moved about 400 feet northeastward to indicate the new angle in the channel made by cutting away the northwestern bank.

Also the Middle Ground buoy No. 38, a red 25-foot spar, located at the upper end and outer edge of the Middle Ground, Maumee river, will be moved about 800 feet up the river to indicate the new angle in the channel of Maumee river, made by recent widening.

AVIS DU GOUVERNEMENT.

SECRÉTARIAT D'ÉTAT DU CANADA.

AVIS est donné par le présent que l'Académie Impériale des Sciences à St-Pétersbourg offre une récompense pour tout renseignement qui tendra à la découverte de l'Expédition polaire du baron Toll.

Le baron Edward Toll, chef de l'Expédition polaire envoyée par l'Académie des Sciences, quitta l'île Bennett, sise au nord de la Nouvelle Sibérie, le 26 octobre (8 novembre) 1902, prenant une direction sud. Il était accompagné par l'astronome Seeberg et deux Jakoots : Vassily Gorokhov, surnommé Chichak, et Nicolas Protodiakonow, surnommé Omook. Le parti semble avoir été entraîné par la glace.

Vu que jusqu'à présent les recherches ont été vaines, une récompense de cinq mille (5000) roubles est offerte par l'Académie des Sciences pour trouver l'expédition en tout ou en partie, et une récompense de deux mille cinq cents (2500) roubles pour donner les premières indications exactes des traces du parti.

AVIS AUX NAVIGATEURS.

No. 30 de 1904.

(Avis de l'Atlantique No. 20.)

Tous les relèvements, à moins d'avis contraire, sont magnétiques et sont donnés venant de la mer, les milles sont des milles marins, les hauteurs sont au-dessus des hautes eaux, et toutes les profondeurs sont à l'eau basse moyenne.

QUÉBEC.

(75) FLEUVE ST-LAURENT—CHENAL DES NAVIRES ENTRE QUÉBEC ET MONTRÉAL—GRONDINES—CHANGEMENTS DANS LES AIDES À LA NAVIGATION.

Les feux et balises entretenus aux Grondines ont été ré-arrangés pour marquer l'axe du chenal des navires amélioré, et à l'ouverture de la navigation, ce printemps, le nouvel arrangement sera mis en fonctionnement, comme suit :—

1. *Vieux feux d'alignement supprimés.*—Les vieux feux d'alignement aux Grondines jusqu'à présent entretenus seront supprimés, et les bâtiments démolis. Ce sont les feux inscrits dans la Liste des phares sous les numéros 1285 et 1286.

2. *Feux d'alignement de la pointe des Grondines.*—L'axe de la tranchée draguée dans la batture du Cap à la Roche, immédiatement en amont du Cap à la Roche, sera marqué par un alignement de feux qui seront appelés feux d'alignement de la pointe des Grondines.

Le feu antérieur est montré d'une tour reposant sur une pile en béton, construite là où se trouvait autrefois la balise d'aval des balises de jour de la pointe aux Grondines.

Lat.	N.	46°	34′	44″
Long.	O.	72	4	19

La tour est une charpente en acier, de forme carrée, avec côtés en pente, surmontée d'une lanterne carrée en fer galvanisé, le tout peinturé en rouge. La pile est blanchie à la chaux. La tour est à 29 pieds de hauteur depuis la pile jusqu'au ventilateur sur la lanterne.

Le feu est blanc fixe, à 33 pieds au-dessus du fleuve, et devrait être visible à 7 milles dans l'alignement.

L'appareil lumineux est catoptrique. Ce feu doit être inséré dans la Liste des phares comme numéro 1283.

Le feu postérieur est montré de la tour qui servait autrefois de balise de jour sur l'extrémité de la pointe des Grondines, à l'est de l'église du village des Grondines, et tout près d'un vieux moulin à vent en pierre; il est aussi à 8,300 pieds N. 84° E. de la tour antérieure.

C'est une structure en bois de forme carrée, avec côtés en pente, surmontée d'une lanterne carrée en bois, le tout peinturé en blanc. Elle a 61 pieds de hauteur depuis sa base jusqu'au ventilateur sur la lanterne.

Le feu est blanc fixe, à 66 pieds au-dessus du niveau du fleuve, et devrait être visible à 8 milles dans l'alignement. L'appareil lumineux est catoptrique.

Ce feu devra être inséré dans la Liste des phares comme numéro 1284.

3. *Alignement supérieur des Grondines.*—L'axe de la tranchée draguée dans la batture des Belles Filles, vis-à-vis le Cap Levraut, sera marqué par des feux d'alignement montrés de tours qui remplacent les balises de jour qui marquaient autrefois le même alignement. Ces phares seront appelés alignement supérieur des Grondines.

La tour antérieure repose sur l'emplacement de la balise basse, environ 2½ milles en haut du feu postérieur de la pointe des Grondines.

Lat. N. 46° 35′ 9″
Long. O. 72 6 16

La tour est une structure en bois de forme carrée, avec côtés en pente, surmontée d'une lanterne carrée, en bois, le tout peinturé en blanc. Elle a 18 pieds de hauteur depuis sa base jusqu'au ventilateur sur la lanterne.

Le feu est blanc fixe, à 28 pieds au-dessus du niveau du fleuve, et devrait être visible à 8 milles dans l'alignement. L'appareil lumineux est catoptrique. Le feu devra être inséré dans la Liste des phares comme numéro 1285.

La tour postérieure repose sur l'emplacement de la balise haute, à 6,800 pieds N. 62° E. du feu antérieur. C'est une structure carrée en bois, avec côtés en pente, surmontée d'une lanterne carrée en bois, le tout peinturé en blanc. Elle a 40 pieds de hauteur depuis sa base jusqu'au ventilateur sur la lanterne.

Le feu est blanc fixe, à 68 pieds au-dessus du niveau du fleuve, et devrait être visible à 9 milles dans l'alignement. L'appareil lumineux est catoptrique. Ce feu doit être inscrit dans la Liste des phares comme numéro 1286.

4. *Route à suivre.*—Les vaisseaux qui remontent quittent l'alignement des feux de Ste-Émélie et prennent celui des feux de la pointe des Grondines à la courbe du Cap à la Roche, commençant le tour après avoir passé les bouées 87Q et 88Q, et le complétant avant d'atteindre les bouées 91Q et 92Q. Ils gardent l'alignement des feux de la pointe des Grondines jusqu'à ce qu'ils aient passé la bouée 97Q, alors ils arrivent graduellement dans l'alignement des feux d'alignement en haut des Grondines. A cette courbe le chenal est large. Les feux d'alignement en haut des Grondines doivent être tenus en conjonction jusqu'à ce que les feux d'alignement de Bastiscan soient en vue, le tour étant fait vis-à-vis la bouée numéro 110Q. Il faut veiller à ne pas dépasser l'alignement des feux de Batiscan.

AT THE GOVERNMENT HOUSE AT OTTAWA.

Thursday, the 5th day of May, 1904.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

On a Report dated 28th April, 1904, from the Minister of the Interior, stating that under the authority of an Order in Council dated the 30th December, 1898, certain lands were set apart under the provisions of clause 31 of the Dominion Lands Act for the purposes of the Indian Industrial School at Elkhorn, in the Province of Manitoba, amongst which lands was the South-west quarter of Section 4, Township 12, Range 28 west of the First Meridian, saving and excepting therefrom the four and one fifth acres of land comprised in the Canadian Pacific Railway Company's right of way through such quarter-section.

The Minister further states that since the date of the above mentioned Order in Council it has been arranged with the Canadian Pacific Railway Company that upon the company surrendering to the Crown for the purposes of the above mentioned school twenty acres out of the north-east corner of the north-west quarter of Section 33, Township 11, Range 28, west of the First Meridian, comprising the north half of legal subdivision 14, required as hay land in connection with the School, the Department of Indian Affairs would pay to the company the sum of $150.00, and that the company would receive from the Crown a grant of all that portion of the north-east corner of the South-west quarter of the said section 4, Township 12, Range 28, west of the First Meridian, required by the company as a gravel pit, and containing 4.28 acres.

The Minister recommends, the above cited conditions having been carried out on both sides, that he be authorized to issue to the Canadian Pacific Railway Company, letters patent for that portion of the South-west quarter of Section 4, Township 12, Range 28, west of the First Meridian, above mentioned, required by the company as a gravel pit, and described as follows :—

" Commencing at the intersection of the easterly
" limit of the said quarter-section with the north
" easterly limit of the right of way of the Canadian
" Pacific Railway, thence north along the said easterly
" limit to the northerly limit of said quarter-section,
" thence west along said northerly limit to its inter-
" section with the north-easterly limit of the said right
" of way, thence S. 49° 51′ E. along said north-easterly
" limit to the point of beginning, containing four and
" twenty-eight hundredths acres more or less."

as shown coloured pink on the sketch hereto attached, and that the said north half of legal subdivision 14 of Section 33, Township 11, Range 28, west of the First Meridian be set aside under section 31 of The Dominion Lands Act for the use of the Indian Industrial School at Elkhorn, Manitoba.

The Committee submit the same for approval.

Clerk of the Privy Council.

AT THE GOVERNMENT HOUSE AT OTTAWA.

Tuesday, the 26th day of April, 1904.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

On a Report dated 6th April, 1904, from the Minister of the Interior, stating that on the 17th day of October, 1903, the Mining Recorder at Dawson granted to Mrs. Ellen Acklen and Mr. Douglas S. Mackenzie the right to divert 5,000 miner's inches of the unentered and unappropriated waters of the Left Fork of Twelve Mile River, a tributary of the Yukon River, for use on certain placer mining claims situated on the Right Limit of the Klondike River near its mouth, in accordance with the provisions of the Regulations for the diversion and use of water in the Yukon Territory, established by the Order in Council of the 3rd day of August, 1898.

The Minister observes that by an Order in Council dated the 7th of December, 1901, the right of the owner of a ditch or water privilege to dispose of the water covered by his grant was rescinded, but the grantees in this case have applied for the right to sell whatever quantity of the water included in their grant may not be required for working the claims to which the said grant is appurtenant and the Government Mining Engineer has recommended that this application be granted upon certain terms and conditions, which recommendation has been approved by the Commissioner of the Yukon Territory.

The Minister recommends, as portions of the territory upon which the applicants desire to distribute a portion of the water included in this grant, namely, Bonanza, Bear and Hunker Creeks, have not a sufficient water supply to work the gold-bearing areas thereof during the greater part of the year, that he be authorized to permit the applicants in this case to sell and distribute for mining purposes on Bonanza, Bear and Hunker Creeks and their several tributaries, the water to which they are entitled under the above grant, upon the following terms and conditions :—

1. That within one year from the date upon which the grant was made the grantees shall expend on the work required for the diversion of the water not less than $5,000.00 and shall satisfy the Minister of the Interior through and by the Government Mining Engineer, that not less than this amount has been expended in *bona fide* construction work in connection with their grant.

2. That the grantees shall prosecute the construction of their water scheme with reasonable diligence to the satisfaction of the Minister of the Interior, and shall complete all the works necessary for the diversion of the full amount of 5,000 miner's inches not later than the 17th day of October, 1907.

3. That the price to be charged for the water which the grantees may be permitted to dispose of shall be at a rate to be fixed by the Governor General in Council, the grantees, however, not to be compelled to make, at their own expense, connections for the delivery of water from the main pipe to any claim or claims, the owners of which may wish to be supplied with water for mining purposes from their works.

4. That if the grantees fail to comply with any of the terms and conditions above provided, of which failure the Minister of the Interior shall be the sole and final judge, their right to dispose of any portion of the water included in their grant will immediately be cancelled.

The Minister further recommends that the present Order in Council shall come into force sixty days after its first insertion in "The Yukon Official Gazette" unless otherwise ordered by the Governor General in Council within that period.

The Committee submit the same for approval.

JOHN J. McGEE,
Clerk of the Privy Council.

REGULATIONS RESPECTING THE SHIPPING OF LIVE STOCK FROM CANADA.

Pursuant to the authority vested in the Governor in Council by the third section of the Act respecting the shipping of Live Stock, 54-55 Victoria, chapter 36, intituled "An Act respecting the shipping of Live Stock," the following regulations are prescribed for ships engaged in the transportation of live stock from any port or place in Canada to any port or place out of Canada, not being a port or place in the United States of America, or in Newfoundland, or in St. Pierre, or Miquelon, or in Bermuda, or in any of the West India Islands, or in Mexico, or in South America.

Interpretation:—The expression 'cattle' means bulls, oxen, cows and heifers one and two years old, and the expression 'horses' includes mares.

APPLICATION FOR INSPECTION.

No. 1. The master, owner, or agent of every ship intending to take on board live stock for transportation from Canada, shall, if such ship requires to be inspected under the provisions of the Act hereinbefore mentioned, apply for inspection in writing to the Inspector of the port at which the live stock is to be shipped, whereupon the Inspector will take the steps necessary to inspect the vessel, and determine whether she is a safe, seaworthy and suitable ship for the transportation of live stock on the voyage intended.

(2) If the Inspector approves of the vessel he should notify the owner, master or agent, that he may proceed to fit up the ship as required by these regulations, but if the vessel has been previously fitted for the transportation of live stock, in a manner not consistent with these regulations, the Inspector shall require compliance with these requirements in all respects before issuing his certificate.

(3) Live stock must not be carried on any part of the vessel where they will interfere with the proper management of the ship, or with the efficient working of the necessary boats, or with the requisite ventilation of the vessel.

CATTLE AND SHEEP.

Space.

No. 2. Fat cattle carried on the upper or spar deck must be given a space of 2 feet 6 inches clear in width, by 8 feet clear in length, and not less than 6 feet 3 inches in height each ; and in no case shall more than four head of cattle be allowed in each pen, except at the end of a row, where 5 cattle may be allowed together ; provided, however, that 5 cattle each 1,000 lbs. weight or under, commonly known as stockers, may be carried in a pen instead of 4 fat cattle, provided that when 5 stockers are carried in a pen instead of 4 fat cattle, the pen shall not be less than 10 feet 8 inches clear in width. Cows in calf are to be given the same space as fat cattle are given.

In ships fitted with permanent iron fittings with alley-ways not less than 3 feet in width, and fitted with approved and sufficient means of ventilation, fat cattle may be carried on the second deck in a space of 2 feet 6 inches in width, provided that no cattle are carried on the hatches. If cattle are carried on the hatches, the space for each animal in the compartment must be 2 feet 8 inches in width. Cattle carried on the third deck must in all cases have a space of 2 feet 8 inches in width.

(2) United States cattle shipped from any port in Canada, carried on the upper or spar deck must be allowed a space of 2 feet 6 inches in width by 8 feet in depth per head, but such United States cattle when so shipped between decks must be allowed a space of 2 feet 8 inches in width by 8 feet in depth, except in the case of regular cattle ships with satisfactory ventilation, which may fit with an allowance of 2 feet 6 inches in width. No more than four (4) head of cattle will be allowed in each pen, except at the end of a row where five may be allowed together. Provided, however, that cattle under 1,000 lbs. in weight may be allowed a width of 2 feet 3 inches.

(3) Pens for sheep shall not be less than 7 feet in height divided into two equal compartments, and not more than 8 or 10 sheep will be counted equal to one fat ox according to the discretion of the Inspector.

DECKS.

No. 3. Cattle shall not be carried on more than three decks ; and every deck on which cattle are carried must be provided with sufficient ventilation as hereinafter prescribed.

UPPER DECK FITTINGS.

No. 4. *Stanchions, Wooden.*—Stanchions must be of good sound spruce timber, not less than 3 by 5½ inches, placed at proper distances from centres, against ship's rail and secured to the rail by a hook of not less than ⅝-inch wrought iron with nut-screw. If the bulwarks are open, the foot of stanchions must be secured by filling pieces 2 x 3 inches placed outside of rail stanchions, to which the outside planking shall be nailed, and the whole secured by through bolts and nuts. A piece of 2 x 3 inches or 2-inch plank shall be fastened to outside of stanchion and run up to underneath rail to chock stanchion down. Outside stanchions shall extend up sufficient height to form stanchions for a hand-rail where necessary for the protection of the seamen. If the bulwarks are not open, the foot of the stanchion shall be secured by a bracing of 2 x 3-inch sound lumber from the back of each stanchion. Outside stanchions at top of pen shall be properly secured to fore and aft stringer beams or plate not less than 5½ x 2 inches. Inside stanchions must be placed directly in line without board stanchions, to be set up so that the 5½-inch way of the stanchions shall set fore and aft, and properly secured at top to fore and aft stringer beams or plates not less than 5½ x 2 inches, firmly secured at foot to deck and floorings to keep from lifting.

Stanchions Iron—These may be used in place of wooden stanchions and should not be less than 2 inches in diameter, set in iron sockets above and below and fastened with nut and bolt.

Beams.—Beams or rafters must be of good sound lumber 2 x 6 inches, suitably placed, to run clear across the ship where practicable. Should any house or deck fittings be in the way, then butt up close to same. These beams shall be shouldered on the stanchions and made secure with chocks nailed or otherwise properly fastened to stanchions.

Angle Iron Frames.—Angle iron frames fitted from side to side on upper deck, 10 feet 8 inches apart, may be used instead of wooden stanchions and beams.

Head or Breast Boards.—Head-boards shall be not less than 1½ x 12 inches, of good sound lumber, and well secured on the pen side of the stanchions. A double stanchion to secure head-board shall be set up at each end of pen. A bolt of iron ⅝ inch in diameter shall pass through the double stanchions and head-board secured by a nut and screw. All head-boards shall have holes bored through them at proper distances, to tie the animals.

Foot-boards.—Foot-boards shall be of the same material as head-boards, properly nailed to stanchions on the inside of same.

Division Boards.—Division boards shall be of 1½ inch x 12-inch sound lumber, fitted perpendicularly and arranged so that they divide the animals into pens of four, or, at end of row into pens of five

Flooring.—Flooring for the deck shall be of sound 1-inch boards laid fore and aft on scantlings 2 x 3 inches laid athwart ship on the deck at 18-inch centres, and the whole well secured. Where very heavy cattle are stalled thicker flooring should be used.

It is optional with the owners whether they use sheathing on their ship with wooden decks, or whether they secure the foot-locks to the decks, but iron decks must in all cases be sheathed. Cement may be used instead of wood sheathing with foot-locks moulded in the same.

Foot-locks.—Foot-locks shall be of good sound spruce or pine lumber, or hardwood, 1½ x 3 inches, laid fore and aft of ship, properly secured to sheathing or deck, placed 17, 16, 22 and 16 inches apart (the first one distant 17 inches from the trough), nailed when practicable with 4-inch nails through into deck strips and braced by similar locks placed athwart 18 inches apart and nailed through the deck strips.

Outside Planking.—All the outside planking on open and closed rail ships, must be properly laid fore and aft of ship and nailed to the backs of stanchions, and battened after the 1st November. Nothing less than 1¼-inch spruce or pine is to be used for this purpose.

Planking Roof of Shelter Deck to be Erected on Upper Deck.—The planks or boards to be nailed on this deck should be not less than 1-inch sound lumber 12 inches wide, laid on purlins, with 4 inches of space between the boards; the space to be fitted with a block of 4 x 1 inch at back and front plates or stringers and at the purlins to give additional support to the second covering, which is to be of boards of the same dimensions, laid over the 4-inch openings of lower boarding.

UNDER DECK FITTINGS.

Stanchions.—Stanchions shall be of good sound spruce lumber not less than 3 x 5½ inches set up at proper distances from centres so that the 5¼-inch way of same shall stand fore and aft and jammed in tight between the two decks, properly braced on head and from side to side of ship; this bracing shall be of 2 x 3-inch spruce or pine, and be properly butted against each stanchion. Where it is found impracticable to run these braces across ship, by reason of hatches, &c., coming in the way, then they shall be well braced from hatch coamings and from the obstruction which prevents running braces from side to side. The heads of these stanchions shall be braced fore and aft by 2 x 3-inch pieces well nailed on each stanchion and running fore and aft close up to the lower edge of the ship beams and butted at each end of compartment and against themselves, or chocked in underneath beam and well nailed to heads of stanchions. If upper and lower decks are wood then the stanchions set up between decks may be secured by well cleating to each deck by heads and heels of same.

Head or Breast Boards, Foot-boards, Division Boards Flooring and Foot-locks shall be of the same dimensions as those on the upper deck and fastened in the same manner, and shall have holes bored at proper distances to tie animals.

Troughs.—Suitable troughs whether on upper or under decks shall be formed on the foot-boards about 12 inches wide, when required. Troughs for sheep must be kept water-tight.

Casing for Steering Gear.—A suitable casing must be placed over the ship's steering gear when found necessary.

ALLEYWAYS.

Alleyways in front and between pens used for feeding and watering cattle must have a width of three feet, except at ends of alleyways in bow and stern of ship, and where obstructions, less than three feet in length, occur, the width may be reduced to a minimum of eighteen inches; alleyways in front and between pens used for feeding and watering horses must have a minimum width of three feet. Two or more athwartship alleyways at least eighteen inches wide must be left on each side of deck so that scuppers can be readily reached and kept clear of obstructions. For sheep athwartship alleyways not less than eighteen inches wide in the clear shall be left between pens and fore and-aft alleyways three feet wide in front of each pen, except at obstructions and at ends of alleyways, as provided for cattle, there may be a minimum width of eighteen inches. When two tiers of sheep are carried, the minimum width of fore-and-aft alleyways in bow and stern of ship shall be two feet clear of all obstructions. Sufficient space must be left at the sides of the hatches to permit the feed in the hold to be readily removed and handled. No feeds or other obstruction shall be placed or stowed in alleyways.

VENTILATION.

No. 5. Each compartment containing cattle must have at least four bell-mouthed ventilators, of not less than 18 inches inside diameter, and with top exceeding 7 feet in height, two situated at each end of the compartment, or have some other system of ventilation of which the Inspector approves, but in every case the ship must always be supplied with a sufficient number of fans worked by steam to ensure good and sufficient ventilation for the cattle.

No. 6. No cattle shall be loaded along the alleyways by engine room unless side of said engine room is covered by 1-inch lumber making a 3-inch air-space between.

No. 7. No cattle shall be loaded on hatches on decks above cattle, nor shall any merchandise, freight or food for cattle be loaded on said hatches, but said hatches shall at all times be kept clear, but cattle may be carried on the lowest hatch provided that a space on such hatch of twelve feet square be at all times kept clear and free; and no cattle shall be carried on any part of the vessel, where in ordinary course of navigation, they would interfere with the proper management of the vessel, or would interfere with the efficient working of the boats.

MISCELLANEOUS.

No. 8. Convenient and suitable stowage shall be provided under deck for feed for cattle; but hay to the extent of 50 pounds for each head of cattle for consumption in the River and Gulf of St. Lawrence, may be stowed on deck properly covered, and must be the first hay used. The Inspector must be satisfied as to the quality and quantity of food and water provided for the cattle. Hay must be in bales and grain in bags, and bales and bags must be marked in a legible manner with the name of the person who ships the cattle for which the feed is intended, and the cattle shipper shall furnish the Inspector with a statement of the quantity of hay and grain supplied by him, and the number of cattle shipped by him for the intended voyage.

No. 9. All vessels will carry not less than 4 hogshead of over 100 gallons capacity, for each 100 head of cattle, and these shall be filled with fresh cold water before sailing and re-filled as emptied, unless the vessel is fitted with water pipes suitably placed and fitted with taps for watering the cattle.

No. 10. Shippers of cattle will require to furnish a foreman and attendants to take charge of the cattle on board ship, and there shall be three attendants including the foreman for every one hundred head of cattle upon steamships having water pipes extending the entire length of both sides of compartments, but upon steamships not so fitted there shall be four attendants, including the foreman, for every one hundred head of cattle shipped. Shippers are required to notify the Inspector at least twelve hours before the sailing of the ship of the name of the foreman to be in charge of their shipment and of the names of the attendants, and must furnish the Inspector with satisfactory evidence of their sobriety, experience, ability and general good conduct, and every such foreman and cattle attendant shall sign the ship's articles of agreement before the ship clears on her intended voyage, and be subject to the authority of the master, and the Inspector shall see that the eating and sleeping accommodations for the cattle attendants and foreman are as good as the same accommodations provided for the crew of the ship. Every ship's articles of agreement signed by the foreman and attendants shall clearly state the wages to be paid to each. The foreman and attendants must report themselves to the Inspector at least six hours before the sailing of the ship.

No. 11. Cattle will be tied with a rope not less than $\frac{5}{8}$ inch in diameter, which shall not be used more than once.

No. 12. False decks on which cattle have been loaded must be removed and the manure and dirt cleaned away before the ship receives another cargo of cattle.

No. 13. The Inspector may, in case he finds any of the fittings are worn, decayed or unsound, require the same to be replaced before he clears the vessel. He will also supervise the loading of cattle and see that they are properly stowed and tied and that all the requirements of these regulations have been complied with.

No. 14. Water condensers shall be on board in good working order and of sufficient capacity to provide eight gallons every twenty four hours, of fresh cold water for each head of cattle carried, whether the ship is fitted with water ballast tanks or not.

No. 15. Live stock shall not be taken on board until the loading of the cargo has been completed unless the consent of the Inspector in writing to do otherwise is first obtained.

No. 16. The backs of pens are to be lined with 1 inch boards to the height of 4 feet, nailed to back stanchions on inside making the backs of the pens flush and smooth, if the Inspector deems it necessary.

No. 17. The work throughout must be well nailed and strongly put together, and to the satisfaction of the Inspector.

No. 18. If the ship is not lighted by electric lights, the Inspector should see that sufficient ship's lanterns are provided to light between decks, when live stock is carried.

No. 19. Passages must be left so the scruppers can be reached and kept clean.

No. 20. Any disputes arising under these Regulations in regard to providing for the health, security and safe carriage of live stock shall be referred to the Minister of Marine and Fisheries, who may decide the matter; or the Minister may refer it to any person considered competent by him, and in either event the decision of the Minister, or of such person shall be final.

No. 21. For the better protection of the health of the live stock no cattle or horses shall be taken on board except cattle or horses which have been inspected and passed as regard health by a duly appointed Government Veterinary Inspector.

No. 22. Horses shall not be taken on board until the loading of the cargo has been completed unless the consent of the Inspector to do otherwise in writing is first obtained.

(2.) Stalls for horses shall not be less than 2 feet 6 inches wide in the clear for horses weighing 1,200 lbs. or less. For horses over 1,200 lbs. in weight, the stall shall not be less than 2 feet 8 inches in the clear. In every case the stall must be 8 feet deep.

(3.) The materials used in the construction of stalls and fittings shall be of substantial character and of such dimensions as the Inspector deems necessary.

(4.) The Inspector shall see that a sufficient supply of good food is placed on board ship for each horse and that suitable arrangements are made for a sufficient supply of fresh water so that no condensed water shall be used. The food supply shall not be less than 15 pounds of hay, 7 pounds of bran and 3 pounds of oats for each horse per day, and the Inspector may refuse to issue the certificate rendered necessary under the Act above referred to until the Inspector is satisfied as to the quantity and quality of the food on board for horses.

(5.) Shippers of horses will require to furnish attendants to take charge of horses on board ship and there shall not be more than eighteen horses in charge of one attendant. Shippers are required to notify the Inspector at least twelve hours before the sailing of the ship of the names of the attendants, and must furnish the Inspector with satisfactory evidence of their sobriety, experience, ability and general good conduct, and every attendant shall sign the ship's articles of agreement before the ship clears on her intended voyage, and be subject to the authority of the master, and the Inspector shall see that the eating and sleeping accommodations for the attendants are as good as the same accommodations provided for the crew of the ship. Every ship's articles of agreement signed by the attendants shall clearly state the wages to be paid to each. The attendants must report themselves to the Inspector at least six hours before the sailing of the ship.

[Ref. 462,028.]

AT THE GOVERNMENT HOUSE AT OTTAWA.

Thursday, the 26th day of April, 1904.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 6th April, 1904, from the Minister of the Interior, stating that Captain Henry Havelock Norwood, of Dawson, has applied to the Department of the Interior for the right to take, carry away and divert 3,000 miner's inches of the unentered and unappropriated water of Bonanza Creek during a period of twenty-five years, with the object of using the same in connection with mining operations or for selling or leasing such water to the owners or lessees of mining property, the water to be stored in a reservoir created by the erection of a dam at or below the junction of Carmack's Fork with Bonanza Creek, in the Yukon Territory.

The Minister observes that by an Order in Council dated the 3rd of August, 1898, provision is made for the disposal of the right to divert and use the water from any stream or lake, and the right of way through and entry upon any mining ground for the purpose of constructing ditches and flumes to convey such water for mining purposes, in the Yukon Territory; and by an Order in Council dated the 7th of December, 1901, the right of the owner of a water privilege to dispose of the water included in his grant was rescinded.

The Minister recommends, as the portions of the territory upon which the applicant in this case desires to distribute the water for which he has applied, have not a sufficient water supply to work the gold bearing areas thereof during the greater part of the year, that he be authorized to permit Captain Norwood to construct a reservoir at the point indicated and to store, divert, distribute and dispose of the above quantity of the unentered and unappropriated water of Bonanza Creek for a period of twenty-five years for use in connection with mining operations, upon the following terms and conditions :—

1. That the applicant's right to store, divert, distribute and dispose of water from Bonanza Creek shall be confined to the unentered and unappropriated water only, the in-take and out-take of water to be measured in a manner satisfactory to the Government Mining Engineer, so as to ensure that the applicant reserves and diverts the waste waters only, which in the spring and autumn of the year would otherwise be allowed to escape.
2. That before the construction of the dam be commenced the applicant shall secure the ownership of all claims in good standing, the operations on which would be interfered with by reason of the construction of the dam and the storing of the water.
3. That the applicant shall within one year from this date furnish proof through and by the Government Mining Engineer to the satisfaction of the Minister of the Interior, that he has expended not less than $5,000 in the actual construction of the works necessary for the storage of the water. He shall also prosecute the construction of his water scheme with reasonable diligence to the satisfaction of the Minister of the Interior and shall complete all the works necessary for the storage and diversion of the quantity of water applied for not later than the 1st day of June, 1907.
4. That a weir shall be constructed above the dam to measure the water flowing into the reservoir and one at the dam to measure the water flowing from such reservoir.
5. That the price to be charged for the water shall be fixed and controlled by the Governor General in Council.
6. That permission to store water shall not be given until a certificate issued by the Government Mining Engineer to the effect that he is satisfied as to the safety of the dam constructed, and the holder of this water right shall at all times be responsible for any damage or loss which may be occasioned by any leak, break, or imperfection in any part of the works and he shall grant suitable indemnity to the satisfaction of the Minister of the Interior for any such damage or loss which may be occasioned by any leak, break or imperfection in any part of the works and he shall grant suitable indemnity to the satisfaction of the Minister of the Interior for any such damage or loss.
7. That if at the end of one year from this date the applicant has not succeeded in obtaining control of all the mining claims in good standing, the operations on which would be interfered with by the backing up of the water, the right granted him to store and divert water shall be cancelled.
8. That should any portion of the Government road along Bonanza Creek, be submerged by reason of the storage of water, the applicant shall be required to divert and build such road at a higher point, to the satisfaction of the Minister of Public Works.
9. That this grant shall be subject to the rights of such miners as are working on the stream above or below the dam or ditch-head, or of any other persons lawfully using the waters of Bonanza Creek for any purpose whatsoever.

The Minister further recommends that the present Order in Council shall come into force sixty days after its first insertion in "The Yukon Official Gazette," unless otherwise ordered by the Governor General in Council within that period.

The Committee submit the same for approval.

46-4 Clerk of the Privy Council.

(96) RIVER ST. LAWRENCE—SHIP CHANNEL BETWEEN QUEBEC AND MONTREAL—SOREL—CABLES LAID FOR EXPERIMENTAL PURPOSES—CAUTION.

Experiments are being made in the river St. Lawrence opposite Sorel by this Department with an electrical device for guiding steamers in narrow channels.

Two parallel lines of cable will be laid this week following the line of the shore in the vicinity of Sorel point for a distance of about 2 miles. These lines of cable will be, respectively, at distances of about 500 and 1,000 feet from the shore. They will not be in the ship channel.

Vessels are requested not to anchor within half a mile of the shore at Sorel point during the time that these experiments are being conducted.

Small buoys will mark the position of the cables, and signboard notices will be placed on shore.

It is earnestly requested that care be taken not to interfere with this experiment, which is being made in the interests of navigation.

HOTEL DU GOUVERNEMENT À OTTAWA.

Lundi, le 16e jour de mai 1904.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT qu'il est jugé à propos de refondre les règles et règlements concernant l'exportation du bétail du Canada en Europe, et de leurs modifications :

A ces causes il plaît au Gouverneur général en conseil, en vertu des dispositions de l'article 3 du chapitre 36 de l'Acte 54-55 Victoria "Acte concernant l'expédition du bétail," d'établir et il établit par le présent les règles et règlements ci-joints pour régulariser l'exportation du bétail du Canada en Europe.

Il plaît aussi au Gouverneur général en conseil d'ordonner que tous les règles et règlements antérieurs et arrêtés en conseil les établissant pour cette exportation du bétail soient cancellés.

JOHN J. McGEE,
Greffier du Conseil privé.

RÈGLEMENTS CONCERNANT L'EXPÉDITION DU BÉTAIL DU CANADA.

Conformément à l'autorité conférée au Gouverneur en conseil par le troisième article de l'*Acte concernant l'expédition du bétail*, les règlements suivants sont établis pour les navires faisant le transport du bétail de tout endroit ou lieu en Canada à tout port ou lieu en dehors du Canada n'étant pas un port ou lieu dans les Etats-Unis d'Amérique, ou de Terreneuve, ou de Saint-Pierre ou Miquelon, ou des Bermudes, ou des îles des Antilles, ou du Mexique, ou de l'Amérique du Sud.

Interprétation.—Dans les présents règlements l'expression "animaux" comprend les taureaux, les bœufs, les vaches et les génisses de un et deux ans, et l'expression "chevaux" comprend les juments.

DEMANDE D'INSPECTION.

No. 1. Le capitaine, propriétaire ou agent de tout navire se proposant d'embarquer du bétail pour le transporter du Canada, devra, si ce navire est sujet aux dispositions de l'acte précité, en demander l'inspection par écrit à l'inspecteur du port d'où le bétail doit être expédié, et là-dessus l'inspecteur prendra les mesures nécessaires pour inspecter le navire, et déterminer s'il est sûr, navigable et propre au transport du bétail dans le voyage projeté.

(2) Si l'inspecteur approuve le navire, il devra avertir le propriétaire, capitaine ou agent qu'il peut continuer à aménager le navire selon les exigences des

présents règlements, mais si le navire a déjà été aménagé pour le transport du bétail d'une manière incompatible avec ces règlements, l'inspecteur devra, avant d'accorder son certificat, exiger qu'il se conforme aux règlements sous tous rapports.

(3) Le bétail ne doit pas être porté sur une partie du vaisseau qui nuirait à la manœuvre convenable du vaisseau, ou au fonctionnement efficace des canots nécessaires, ou à la ventilation requise du vaisseau.

ANIMAUX ET MOUTONS.

Espace.

N° 2. Les animaux gras portés sur le pont supérieur ou tillac, devront avoir un espace de 2 pieds et 6 pouces francs de largeur sur 8 pieds francs de longueur chacun, et pas moins de 6 pieds 3 pouces de hauteur, et on ne permettra jamais de mettre plus de quatre têtes de bétail dans chaque parc, sauf au bout d'une rangée, où l'on pourra en mettre cinq ensemble ; pourvu toutefois que lorsque cinq animaux, pesant chacun 1000 livres ou moins, communément appelés " animaux d'engraissement " sont mis dans un parc au lieu de quatre animaux gras, le parc aura au moins 10 pieds 8 pouces de largeur. Les vaches pleines auront le même espace que les bœufs gras.

Dans les navires munis d'installations permanentes en fer, avec des allées d'au moins 3 pieds de largeur, et munis de moyens approuvés et suffisants de ventilation, des animaux gras pourront être transportés sur le deuxième pont dans un espace de 2 pieds 6 pouces de largeur, pourvu qu'il ne soit pas porté d'animaux sur les écoutilles. Si des animaux sont portés sur les écoutilles, l'espace pour chaque animal dans le compartiment devra être de 2 pieds 8 pouces de largeur. Les animaux portés sur le troisième pont doivent avoir dans tous les cas un espace de 2 pieds 8 pouces de largeur.

(2). Au bétail des Etats-Unis expédié d'un port quelconque en Canada, porté sur le pont supérieur ou le tillac, il sera alloué un espace de 2 pieds 6 pouces de largeur sur 8 pieds de longueur par tête, mais lorsque ce bétail des Etats-Unis est porté entre les ponts il devra avoir un espace de 2 pieds 8 pouces de largeur sur 8 pieds de longueur, sauf dans le cas de navires convenablement installés pour le transport du bétail, avec un système de ventilation suffisant, où 2 pieds 6 pouces de largeur suffiront. Il ne sera pas alloué plus de quatre (4) têtes de bétail dans chaque parc, sauf au bout d'une rangée, où il pourra en être mis cinq ensemble. Pourvu toutefois que le bétail pesant moins de 1,000 livres pourra avoir une largeur de 2 pieds 3 pouces.

(3). Les parcs pour les moutons auront au moins 7 pieds de hauteur divisés en deux compartiments égaux, et pas plus de huit ou dix moutons équivaudront à un bœuf gras, à la discrétion de l'inspecteur.

PONTS.

No. 3. Il ne sera pas transporté d'animaux sur plus de trois ponts ; et chaque pont sur lequel des animaux seront transportés seront pourvus d'une bonne ventilation tel que ci-après prescrit.

AMÉNAGEMENTS DU TILLAC OU PONT SUPÉRIEUR.

No. 4. *Epontilles en bois.*—Les épontilles devront être de bonne épinette blanche saine, mesurant pas moins que 3 x $5\frac{1}{2}$ pouces, placées à des distances convenables des cintres, contre la lisse du navire et assujéties à la lisse par un crampon de fer forgé de $\frac{5}{8}$ pouce au moins, à vis et écrou. Si le pavois est à jour le pied des épontilles devra être assujéti au moyen de pièces de remplissage de 2 x 3 pouces placés en dehors des batayoles, et à ces pièces les planches extérieures seront clouées, et le tout solidement fixé par des boulons à vis et écrou. Une pièce de 2 x 3 pouces ou une planche de 2 pouces sera fixée à l'extérieur de l'épontille et amenée jusqu'au dessous de la lisse afin de tenir l'épontille en place. Des épontilles extérieures s'élèveront assez haut pour servir d'appui à un garde-corps si la chose est nécessaire à la protection des matelots. Si les pavois sont pleins, le pied des épontilles sera assujéti par des entretoises de bon bois de 2 x 3 pouces, fixés au dos de chaque épontille. Les épontilles extérieures au-dessus des parcs seront solidement fixées à des solives de $5\frac{1}{2}$ x 2 pouces au moins, courant de l'avant à l'arrière. Les épontilles intérieures devront être placées directement en ligne avec les épontilles extérieures, et posées de façon à ce que l'épaulement de $5\frac{1}{2}$ pouces des épontilles s'étende de l'avant à l'arrière ; elles seront bien assujéties par le haut à des solives de pas moins de $5\frac{1}{2}$ x 2 pouces, courant de l'avant à l'arrière et solidement fixées par le bas au pont et plancher pour les expêcher de se soulever.

Epontilles en fer.—Elles pourront être employées au lieu des épontilles en bois, et auront un diamètre de 2 pouces au moins, fixées dans des douilles de fer en haut et en bas, avec vis et écrou.

Baux.—Les baux ou solives devront être de bon bois sain, 2 x 6 pouces, convenablement placés, et traverser d'un flanc à l'autre si c'est possible. S'il se trouve quelque construction dans le chemin, alors elles y seront solidement appuyées. Ces solives seront épaulées sur les pontilles et assujéties au moyen de courbes clouées ou autrement solidement attachées aux épontilles.

Charpentes à cornières de fer.—Des charpentes avec cornières de fer ajustées d'un flanc à l'autre sur le pont supérieur, espacées de 5 pieds, pourront remplacer les épontilles de bois et les solives.

Planches de tête ou d'appui.—Les planches de tête n'auront pas moins de $1\frac{1}{2}$ x 12 pouces, seront de bon bois sain, et solidement fixées aux épontilles du côté du parc. Pour solider la planche un double étai sera placé à chaque bout du parc. Une tige de fer d'un diamètre de $\frac{5}{8}$ de pouce passera à travers les doubles étais et la planche de tête, et sera arrêté par une vis et écrou. Dans toutes les planches de tête il sera percé des trous à des distances convenables pour attacher les animaux.

Planches de pied.—Les planches de pied seront des mêmes matériaux que celles de tête, bien clouées aux étais en dedans.

Planches de séparation.—Les planches de séparation seront de bon bois sain, de $1\frac{1}{2}$ x 12 pouces, ajustées perpendiculairement, et arrangées de façon à séparer les animaux en parcs de quatre, ou de cinq au bout de la rangée.

Plancher.—Le plancher du pont sera fait de planches saines de 1 pouce, posées de l'avant à l'arrière sur des voliges de 2 x 3 pouces placées en travers sur le pont à 18 pouces de distance, et le tout bien cloué. Là où de gros animaux sont parqués, le plancher devrait être plus épais.

Les propriétaires de navires peuvent soit permettre qu'un doublage soit posé sur les ponts de bois, ou que les arrête-pieds soient fixés au pont, mais pour les ponts en fer il faut absolument les doubler en bois. On peut employer du ciment au lieu du doublage en bois, avec des arrête-pieds moulés dans le ciment.

Arrête-pieds.—Les arrête-pieds seront de bonne épinette blanche ou de pin, ou de bois dur, $1\frac{1}{2}$ x 3 pouces, posés de l'avant à l'arrière, bien assujétis au doublage ou pont, espacés de 17, 16, 22 et 16 pouces (le premier à 17 pouces de l'auge) cloués, si c'est possible, avec du clou de 4 pouces à des traversins et renforcés par des pièces semblables placées en travers de 18 pouces en 18 pouces et clouées aux traversins.

Bordage extérieur.—Tout le bordage extérieur des navires à pavois pleins ou à jour devra être bien posé de l'avant à l'arrière, et cloué au dos des épontilles, et recouvert de voliges après le 1er novembre. Pour cet objet on ne se servira que d'épinette blanche ou de pin de $1\frac{1}{4}$ pouce.

Planchéiage des abris construits sur le tillac.—Les planches pour cet objet seront de bon bois d'un pouce sur douze pouces de largeur ou moins posées sur des traverses, avec un espace de 4 pouces entre les planches ; dans cet espace sera placé un bloc de 4 x 1 pouce aux pièces d'avant et de derrière ainsi qu'aux traverses de façon à mieux appuyer la deuxième couverture qui sera de planches des mêmes dimensions, posées sur les ouvertures de 4 pouces du plancher de dessous.

AMÉNAGEMENT DU FRANC-TILLAC OU PONT INFÉRIEUR.

Epontilles.—Les épontilles seront de bonne épinette blanche de 3 x $5\frac{1}{2}$ pouces au moins, posées à telle distance du cintre que leur épaulement de 5¼ pouces s'étende de l'avant à l'arrière et soit bien serré entre les deux ponts, bien entretoisé du haut et d'un flanc à l'autre du navire ; cet entretoisement sera en épinette blanche ou pin de 2 x 3 pouces, et bien appuyé contre chaque épontille. Si pour quelque raison, telle que des écoutilles, etc., on trouvait impossible de faire courir ces entretoises d'un flanc à l'autre, alors on placera ces entretoises aux surbaux des écoutilles ou autres constructions. Les têtes de ces épontilles seront renforcées de l'avant à l'arrière par des pièces de 2 x 3 pouces bien clouées à chaque épontille et courant de l'avant à l'arrière jusqu'au bord inférieur des baux du navire, et s'arc-bouteront à chaque bout du compartiment, ou seront coincés en dessous et bien cloués à la tête des épontilles. Si les ponts supérieurs et inférieurs sont de bois alors les épontilles entre les ponts pourront être assujéties en haut et bas par des taquets.

Les planches de tête, de pied et de séparation, plancher et arrête-pieds seront des mêmes dimensions que pour le pont supérieur, et assujétis de la même manière, et des trous y seront pratiqués pour attacher les animaux.

Auges.—Que ce soit sur le tillac ou le franc-tillac de bons auges d'environ 12 pouces de largeur, seront pratiqués sur la planche de fond, si c'est nécessaire. Les auges pour les moutons devront être bien étanches.

Entourage de l'appareil à gouverner.—Une couverture convenable devra être mise sur l'appareil du gouvernail, lorsque nécessaire.

ALLÉES.

Les allées en front et entre les parcs servant à nourrir et abreuver les animaux doivent avoir une largeur de trois pieds, sauf aux bouts des allées dans la proue et la poupe du navire, et là où se trouvent des obstacles de moins de trois pieds de longueur la largeur sera réduite à un minimum de dix-huit pouces ; les allées en front et entre les parcs servant à nourrir et abreuver les chevaux doivent avoir une largeur minimum de trois pieds. Deux allées transversales ou plus, d'au moins dix-huit pouces de largeur doivent être laissées de chaque côté du pont de façon à ce que les dalots soient faciles d'accès et tenus libres. Pour les moutons, des allées transversales d'au moins dix-huit pouces francs de largeur seront laissées entre les parcs et des allées d'avant en arrière trois pieds de largeur en front de chaque parc, sauf qu'aux obstacles et aux bouts des allées, tel que prescrit pour les animaux, la largeur minimum peut être de dix-huit pouces. Lorsque les moutons sont parqués en deux étages, la largeur minimum des allées d'avant et d'arrière à la poupe et à la proue sera de deux pieds libres de toute obstruction. Un espace suffisant sera laissé aux côtés des écoutilles pour permettre d'atteindre facilement au fourrage dans la cale. Il ne sera pas placé ou arrimé de nourriture dans les allées.

VENTILATION.

No. 5. Chaque compartiment qui contient des animaux devra avoir au moins quatre ventilateurs à embouchures évasées, d'un diamètre de pas moins de 18 pouces à l'intérieur, et excédant 7 pieds de hauteur, deux situés à chaque bout du compartiment, ou aura quelque autre système de ventilation que l'inspecteur approuvera, mais dans tous les cas le vaisseau devra toujours être muni d'éventails mus par la vapeur pour fournir une bonne ventilation au bétail.

No. 6. Il ne sera pas embarqué de bétail par les allées le long de la chambre de la machine, à moins que les côtés de la dite chambre de la machine ne soient recouverts de planches d'un pouce, laissant un espace vide de 3 pouces.

No. 7. Il ne sera pas chargé d'animaux sur les écoutilles des ponts au-dessus d'autres animaux ; il ne sera pas non plus chargé de marchandise, de fret ou de nourriture pour le bétail sur les dites écoutilles, mais ces écoutilles seront toujours tenues libres ; mais du bétail pourra être mis sur la plus basse écoutille, pourvu qu'il soit toujours laissé sur cette écoutille un espace libre de 12 pieds carrés ; et il ne sera porté sur aucune partie du navire aucun bétail qui, dans le cours ordinaire de la navigation, pourrait gêner la manœuvre du navire ou des chaloupes.

DIVERS.

No. 8. Sous le pont il sera fourni un endroit convenable pour arrimer la nourriture des animaux ; mais du foin jusqu'à concurrence de 50 livres pour chaque tête de bétail, pour consommation sur le fleuve et le golfe Saint-Laurent, pourra être placé sur le pont, bien couvert ; et ce foin sera le premier employé. L'inspecteur devra s'assurer que la nourriture et l'eau pour le bétail sont de qualité et en quantité suffisantes. Le foin devra être en ballots et le grain en sacs, et les ballots et les sacs devront être marqués lisiblement du nom de la personne qui expédie le bétail pour lequel la nourriture est destinée, et l'expéditeur fournira à l'inspecteur un état de la quantité de foin et de grain fournie par lui, et le nombre d'animaux embarqués par lui pour le voyage projeté.

No. 9. Tous les navires porteront pas moins de 4 futailles d'une capacité de 100 gallons pour chaque 100 têtes de bétail, et ces futailles seront emplies de bonne eau fraîche avant de partir, et remplies aussitôt qui vidées, à moins que le navire ne soit muni de tuyaux à eau convenablement placés et munis de robinets pour abreuver le bétail.

No. 10. Les expéditeurs de bétail seront tenus de fournir un contremaître et des aides afin de prendre soin des animaux à bord, et il y aura trois aides, y compris le contremaître, pour chaque 100 têtes de bétail expédiées sur des steamships ayant des tuyaux à l'eau courant sur toute la longueur des deux côtés des compartiments, mais sur les steamships qui ne sont pas ainsi aménagés, il y aura quatre aides, y compris le contremaître, pour chaque 100 animaux expédiés. Les expéditeurs seront tenus d'avertir l'inspecteur, au moins 12 heures avant le départ du navire, du nom du contremaître qui doit prendre charge de leur consignation et des noms des aides, et doivent fournir à l'inspecteur une preuve satisfaisante de leur sobriété, expérience, habileté et bonne conduite générale ; et chaque contremaître et aide signera l'engagement de bord avant que le navire parte pour son voyage, et sera soumis à l'autorité du capitaine ; et l'inspecteur veillera à ce que les dispositions pour la nourriture et le couchage du contremaître et des aides soient d'aussi bonne qualité que pour l'équipage du navire. Chaque engagement de bord signé par le contremaître et ses aides indiquera clairement les gages qui seront payés à chacun. Le contremaître et ses aides devront se présenter à l'inspecteur au moins six heures avant le départ du navire.

No. 11. Les animaux seront attachés avec des cordes d'au moins ⅝ pouce de diamètre, et ces cordes ne serviront qu'une fois.

No. 12. Les faux ponts sur lesquels le bétail pourra être chargé, seront enlevés et le fumier nettoyé avant que le navire reçoive une autre cargaison d'animaux.

No. 13. Si l'inspecteur trouvait que quelques-uns des aménagements sont usés, pourris ou ne paraissent pas sûrs, il pourra les faire remplacer avant d'acquitter le navire. Il surveillera aussi le chargement du bétail, et verra à ce qu'il soit bien arrimé et attaché, et que toutes les dispositions des présents règlements soient accomplies.

No. 14. Il devra y avoir à bord des condenseurs d'eau en bon état de fonctionnement, et capables de fournir huit gallons d'eau fraîche toutes les vingt-quatre heures pour chaque tête de bétail à bord, que le navire soit muni de réservoirs à eau comme lest ou non.

No. 15. Aucun bétail ne sera embarqué avant que le chargement de la cargaison n'ait été complété, sauf du consentement de l'inspecteur donné par écrit.

No. 16. L'arrière des parcs sera doublé de planches d'un pouce sur une hauteur de quatre pieds, clouées, au dos des épontilles à l'intérieur, faisant l'arrière des parcs unis et lisses, si l'inspecteur le juge nécessaire.

No. 17. Tout l'ouvrage doit être bien cloué, et solidement assemblé, et à la satisfaction de l'inspecteur.

No. 18. Si le navire n'est pas éclairé à l'électricité, l'inspecteur devra voir à ce que des fanaux suffisants soient fournis pour éclairer entre les ponts, lorsque du bétail est transporté.

No. 19. Il faudra laisser des passages libres pour atteindre les dalots et les tenir nets.

No. 20. Tout différend s'élevant en vertu des présents règlements au sujet de la santé, la sûreté et transport sûr du bétail sera référé au ministre de la Marine et des Pêcheries, qui pourra décider l'affaire ; ou bien le ministre pourra le référer à toute personne qu'il jugera compétente, et dans l'un et l'autre cas la décision du ministre ou de cette personne sera finale.

No. 21. Pour la meilleure protection de la santé du bétail, nul bétail ou chevaux ne seront pris à bord, sauf des animaux ou des chevaux qui ont été inspectés et trouvés sains par un inspecteur vétérinaire dûment nommé par le gouvernement.

No. 22. Les chevaux ne seront pas pris à bord avant que le chargement de la cargaison ne soit complété, à moins que le consentement par écrit de l'inspecteur n'ait été obtenu de faire le contraire.

(2). Les stalles pour les chevaux n'auront pas moins de deux pieds six pouces francs de largeur pour les chevaux pesant 1,200 livres ou moins. Pour les chevaux dépassant 1,200 livres la stalle aura au moins deux pieds huit pouces francs. La stalle aura dans chaque cas huit pieds de profondeur.

(3). Les matériaux employés dans la construction des stalles et aménagements seront solides et auront les dimensions que l'inspecteur jugera nécessaires.

(4). L'inspecteur veillera à ce qu'un approvisionnement suffisant de bonne nourriture soit mis à bord du vaisseau pour chaque cheval et que des arrangements propices soient faits pour avoir un approvisionnement d'eau fraîche, de façon à ne pas employer d'eau condensée. Les rations seront d'au moins 15 livres de foin, 7 livres de son et 3 livres d'avoine pour chaque cheval par jour, et l'inspecteur pourra refuser de délivrer le certificat rendu nécessaire par le susdit acte, tant que l'inspecteur ne sera pas satisfait quant à la quantité et la qualité de la nourriture mise à bord pour les chevaux.

(5). Les expéditeurs de chevaux seront tenus de fournir des aides pour prendre soin des chevaux à bord, et il y aura un aide pour chaque dix-huit chevaux expédiés. Les expéditeurs sont tenus de notifier à l'inspecteur, au moins douze heures avant le départ du navire, les noms des aides, et doivent fournir à l'inspecteur une preuve satisfaisante de leur sobriété, expérience, habileté et bonne conduite générale ; et chaque aide signera le rôle de l'équipage avant que le navire parte pour son voyage, et sera soumis à l'autorité du capitaine ; et l'inspecteur veillera à ce que les dispositions pour la nourriture et le couchage des aides soient aussi bonnes que celles prises pour l'équipage du navire. Chaque engagement de bord signé par les aides indiquera clairement les gages devant être payés à chacun. Les aides devront se présenter à l'inspecteur au moins six heures avant le départ du navire.

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT que l'on a fait voir l'urgente nécessité de mieux protéger la pêche des huîtres en prolongeant la saison défendue, et en augmentant la dimension des huîtres :—

A ces causes, il plaît au Gouverneur général d'ordonner que l'article 4 des Règlements de pêche des huîtres établis par arrêté en conseil du 28 décembre 1893, tel que modifié par l'arrêté en conseil du 13 septembre 1901, et l'article 6 des Règlements de pêche des huîtres du 28 décembre 1893, soient et ils sont par le présent rescindés, et remplacés par ce qui suit :—

"4. Il est défendu de pêcher, prendre, tuer, acheter, vendre ou d'avoir en sa possession des huîtres entre le 21e jour de mai et le 22e jour de septembre de chaque année, ces deux jours inclusivement :—Pourvu que cette défense viendra en vigueur à Richmond, Ile du Prince-Edouard le 21e jour de mai 1904, et ailleurs le 21e jour de mai 1905".

"6. Personne ne pêchera, prendra, achètera, vendra, ou aura en sa possession des huîtres rondes dont l'écaille aura moins de trois pouces de diamètre et des huîtres longues dont l'écaille extérieure aura moins de trois pouces et demi.

"Les huîtres rondes de trois pouces de diamètre et les huîtres longues dont l'écaille extérieure mesure moins de trois pouces et demi, qui seront prises par accident, seront remises à l'eau vivante, aux frais et risque de la personne pêchant ainsi, à qui incombera dans chaque cas la preuve de cette libération.

"Pourvu toujours que les personnes portant des licences de pêche pourront obtenir du ministre de la Marine et des Pêcheries, la permission de pêcher et de prendre de petites huîtres pour établir ou peupler des huîtrières".

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

SUR un rapport daté le 28 d'avril 1904, du ministre de l'Intérieur, énonçant qu'en vertu d'un arrêté en conseil daté le 30 décembre 1898, certaines terres furent mises à part conformément aux dispositions de l'article 31 de l'*Acte des terres fédérales* pour les fins de l'école industrielle des Sauvages à Elkhorn, dans la province du Manitoba, et que dans les terres se trouve le quart sud-ouest de la section 4, township 12, rang 28 à l'ouest du premier méridien, sauf et excepté les quatre acres et un cinquième de terre compris dans le droit de la Compagnie de chemin de fer Canadien du Pacifique de passer sur le dit quart de section.

Le Ministre dit de plus que depuis la date du susdit arrêté en conseil un arrangement a été conclu avec la Compagnie de chemin de fer Canadien du Pacifique à l'effet que du moment que la compagnie cèderait à la Couronne pour les fins scolaires ci-dessus mentionnées vingt acres de l'angle nord-est du quart nord-ouest de la section 33, township 11, rang 28, à l'ouest du premier méridien, comprenant la moitié nord de la subdivision légale 14 requis comme terre à foin attachée à l'école, le ministère des Affaires des Sauvages paierait à la compagnie la somme de $150, et que la compagnie recevrait de la Couronne un octroi de toute cette partie de l'angle nord-est du quart sud-ouest de la dite section 4, township 12, rang 28 à l'ouest du premier méridien, dont a besoin la compagnie comme fosse à gravier, et contenant 4.28 acres.

Le Ministre recommande, une fois les conditions remplies de part et d'autre, qu'il soit autorisé à délivrer à la Compagnie de chemin de fer Canadien du Pacifique, des lettres patentes pour cette partie du quart sud-ouest de la section 4, township 12, rang 28 à l'ouest du premier méridien, ci-dessus mentionné, dont a besoin la compagnie comme fosse à gravier, et décrit comme suit :—

Commençant à l'intersection de la limite est du dit quart de section avec la limite nord-est du droit de passage du chemin de fer Canadien du Pacifique, de là dans une direction nord le long de la dite limite est jusqu'à la limite nord du dit quart de section, de là dans une direction ouest le long de la dite limite nord jusqu'à son intersection avec la limite nord-est du dit droit de passage, de là S. 49° 51′ E., le long de la dite limite nord-est jusqu'au point de départ, contenant quatre acres et vingt-huit centièmes plus ou moins, tel que coloré rose sur le plan, et que la dite moitié nord de la subdivision légale 14 de la section 33, township 11, rang 28 à l'ouest du premier méridien soit mis à part en vertu de l'article 31 de l'*Acte des terres fédérales* pour l'usage de l'école industrielle des Sauvages à Elkhorn, Manitoba.

Le comité soumet ce qui précède à l'approbation.

AVIS DU GOUVERNEMENT.

AVIS AUX NAVIGATEURS.

No. 37 de 1903.

(*Avis de l'Atlantique No.* 24.)

Tous les relèvements, à moins d'avis contraire, sont magnétiques et sont donnés venant de la mer, les milles sont des milles marins, les hauteurs sont au-dessus des hautes eaux, et toutes les profondeurs sont à l'eau basse moyenne.

QUÉBEC.

(96) FLEUVE ST-LAURENT—CHENAL DES NAVIRES ENTRE QUÉBEC ET MONTRÉAL—SOREL—CABLES POSÉS POUR FINS EXPÉRIMENTALES—AVERTISSEMENT.

Ce ministère est à faire des expériences dans le fleuve Saint-Laurent vis-à-vis Sorel avec une invention électrique pour guider les vaisseaux dans les chenaux étroits.

Deux lignes parallèles de câble seront posées cette semaine, longeant la ligne du rivage dans le voisinage de la pointe de Sorel, sur une distance d'à peu près 2 milles. Ces lignes de câble seront à des distances d'à peu près 500 et 1,000 pieds du rivage respectivement. Elles ne seront pas dans le chenal des navires.

Les vaisseaux sont avertis de ne pas mouiller en deça d'un demi-mille du rivage de la pointe de Sorel tant que dureront ces expériences.

De petites bouées marqueront la position des câbles, et des enseignes seront placées sur le rivage.

On espère que rien ne sera fait pour gêner ces expériences, qui ont lieu dans l'intérêt de la navigation.

[Ref. 461,516.]

AT THE GOVERNMENT HOUSE AT OTTAWA.

Monday, the 18th day of April, 1904.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 14th April, 1904, from the Minister of the Interior, submitting with reference to the Order in Council of the 30th January, 1904, and to previous Orders in Council of the 27th May and 30th June, 1903, with respect to an investigation to be made by Mr. Justice Britton and Mr. Benjamin Taylor A. Bell, as Commissioners, into certain matters in the Yukon Territory, that on the 18th March last, one of the Commissioners, Mr. Bell, met with an unfortunate accident which resulted in his death on the first April instant.

The Minister states that the Commissioners had shortly after their appointment proceeded to the Yukon Territory and taken much evidence there, but, as appears in the Order in Council of 30th January, it was then proposed to continue the enquiry at Ottawa and elsewhere in Canada in order to secure the evidence of many important witnesses not resident in the Territory.

The Minister recommends that a supplementary Commission be issued to Mr. Justice Britton authorizing him to continue and complete the investigation as sole Commissioner with all the powers conferred upon the Commissioners by former Orders in Council and the Commission issued thereunder, and that he be required to report to the Secretary of State the result of the whole investigation and any opinions he may see fit to express as to the matters which have been the subjects thereof.

The Committee submit the same for approval.

JOHN J. McGEE,
50-4 Clerk of the Privy Council.

AT THE GOVERNMENT HOUSE AT OTTAWA.

Tuesday, the 26th day of April, 1904.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 6th April, 1904, from the Minister of the Interior, stating that on the 17th day of October, 1903, the Mining Recorder at Dawson granted to Mrs. Ellen Acklen and Mr. Douglas S. Mackenzie the right to divert 5,000 miner's inches of the unentered and unappropriated waters of the Left Fork of Twelve Mile River, a tributary of the Yukon River, for use on certain placer mining claims situated on the Right Limit of the Klondike River near its mouth, in accordance with the provisions of the Regulations for the diversion and use of water in the Yukon Territory, established by the Order in Council of the 3rd day of August, 1898.

The Minister observes that by an Order in Council dated the 7th of December, 1901, the right of the owner of a ditch or water privilege to dispose of the water covered by his grant was rescinded, but the grantees in this case have applied for the right to sell whatever quantity of the water included in their grant may not be required for working the claims to which the said grant is appurtenant and the Government Mining Engineer has recommended that this application be granted upon certain terms and conditions, which recommendation has been approved by the Commissioner of the Yukon Territory.

The Minister recommends, as portions of the territory upon which the applicants desire to distribute a portion of the water included in this grant, namely, Bonanza, Bear and Hunker Creeks, have not a sufficient water supply to work the gold-bearing areas thereof during the greater part of the year, that he be authorized to permit the applicants in this case to sell and distribute for mining purposes on Bonanza, Bear and Hunker Creeks and their several tributaries, the water to which they are entitled under the above grant, upon the following terms and conditions :—

1. That within one year from the date upon which the grant was made the grantees shall expend on the work required for the diversion of the water not less than $5,000.00 and shall satisfy the Minister of the Interior through and by the Government Mining Engineer, that not less than this amount has been expended in *bona fide* construction work in connection with their grant.

2. That the grantees shall prosecute the construction of their water scheme with reasonable diligence to the satisfaction of the Minister of the Interior, and shall complete all the works necessary for the diversion of the full amount of 5,000 miner's inches not later than the 17th day of October, 1907.

3. That the price to be charged for the water which the grantees may be permitted to dispose of shall be at a rate to be fixed by the Governor General in Council, the grantees, however, not to be compelled to make, at their own expense, connections for the delivery of water from the main pipe to any claim or claims, the owners of which may wish to be supplied with water for mining purposes from their works.

4. That if the grantees fail to comply with any of the terms and conditions above provided, of which failure the Minister of the Interior shall be the sole and final judge, their right to dispose of any portion of the water included in their grant will immediately be cancelled.

The Minister further recommends that the present Order in Council shall come into force sixty days after its first insertion in “The Yukon Official Gazette” unless otherwise ordered by the Governor General in Council within that period.

The Committee submit the same for approval.

JOHN J. McGEE,
48-4 Clerk of the Privy Council.

[Ref. 462,343]

AT THE GOVERNMENT HOUSE AT OTTAWA.

Monday, the 2nd day of May, 1904.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

WHEREAS section 59 of the Regulations governing Placer Mining in the Yukon Territory established by the Order in Council of the 13th March, 1901, provides for the administration of the estates of deceased minors, and application has been made to the Department of the Interior that this section of the Regulations be amended so as to provide for the administration of the estates of insane persons as well,—

Therefore the Governor General in Council is pleased, in virtue of clause 47 of The Dominion Lands Act as enacted by section 5 of chap. 15 of 55-56 Victoria, and of section 8 of The Yukon Territory Act, as enacted by section 3 of chapter 34 of 2 Edward VII, to order that section 59 of the Regulations governing Placer Mining in the Yukon Territory, hereinbefore mentioned, shall be and the same is hereby rescinded, and the following substituted in lieu thereof :—

59 (*a*). In case any miner while entered as the holder of any mining claim dies or is adjudged to be insane, the provisions as to abandonment shall not apply, in the one case, either during his last illness or after his decease, or in the other case, either after he has been so adjudged or, if it appears that the neglect or omission on account or by reason of which such claim would otherwise have been deemed to be abandoned was attributable to his insanity, during such period prior to his having been so adjudged as he shall be shown to have been insane.

(*b*). The Commissioner of the Yukon Territory may either cause the mining property of any deceased or insane person to be worked in the usual manner, or may cause the working of such property to be dispensed with for such periods as the necessity of the case may in his opinion demand; and he may also, if he sees fit, cause the Public Administrator of the Territory to take possession of such mining property until it is administered by him under the provisions of any Ordinance respecting the administration of the estates of deceased or insane persons in the Yukon Territory, now or hereafter to be made or passed, or until such mining property has been taken possession of by any person or persons entitled to take possession of it under letters of administration granted by the proper court in that behalf.

(*c*) All charges and expenses which may be incurred by the Commissioner or the Public Administrator, or by any person acting under the instructions of either of them, in or about the working of the said mining property or in taking or keeping possession thereof, shall be and remain a first charge against the same, until paid to the Commissioner or Public Administrator, as the case may be.

(86) HALIFAX HARBOUR—MCNAB ISLAND—GOVERNMENT RIFLE RANGES.

The usual annual notice has been issued by the Deputy Assistant Adjutant General of the troops in Canada, with reference to the resumption of target practice on McNab island, to begin on the 2nd May, 1904, as follows:

Owing to the extreme range of the Lee-Metford or Magazine Rifle, with which the musketry training of the troops will in future be conducted, and with a view to the better protection of the public, it has been found necessary to demarcate more clearly the area of water seawards, and to the south of above ranges, liable to be struck by spent or ricochet bullets.

This area has been marked by four spar buoys, placed at intervals between the Thrum Cap Shoal and the Eastern Passage, at a distance of three thousand yards from the stop butts. The buoys mark the extreme limits of the danger zone. The spars are painted red, and are surmounted by cross heads painted red and white.

Notice is therefore hereby given that any ship or boat passing inside these buoys, during the hours of practice, incurs serious risk, and no attempt should, under any circumstances, be made to cross the aforesaid area as long as the red flag hoisted at the south end of McNab's Island is left flying.

(102.) LAKE HURON—NORTH CHANNEL—AIRD BAY—CUTLER—RANGE LIGHTS ESTABLISHED.

The owners of the sawmill at Cutler, at the head of Aird bay, Messrs. Loveland and Stone, have established, and will hereafter maintain, two range lights to lead up to Cutler steamboat wharf. The lights are fixed red catoptric lights, shown from lanterns with reflectors. They should be visible three miles in the line of range.

The front lantern stands on the roof of the red painted freight shed on the outer end of the steamboat wharf. It is elevated twenty feet above the water.

Long.	W.	82	27	50

The back light is shown from a day beacon on the granite hill near Mr. Loveland's residence, 435 feet N. 24° E. from the front light. It is elevated about 40 feet above the water. The beacon consists of boards nailed across a mast, with inclined braces at the base, the whole whitewashed.

The two lights in one, bearing N. 24° E., lead up to the steamboat wharf in Cutler from Whalesback channel, clear of the shoals off Rykert point and Lister island on the starboard, and clear of Curran and Casgrain rocks on the port, hand.

The channel west of these rocks is perfectly safe. A straight course S. 46° W. from Cutler wharf, with Moiles mills directly ahead, gives nowhere less than 4½ fathoms.

(105) LAKE SUPERIOR, EASTERN END — OUTER PANCAKE SHOAL LOCATED.

As it was learned from Major Fisk, U.S. Corps of Engineers, that the exact position of Outer Pancake shoal was not known, Mr. W. J. Stewart, of the Canadian Hydrographic Survey, made an examination of it on the 20th May, 1904, and found it situated S. 24° 40′ W. 4$\frac{1}{12}$ miles from Coppermine point lighthouse. The depth over it is also greater than supposed, as not less than 15 feet could be found, and that over a very small area. Shoal water extends from it S. 10° W. 2400 feet to a depth of 21 feet. It is nearly a mile northeast of the position assigned to it on existing charts.

RÈGLEMENTS CONCERNANT L'EXPÉDITION DU BÉTAIL DU CANADA.

Conformément à l'autorité conférée au Gouverneur en conseil par le troisième article de l'*Acte concernant l'expédition du bétail*, les règlements suivants sont établis pour les navires faisant le transport du bétail de tout endroit ou lieu en Canada à tout port ou lieu en dehors du Canada n'étant pas un port ou lieu dans les Etats-Unis d'Amérique, ou de Terreneuve, ou de Saint-Pierre ou Miquelon, ou des Bermudes, ou des îles des Antilles, ou du Mexique, ou de l'Amérique du Sud.

Interprétation.—Dans les présents règlements l'expression " animaux " comprend les taureaux, les bœufs, les vaches et les génisses de un et deux ans, et l'expression " chevaux " comprend les juments.

DEMANDE D'INSPECTION.

No. 1. Le capitaine, propriétaire ou agent de tout navire se proposant d'embarquer du bétail pour le transporter du Canada, devra, si ce navire est sujet aux dispositions de l'acte précité, en demander l'inspection par écrit à l'inspecteur du port d'où le bétail doit être expédié, et là-dessus l'inspecteur prendra les mesures nécessaires pour inspecter le navire, et déterminer s'il est sûr, navigable et propre au transport du bétail dans le voyage projeté.

(2) Si l'inspecteur approuve le navire, il devra avertir le propriétaire, capitaine ou agent qu'il peut continuer à aménager le navire selon les exigences des

présents règlements, mais si le navire a déjà été aménagé pour le transport du bétail d'une manière incompatible avec ces règlements, l'inspecteur devra, avant d'accorder son certificat, exiger qu'il se conforme aux règlements sous tous rapports.

(3) Le bétail ne doit pas être porté sur une partie du vaisseau qui nuirait à la manœuvre convenable du vaisseau, ou au fonctionnement efficace des canots nécessaires, ou à la ventilation requise du vaisseau.

ANIMAUX ET MOUTONS.

Espace.

N° 2. Les animaux gras portés sur le pont supérieur ou tillac, devront avoir un espace de 2 pieds et 6 pouces francs de largeur sur 8 pieds francs de longueur chacun, et pas moins de 6 pieds 3 pouces de hauteur, et on ne permettra jamais de mettre plus de quatre têtes de bétail dans chaque parc, sauf au bout d'une rangée, où l'on pourra en mettre cinq ensemble ; pourvu toutefois que lorsque cinq animaux, pesant chacun 1000 livres ou moins, communément appelés " animaux d'engraissement " sont mis dans un parc au lieu de quatre animaux gras, le parc aura au moins 10 pieds 8 pouces de largeur. Les vaches pleines auront le même espace que les bœufs gras.

Dans les navires munis d'installations permanentes en fer, avec des allées d'au moins 3 pieds de largeur, et munis de moyens approuvés et suffisants de ventilation, des animaux gras pourront être transportés sur le deuxième pont dans un espace de 2 pieds 6 pouces de largeur, pourvu qu'il ne soit pas porté d'animaux sur les écoutilles. Si des animaux sont portés sur les écoutilles, l'espace pour chaque animal dans le compartiment devra être de 2 pieds 8 pouces de largeur. Les animaux portés sur le troisième pont doivent avoir dans tous les cas un espace de 2 pieds 8 pouces de largeur.

(2). Au bétail des Etats-Unis expédié d'un port quelconque en Canada, porté sur le pont supérieur ou le tillac, il sera alloué un espace de 2 pieds 6 pouces de largeur sur 8 pieds de longueur par tête, mais lorsque ce bétail des Etats-Unis est porté entre les ponts il devra avoir un espace de 2 pieds 8 pouces de largeur sur 8 pieds de longueur, sauf dans le cas de navires convenablement installés pour le transport du bétail, avec un système de ventilation suffisant, où 2 pieds 6 pouces de largeur suffiront. Il ne sera pas alloué plus de quatre (4) têtes de bétail dans chaque parc, sauf au bout d'une rangée, où il pourra en être mis cinq ensemble. Pourvu toutefois que le bétail pesant moins de 1,000 livres pourra avoir une largeur de 2 pieds 3 pouces.

(3). Les parcs pour les moutons auront au moins 7 pieds de hauteur divisés en deux compartiments égaux, et pas plus de huit ou dix moutons équivaudront à un bœuf gras, à la discrétion de l'inspecteur.

PONTS.

No. 3. Il ne sera pas transporté d'animaux sur plus de trois ponts ; et chaque pont sur lequel des animaux seront transportés seront pourvus d'une bonne ventilation tel que ci-après prescrit.

AMÉNAGEMENTS DU TILLAC OU PONT SUPÉRIEUR.

No. 4. *Epontilles en bois.*—Les épontilles devront être de bonne épinette blanche saine, mesurant pa moins que 3 x $5\frac{1}{2}$ pouces, placées à des distances convenables des cintres, contre la lisse du navire et assujéties à la lisse par un crampon de fer forgé de $\frac{5}{8}$ pouce au moins, à vis et écrou. Si le pavois est à jour le pied des épontilles devra être assujéti au moyen de pièces de remplissage de 2 x 3 pouces placés en dehors des batayoles, et à ces pièces les planches extérieures seront clouées, et le tout solidement fixé par des boulons à vis et écrou. Une pièce de 2 x 3 pouces ou une planche de 2 pouces sera fixée à l'extérieur de l'épontille et amenée jusqu'au dessous de la lisse afin de tenir l'épontille en place. Des épontilles extérieures s'élèveront assez haut pour servir d'appui à un garde-corps si la chose est nécessaire à la protection des matelots. Si les pavois sont pleins, le pied des épontilles sera assujéti par des entretoises de bon bois de 2 x 3 pouces, fixés au dos de chaque épontille. Les épontilles extérieures au-dessus des parcs seront solidement fixées à des solives de $5\frac{1}{2}$ x 2 pouces au moins, courant de l'avant à l'arrière. Les épontilles intérieures devront être placées directement en ligne avec les épontilles extérieures, et posées de façon à ce que l'épaulement de $5\frac{1}{2}$ pouces des épontilles s'étende de l'avant à l'arrière ; elles seront bien assujéties par le haut à des solives de pas moins de $5\frac{1}{2}$ x 2 pouces, courant de l'avant à l'arrière et solidement fixées par le bas au pont et plancher pour les expêcher de se soulever.

Epontilles en fer.—Elles pourront être employées au lieu des épontilles en bois, et auront un diamètre de 2 pouces au moins, fixées dans des douilles de fer en haut et en bas, avec vis et écrou.

Baux.—Les baux ou solives devront être de bon bois sain, 2 x 6 pouces, convenablement placés, et traverser d'un flanc à l'autre si c'est possible. S'il se trouve quelque construction dans le chemin, alors elles y seront solidement appuyées. Ces solives seront épaulées sur les pontilles et assujéties au moyen de courbes clouées ou autrement solidement attachées aux épontilles.

Charpentes à cornières de fer.—Des charpentes avec cornières de fer ajustées d'un flanc à l'autre sur le pont supérieur, espacées de 5 pieds, pourront remplacer les épontilles de bois et les solives.

Planches de tête ou d'appui.—Les planches de tête n'auront pas moins de $1\frac{1}{2}$ x 12 pouces, seront de bon bois sain, et solidement fixées aux épontilles du côté du parc. Pour solider la planche un double étai sera placé à chaque bout du parc. Une tige de fer d'un diamètre de $\frac{5}{8}$ de pouce passera à travers les doubles étais et la planche de tête, et sera arrêté par une vis et écrou. Dans toutes les planches de tête il sera percé des trous à des distances convenables pour attacher les animaux.

Planches de pied.—Les planches de pied seront des mêmes matériaux que celles de tête, bien clouées aux étais en dedans.

Planches de séparation.—Les planches de séparation seront de bon bois sain, de $1\frac{1}{2}$ x 12 pouces, ajustées perpendiculairement, et arrangées de façon à séparer les animaux en parcs de quatre, ou de cinq au bout de la rangée

Plancher.—Le plancher du pont sera fait de planches saines de 1 pouce, posées de l'avant à l'arrière sur des voliges de 2 x 3 pouces placées en travers sur le pont a 18 pouces de distance, et le tout bien cloué. Là où de gros animaux sont parqués, le plancher devrait être plus épais.

Les propriétaires de navires peuvent soit permettre qu'un doublage soit posé sur les ponts de bois, ou que les arrête-pieds soient fixés au pont, mais pour les ponts en fer il faut absolument les doubler en bois. On peut employer du ciment au lieu du doublage en bois, avec des arrête-pieds moulés dans le ciment.

Arrête-pieds.—Les arrête-pieds seront de bonne épinette blanche ou de pin, ou de bois dur, $1\frac{1}{2}$ x 3 pouces, posés de l'avant à l'arrière, bien assujétis au doublage ou pont, espacés de 17, 16, 22 et 16 pouces (le premier à 17 pouces de l'auge) cloués, si c'est possible, avec du clou de 4 pouces à des traversins et renforcés par des pièces semblables placées en travers de 18 pouces en 18 pouces et clouées aux traversins.

Bordage extérieur.—Tout le bordage extérieur des navires à pavois pleins ou à jour devra être bien posé de l'avant à l'arrière, et cloué au dos des épontilles, et recouvert de voliges après le 1er novembre. Pour cet objet on ne se servira que d'épinette blanche ou de pin de $1\frac{1}{4}$ pouce.

Planchéiage des abris construits sur le tillac.—Les planches pour cet objet seront de bon bois d'un pouce sur douze pouces de largeur ou moins posées sur des traverses, avec un espace de 4 pouces entre les planches ; dans cet espace sera placé un bloc de 4 x 1 pouce aux pièces d'avant et de derrière ainsi qu'aux traverses de façon à mieux appuyer la deuxième couverture qui sera de planches des mêmes dimensions, posées sur les ouvertures de 4 pouces du plancher de dessous.

AMÉNAGEMENT DU FRANC-TILLAC OU PONT INFÉRIEUR.

Epontilles.—Les épontilles seront de bonne épinette blanche de 3 x $5\frac{1}{2}$ pouces au moins, posées à telle distance du cintre que leur épaulement de 5¼ pouces s'étende de l'avant à l'arrière et soit bien serré entre les deux ponts, bien entretoisé du haut et d'un flanc à l'autre du navire ; cet entretoisement sera en épinette blanche ou pin de 2 x 3 pouces, et bien appuyé contre chaque épontille. Si pour quelque raison, telle que des écoutilles, etc., on trouvait impossible de faire courir ces entretoises d'un flanc à l'autre, alors on placera ces entretoises aux surbaux des écoutilles ou autres constructions. Les têtes de ces épontilles seront renforcées de l'avant à l'arrière par des pièces de 2 x 3 pouces bien clouées à chaque épontille et courant de l'avant à l'arrière jusqu'au bord inférieur des baux du navire, et s'arc-bouteront à chaque bout du compartiment, ou seront coincés en dessous et bien cloués à la tête des épontilles. Si les ponts supérieurs et inférieurs sont de bois alors les épontilles entre les ponts pourront être assujéties en haut et bas par des taquets.

Les planches de tête, de pied et de séparation, plancher et arrête-pieds seront des mêmes dimensions que pour le pont supérieur, et assujétis de la même manière, et des trous y seront pratiqués pour attacher les animaux.

Auges.—Que ce soit sur le tillac ou le franc-tillac de bons auges d'environ 12 pouces de largeur, seront pratiqués sur la planche de fond, si c'est nécessaire. Les auges pour les moutons devront être bien étanches.

Entourage de l'appareil à gouverner.—Une couverture convenable devra être mise sur l'appareil du gouvernail, lorsque nécessaire.

ALLÉES.

Les allées en front et entre les parcs servant à nourrir et abreuver les animaux doivent avoir une largeur de trois pieds, sauf aux bouts des allées dans la proue et la poupe du navire, et là où se trouvent des obstacles de moins de trois pieds de longueur la largeur sera réduite à un minimum de dix-huit pouces ; les allées en front et entre les parcs servant à nourrir et abreuver les chevaux doivent avoir une largeur minimum de trois pieds. Deux allées transversales ou plus, d'au moins dix-huit pouces de largeur doivent être laissées de chaque côté du pont de façon à ce que les dalots soient faciles d'accès et tenus libres. Pour les moutons, des allées transversales d'au moins dix-huit pouces francs de largeur seront laissées entre les parcs et des allées d'avant en arrière trois pieds de largeur en front de chaque parc, sauf qu'aux obstacles et aux bouts des allées, tel que prescrit pour les animaux, la largeur minimum peut être de dix-huit pouces. Lorsque les moutons sont parqués en deux étages, la largeur minimum des allées d'avant et d'arrière à la poupe et à la proue sera de deux pieds libres de toute obstruction. Un espace suffisant sera laissé aux côtés des écoutilles pour permettre d'atteindre facilement au fourrage dans la cale. Il ne sera pas placé ou arrimé de nourriture dans les allées.

VENTILATION.

No. 5. Chaque compartiment qui contient des animaux devra avoir au moins quatre ventilateurs à embouchures évasées, d'un diamètre de pas moins de 18 pouces à l'intérieur, et excédant 7 pieds de hauteur, deux situés à chaque bout du compartiment, ou aura quelque autre système de ventilation que l'inspecteur approuvera, mais dans tous les cas le vaisseau devra toujours être muni d'éventails mus par la vapeur pour fournir une bonne ventilation au bétail.

No. 6. Il ne sera pas embarqué de bétail par les allées le long de la chambre de la machine, à moins que les côtés de la dite chambre de la machine ne soient recouverts de planches d'un pouce, laissant un espace vide de 3 pouces.

No. 7. Il ne sera pas chargé d'animaux sur les écoutilles des ponts au-dessus d'autres animaux ; il ne sera pas non plus chargé de marchandise, de fret ou de nourriture pour le bétail sur les dites écoutilles, mais ces écoutilles seront toujours tenues libres ; mais du bétail pourra être mis sur la plus basse écoutille, pourvu qu'il soit toujours laissé sur cette écoutille un espace libre de 12 pieds carrés ; et il ne sera porté sur aucune partie du navire aucun bétail qui, dans le cours ordinaire de la navigation, pourrait gêner la manœuvre du navire ou des chaloupes.

DIVERS.

No. 8. Sous le pont il sera fourni un endroit convenable pour arrimer la nourriture des animaux ; mais du foin jusqu'à concurrence de 50 livres pour chaque tête de bétail, pour consommation sur le fleuve et le golfe Saint-Laurent, pourra être placé sur le pont, bien couvert ; et ce foin sera le premier employé. L'inspecteur devra s'assurer que la nourriture et l'eau pour le bétail sont de qualité et en quantité suffisantes. Le foin devra être en ballots et le grain en sacs, et les ballots et les sacs devront être marqués lisiblement du nom de la personne qui expédie le bétail pour lequel la nourriture est destinée, et l'expéditeur fournira à l'inspecteur un état de la quantité de foin et de grain fournie par lui, et le nombre d'animaux embarqués par lui pour le voyage projeté.

No. 9. Tous les navires porteront pas moins de 4 futailles d'une capacité de 100 gallons pour chaque 100 têtes de bétail, et ces futailles seront emplies de bonne eau fraîche avant de partir, et remplies aussitôt qui vidées, à moins que le navire ne soit muni de tuyaux à eau convenablement placés et munis de robinets pour abreuver le bétail.

No. 10. Les expéditeurs de bétail seront tenus de fournir un contremaître et des aides afin de prendre soin des animaux à bord, et il y aura trois aides, y compris le contremaître, pour chaque 100 têtes de bétail expédiées sur des steamships ayant des tuyaux à l'eau courant sur toute la longueur des deux côtés des compartiments, mais sur les steamships qui ne sont pas ainsi aménagés, il y aura quatre aides, y compris le contremaître, pour chaque 100 animaux expédiés. Les expéditeurs seront tenus d'avertir l'inspecteur, au moins 12 heures avant le départ du navire, du nom du contremaître qui doit prendre charge de leur consignation et des noms des aides, et doivent fournir à l'inspecteur une preuve satisfaisante de leur sobriété, expérience, habileté et bonne conduite générale ; et chaque contremaître et aide signera l'engagement de bord avant que le navire parte pour son voyage, et sera soumis à l'autorité du capitaine ; et l'inspecteur veillera à ce que les dispositions pour la nourriture et le couchage du contremaître et des aides soient d'aussi bonne qualité que pour l'équipage du navire. Chaque engagement de bord signé par le contremaître et ses aides indiquera clairement les gages qui seront payés à chacun. Le contremaître et ses aides devront se présenter à l'inspecteur au moins six heures avant le départ du navire.

No. 11. Les animaux seront attachés avec des cordes d'au moins ⅝ pouce de diamètre, et ces cordes ne serviront qu'une fois.

No. 12. Les faux ponts sur lesquels le bétail pourra être chargé, seront enlevés et le fumier nettoyé avant que le navire reçoive une autre cargaison d'animaux.

No. 13. Si l'inspecteur trouvait que quelques-uns des aménagements sont usés, pourris ou ne paraissent pas sûrs, il pourra les faire remplacer avant d'acquitter le navire. Il surveillera aussi le chargement du bétail, et verra à ce qu'il soit bien arrimé et attaché, et que toutes les dispositions des présents règlements soient accomplies.

No. 14. Il devra y avoir à bord des condenseurs d'eau en bon état de fonctionnement, et capables de fournir huit gallons d'eau fraîche toutes les vingt-quatre heures pour chaque tête de bétail à bord, que le navire soit muni de réservoirs à eau comme lest ou non.

No. 15. Aucun bétail ne sera embarqué avant que le chargement de la cargaison n'ait été complété, sauf du consentement de l'inspecteur donné par écrit.

No. 16. L'arrière des parcs sera doublé de planches d'un pouce sur une hauteur de quatre pieds, clouées, au dos des épontilles à l'intérieur, faisant l'arrière des parcs unis et lisses, si l'inspecteur le juge nécessaire.

No. 17. Tout l'ouvrage doit être bien cloué, et solidement assemblé, et à la satisfaction de l'inspecteur.

No. 18. Si le navire n'est pas éclairé à l'électricité, l'inspecteur devra voir à ce que des fanaux suffisants soient fournis pour éclairer entre les ponts, lorsque du bétail est transporté.

No. 19. Il faudra laisser des passages libres pour atteindre les dalots et les tenir nets.

No. 20. Tout différend s'élevant en vertu des présents règlements au sujet de la santé, la sûreté et transport sûr du bétail sera référé au ministre de la Marine et des Pêcheries, qui pourra décider l'affaire ; ou bien le ministre pourra le référer à toute personne qu'il jugera compétente, et dans l'un et l'autre cas la décision du ministre ou de cette personne sera finale.

No. 21. Pour la meilleure protection de la santé du bétail, nul bétail ou chevaux ne seront pris à bord, sauf des animaux ou des chevaux qui ont été inspectés et trouvés sains par un inspecteur vétérinaire dûment nommé par le gouvernement.

No. 22. Les chevaux ne seront pas pris à bord avant que le chargement de la cargaison ne soit complété, à moins que le consentement par écrit de l'inspecteur n'ait été obtenu de faire le contraire.

(2). Les stalles pour les chevaux n'auront pas moins de deux pieds six pouces francs de largeur pour les chevaux pesant 1,200 livres ou moins. Pour les chevaux dépassant 1,200 livres la stalle aura au moins deux pieds huit pouces francs. La stalle aura dans chaque cas huit pieds de profondeur.

(3). Les matériaux employés dans la construction des stalles et aménagements seront solides et auront les dimensions que l'inspecteur jugera nécessaires.

(4). L'inspecteur veillera à ce qu'un approvisionnement suffisant de bonne nourriture soit mis à bord du vaisseau pour chaque cheval et que des arrangements propices soient faits pour avoir un approvisionnement d'eau fraîche, de façon à ne pas employer d'eau condensée. Les rations seront d'au moins 15 livres de foin, 7 livres de son et 3 livres d'avoine pour chaque cheval par jour, et l'inspecteur pourra refuser de délivrer le certificat rendu nécessaire par le susdit acte, tant que l'inspecteur ne sera pas satisfait quant à la quantité et la qualité de la nourriture mise à bord pour les chevaux.

(5). Les expéditeurs de chevaux seront tenus de fournir des aides pour prendre soin des chevaux à bord, et il y aura un aide pour chaque dix-huit chevaux expédiés. Les expéditeurs sont tenus de notifier à l'inspecteur, au moins douze heures avant le départ du navire, les noms des aides, et doivent fournir à l'inspecteur une preuve satisfaisante de leur sobriété, expérience, habileté et bonne conduite générale ; et chaque aide signera le rôle de l'équipage avant que le navire parte pour son voyage, et sera soumis à l'autorité du capitaine ; et l'inspecteur veillera à ce que les dispositions pour la nourriture et le couchage des aides soient aussi bonnes que celles prises pour l'équipage du navire. Chaque engagement de bord signé par les aides indiquera clairement les gages devant être payés à chacun. Les aides devront se présenter à l'inspecteur au moins six heures avant le départ du navire.

CONSIDÉRANT que l'on a fait voir l'urgente nécessité de mieux protéger la pêche des huîtres en prolongeant la saison défendue, et en augmentant la dimension des huîtres :—

A ces causes, il plaît au Gouverneur général d'ordonner que l'article 4 des Règlements de pêche des huîtres établis par arrêté en conseil du 28 décembre 1893, tel que modifié par l'arrêté en conseil du 13 septembre 1901, et l'article 6 des Règlements de pêche des huîtres du 28 décembre 1893, soient et ils sont par le présent rescindés, et remplacés par ce qui suit :—

"4. Il est défendu de pêcher, prendre, tuer, acheter, vendre ou d'avoir en sa possession des huîtres entre le 21e jour de mai et le 22e jour de septembre de chaque année, ces deux jours inclusivement :—Pourvu que cette défense viendra en vigueur à Richmond, Ile du Prince-Edouard le 21e jour de mai 1904, et ailleurs le 21e jour de mai 1905".

"6. Personne ne pêchera, prendra, achètera, vendra, ou aura en sa possession des huîtres rondes dont l'écaille aura moins de trois pouces de diamètre et des huîtres longues dont l'écaille extérieure aura moins de trois pouces et demi.

"Les huîtres rondes de trois pouces de diamètre et les huîtres longues dont l'écaille extérieure mesure moins de trois pouces et demi, qui seront prises par accident, seront remises à l'eau vivante, aux frais et risque de la personne pêchant ainsi, à qui incombera dans chaque cas la preuve de cette libération.

"Pourvu toujours que les personnes portant des licences de pêche pourront obtenir du ministre de la Marine et des Pêcheries, la permission de pêcher et de prendre de petites huîtres pour établir ou peupler des huîtrières".

SUR un rapport daté le 28 d'avril 1904, du ministre de l'Intérieur, énonçant qu'en vertu d'un arrêté en conseil daté le 30 décembre 1898, certaines terres furent mises à part conformément aux dispositions de l'article 31 de l'*Acte des terres fédérales* pour les fins de l'école industrielle des Sauvages à Elkhorn, dans la province du Manitoba, et que dans les terres se trouve le quart sud-ouest de la section 4, township 12, rang 28 à l'ouest du premier méridien, sauf et excepté les quatre acres et un cinquième de terre compris dans le droit de la Compagnie de chemin de fer Canadien du Pacifique de passer sur le dit quart de section.

Le Ministre dit de plus que depuis la date du susdit arrêté en conseil un arrangement a été conclu avec la Compagnie de chemin de fer Canadien du Pacifique à l'effet que du moment que la compagnie cèderait à la Couronne pour les fins scolaires ci-dessus mentionnées vingt acres de l'angle nord-est du quart nord-ouest de la section 33, township 11, rang 28, à l'ouest du premier méridien, comprenant la moitié nord de la subdivision légale 14 requis comme terre à foin attachée à l'école, le ministère des Affaires des Sauvages paierait à la compagnie la somme de $150, et que la compagnie recevrait de la Couronne un octroi de toute cette partie de l'angle nord-est du quart sud-ouest de la dite section 4, township 12, rang 28 à l'ouest du premier méridien, dont a besoin la compagnie comme fosse à gravier, et contenant 4.28 acres.

Le Ministre recommande, une fois les conditions remplies de part et d'autre, qu'il soit autorisé à délivrer à la Compagnie de chemin de fer Canadien du Pacifique, des lettres patentes pour cette partie du quart sud-ouest de la section 4, township 12, rang 28 à l'ouest du premier méridien, ci-dessus mentionné, dont a besoin la compagnie comme fosse à gravier, et décrit comme suit :—

Commençant à l'intersection de la limite est du dit quart de section avec la limite nord-est du droit de passage du chemin de fer Canadien du Pacifique, de là dans une direction nord le long de la dite limite est jusqu'à la limite nord du dit quart de section, de là dans une direction ouest le long de la dite limite nord jusqu'à son intersection avec la limite nord-est du dit droit de passage, de là S. 49° 51′ E., le long de la dite limite nord-est jusqu'au point de départ, contenant quatre acres et vingt-huit centièmes plus ou moins, tel que coloré rose sur le plan, et que la dite moitié nord de la subdivision légale 14 de la section 33, township 11, rang 28 à l'ouest du premier méridien soit mis à part en vertu de l'article 31 de l'*Acte des terres fédérales* pour l'usage de l'école industrielle des Sauvages à Elkhorn, Manitoba.

Le comité soumet ce qui précède à l'approbation.

AVIS AUX NAVIGATEURS.

No. 37 de 1903.

(*Avis de l'Atlantique No.* 24.)

QUÉBEC.

(96) FLEUVE ST-LAURENT—CHENAL DES NAVIRES ENTRE QUÉBEC ET MONTRÉAL—SOREL—CABLES POSÉS POUR FINS EXPÉRIMENTALES—AVERTISSEMENT.

Ce ministère est à faire des expériences dans le fleuve Saint-Laurent vis-à-vis Sorel avec une invention électrique pour guider les vaisseaux dans les chenaux étroits.

Deux lignes parallèles de câble seront posées cette semaine, longeant la ligne du rivage dans le voisinage de la pointe de Sorel, sur une distance d'à peu près 2 milles. Ces lignes de câble seront à des distances d'à peu près 500 et 1,000 pieds du rivage respectivement. Elles ne seront pas dans le chenal des navires.

Les vaisseaux sont avertis de ne pas mouiller en deçà d'un demi-mille du rivage de la pointe de Sorel tant que dureront ces expériences.

De petites bouées marqueront la position des câbles, et des enseignes seront placées sur le rivage.

On espère que rien ne sera fait pour gêner ces expériences, qui ont lieu dans l'intérêt de la navigation.

ORDERS IN COUNCIL.

[Ref. 898,726.]

AT THE GOVERNMENT HOUSE AT OTTAWA.

Monday, the 30th day of May, 1904.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

WHEREAS Mr. Cyrus Litle who holds homestead entry for the South-east quarter of Section 36, Township 10, Range 27, west of the Fourth Meridian, has made application to purchase that portion of the South-west quarter of the same section adjoining his homestead, which lies east of Willow Creek, and contains 74.35 acres, as shown on the tracing appended hereto, and which quarter section was, under authority of the Order in Council of the 23rd January, 1896, amongst other lands reserved for stock-watering purposes ;

And whereas Mr. W. W. Stuart, the Inspector of Ranches, has examined the locality and reports that the sale of the land applied for by Mr. Litle would not materially affect the utility of the water reserve at that point,—

Therefore the Governor General in Council is pleased to order that that portion of the South-west quarter of Section 23, Township 10, Range 27, west of the Fourth Meridian lying east of Willow Creek, shall be and the same is hereby withdrawn from the stock watering reserve authorized by the above mentioned Order in Council of the 23rd January, 1896, and that the Minister of the Interior be authorized to sell the land so withdrawn to Mr. Litle at the regulation price of $3.00 per acre, and on the usual terms of payment, namely, one-fourth down, and the balance in three equal annual instalments with interest at 5% per annum.

AT THE GOVERNMENT HOUSE AT OTTAWA.

Monday, the 18th day of April, 1904.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 14th April, 1904, from the Minister of the Interior, submitting with reference to the Order in Council of the 30th January, 1904, and to previous Orders in Council of the 27th May and 30th June, 1903, with respect to an investigation to be made by Mr. Justice Britton and Mr. Benjamin Taylor A. Bell, as Commissioners, into certain matters in the Yukon Territory, that on the 18th March last, one of the Commissioners, Mr. Bell, met with an unfortunate accident which resulted in his death on the first April instant.

The Minister states that the Commissioners had shortly after their appointment proceeded to the Yukon Territory and taken much evidence there, but, as appears in the Order in Council of 30th January, it was then proposed to continue the enquiry at Ottawa and elsewhere in Canada in order to secure the evidence of many important witnesses not resident in the Territory.

The Minister recommends that a supplementary Commission be issued to Mr. Justice Britton authorizing him to continue and complete the investigation as sole Commissioner with all the powers conferred upon the Commissioners by former Orders in Council and the Commission issued thereunder, and that he be required to report to the Secretary of State the result of the whole investigation and any opinions he may see fit to express as to the matters which have been the subjects thereof.

The Committee submit the same for approval.

JOHN J. McGEE,
50–4 Clerk of the Privy Council.

12. The sale and export of speckled trout, black bass and maskinonge, is hereby prohibited for a period of five years from the date of this Order in Council, provided, however, that any person from a foreign country, fishing in the waters of the Province, and applying and paying for an Angler's permit, may, upon leaving the Province, when the same are accompanied by him, take with him the lawful catch of two days fishing.

[Ref. 462,029.]

AT THE GOVERNMENT HOUSE AT OTTAWA.

Tuesday, the 26th day of April, 1904.

PRESENT:

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 6th April, 1904, from the Minister of the Interior, stating that on the 17th day of October, 1903, the Mining Recorder at Dawson granted to Mrs. Ellen Acklen and Mr. Douglas S. Mackenzie the right to divert 5,000 miner's inches of the unentered and unappropriated waters of the Left Fork of Twelve Mile River, a tributary of the Yukon River, for use on certain placer mining claims situated on the Right Limit of the Klondike River near its mouth, in accordance with the provisions of the Regulations for the diversion and use of water in the Yukon Territory, established by the Order in Council of the 3rd day of August, 1898.

The Minister observes that by an Order in Council dated the 7th of December, 1901, the right of the owner of a ditch or water privilege to dispose of the water covered by his grant was rescinded, but the grantees in this case have applied for the right to sell whatever quantity of the water included in their grant may not be required for working the claims to which the said grant is appurtenant and the Government Mining Engineer has recommended that this application be granted upon certain terms and conditions, which recommendation has been approved by the Commissioner of the Yukon Territory.

The Minister recommends, as portions of the territory upon which the applicants desire to distribute a portion of the water included in this grant, namely, Bonanza, Bear and Hunker Creeks, have not a sufficient water supply to work the gold-bearing areas thereof during the greater part of the year, that he be authorized to permit the applicants in this case to sell and distribute for mining purposes on Bonanza, Bear and Hunker Creeks and their several tributaries, the water to which they are entitled under the above grant, upon the following terms and conditions :—

1. That within one year from the date upon which the grant was made the grantees shall expend on the work required for the diversion of the water not less than $5,000.00 and shall satisfy the Minister of the Interior through and by the Government Mining Engineer, that not less than this amount has been expended in *bona fide* construction work in connection with their grant.

2. That the grantees shall prosecute the construction of their water scheme with reasonable diligence to the satisfaction of the Minister of the Interior, and shall complete all the works necessary for the diversion of the full amount of 5,000 miner's inches not later than the 17th day of October, 1907.

3. That the price to be charged for the water which the grantees may be permitted to dispose of shall be at a rate to be fixed by the Governor General in Council, the grantees, however, not to be compelled to make, at their own expense, connections for the delivery of water from the main pipe to any claim or claims, the owners of which may wish to be supplied with water for mining purposes from their works.

4. That if the grantees fail to comply with any of the terms and conditions above provided, of which failure the Minister of the Interior shall be the sole and final judge, their right to dispose of any portion of the water included in their grant will immediately be cancelled.

The Minister further recommends that the present Order in Council shall come into force sixty days after its first insertion in "The Yukon Official Gazette" unless otherwise ordered by the Governor General in Council within that period.

The Committee submit the same for approval.

JOHN J. McGEE,
Clerk of the Privy Council.

[Ref. 889,964]

AT THE GOVERNMENT HOUSE AT OTTAWA.

Thursday, the 5th day of May, 1904.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 28th April, 1904, from the Minister of the Interior, stating that under the authority of an Order in Council dated the 30th December, 1898, certain lands were set apart under the provisions of clause 31 of the Dominion Lands Act for the purposes of the Indian Industrial School at Elkhorn, in the Province of Manitoba, amongst which lands was the South-west quarter of Section 4, Township 12, Range 28 west of the First Meridian, saving and excepting therefrom the four and one fifth acres of land comprised in the Canadian Pacific Railway Company's right of way through such quarter-section.

The Minister further states that since the date of the above mentioned Order in Council it has been arranged with the Canadian Pacific Railway Company that upon the company surrendering to the Crown for the purposes of the above mentioned school twenty acres out of the north-east corner of the north-west quarter of Section 33, Township 11, Range 28, west of the First Meridian, comprising the north half of legal subdivision 14, required as hay land in connection with the School, the Department of Indian Affairs would pay to the company the sum of $150.00, and that the company would receive from the Crown a grant of all that portion of the north-east corner of the South-west quarter of the said section 4, Township 12, Range 28, west of the First Meridian, required by the company as a gravel pit, and containing 4.28 acres.

The Minister recommends, the above cited conditions having been carried out on both sides, that he be authorized to issue to the Canadian Pacific Railway Company, letters patent for that portion of the South-west quarter of Section 4, Township 12, Range 28, west of the First Meridian, above mentioned, required by the company as a gravel pit, and described as follows :—

"Commencing at the intersection of the easterly "limit of the said quarter-section with the north "easterly limit of the right of way of the Canadian "Pacific Railway, thence north along the said easterly "limit to the northerly limit of said quarter-section, "thence west along said northerly limit to its inter-"section with the north-easterly limit of the said right "of way, thence S. 49° 51′ E. along said north-easterly "limit to the point of beginning, containing four and "twenty-eight hundredths acres more or less."

as shown coloured pink on the sketch hereto attached, and that the said north half of legal subdivision 14 of Section 33, Township 11, Range 28, west of the First Meridian be set aside under section 31 of The Dominion Lands Act for the use of the Indian Industrial School at Elkhorn, Manitoba.

The Committee submit the same for approval.

Clerk of the Privy Council.

NOVA SCOTIA.

(86) Halifax harbour—McNab island—Government rifle ranges.

The usual annual notice has been issued by the Deputy Assistant Adjutant General of the troops in Canada, with reference to the resumption of target practice on McNab island, to begin on the 2nd May, 1904, as follows:

Owing to the extreme range of the Lee-Metford or Magazine Rifle, with which the musketry training of the troops will in future be conducted, and with a view to the better protection of the public, it has been found necessary to demarcate more clearly the area of water seawards, and to the south of above ranges, liable to be struck by spent or ricochet bullets.

This area has been marked by four spar buoys, placed at intervals between the Thrum Cap Shoal and the Eastern Passage, at a distance of three thousand yards from the stop butts. The buoys mark the extreme limits of the danger zone. The spars are painted red, and are surmounted by cross heads painted red and white.

Notice is therefore hereby given that any ship or boat passing inside these buoys, during the hours of practice, incurs serious risk, and no attempt should, under any circumstances, be made to cross the aforesaid area as long as the red flag hoisted at the south end of McNab's Island is left flying.

The following is the present arrangement :—

Lighthouse point.—Buoys are placed off the point of the island to mark the bank to the south and southwest of Lighthouse point as follows :—

A can buoy, painted red, No. 12, on the west point of the bank, from which the lighthouse bears N. 65° E.

The buoys are in 7 fathoms water, except No. 12, which is in 3 fathoms. It is not safe for vessels to go inside of them as the bank rises very abruptly.

Western channel.—A spar buoy, painted red, on the starboard side of the channel, stands in 12 feet of water, distant 200 feet westerly from the west end of the breakwater ; a spar buoy, painted red, stands in 13 feet of water distant 620 feet southwesterly from the west end of the breakwater. Vessels should enter the harbour in the prolongation of the channel and not attempt to come inside of the piles or lights above mentioned.

The works at the east end of the harbour now extend 4,500 feet east of the present breakwater; these works are marked by four rows of piles at intervals of 1,000 feet, by a pier covered by large stone at the west extremity, and by buoys carrying red lights near both extremities. (102.) LAKE HURON—NORTH CHANNEL—AIRD BAY—CUTLER—RANGE LIGHTS ESTABLISHED.

The owners of the sawmill at Cutler, at the head of Aird bay, Messrs. Loveland and Stone, have established, and will hereafter maintain, two range lights to lead up to Cutler steamboat wharf. The lights are fixed red catoptric lights, shown from lanterns with reflectors. They should be visible three miles in the line of range.

The front lantern stands on the roof of the red painted freight shed on the outer end of the steamboat wharf. It is elevated twenty feet above the water.

Long.	W.	82	27	50

The back light is shown from a day beacon on the granite hill near Mr. Loveland's residence, 435 feet N. 24° E. from the front light. It is elevated about 40 feet above the water. The beacon consists of boards nailed across a mast, with inclined braces at the base, the whole whitewashed.

The two lights in one, bearing N. 24° E., lead up to the steamboat wharf in Cutler from Whalesback channel, clear of the shoals off Rykert point and Lister island on the starboard, and clear of Curran and Casgrain rocks on the port, hand.

The channel west of these rocks is perfectly safe. A straight course S. 46° W. from Cutler wharf, with Moiles mills directly ahead, gives nowhere less than 4½ fathoms.

(105) LAKE SUPERIOR, EASTERN END — OUTER PANCAKE SHOAL LOCATED.

As it was learned from Major Fisk, U.S. Corps of Engineers, that the exact position of Outer Pancake shoal was not known, Mr. W. J. Stewart, of the Canadian Hydrographic Survey, made an examination of it on the 20th May, 1904, and found it situated S. 24° 40′ W. $4\frac{11}{12}$ miles from Coppermine point lighthouse. The depth over it is also greater than supposed, as not less than 15 feet could be found, and that over a very small area. Shoal water extends from it S. 10° W. 2400 feet to a depth of 21 feet. It is nearly a mile northeast of the position assigned to it on existing charts.

SUR un rapport daté le 28 d'avril 1904, du ministre de l'Intérieur, énonçant qu'en vertu d'un arrêté en conseil daté le 30 décembre 1898, certaines terres furent mises à part conformément aux dispositions de l'article 31 de l'*Acte des terres fédérales* pour les fins de l'école industrielle des Sauvages à Elkhorn, dans la province du Manitoba, et que dans les terres se trouve le quart sud-ouest de la section 4, township 12, rang 28 à l'ouest du premier méridien, sauf et excepté les quatre acres et un cinquième de terre compris dans le droit de la Compagnie de chemin de fer Canadien du Pacifique de passer sur le dit quart de section.

Le Ministre recommande, une fois les conditions remplies de part et d'autre, qu'il soit autorisé à délivrer à la Compagnie de chemin de fer Canadien du Pacifique, des lettres patentes pour cette partie du quart sud-ouest de la section 4, township 12, rang 28 à l'ouest du premier méridien, ci-dessus mentionné, dont a besoin la compagnie comme fosse à gravier, et décrit comme suit :—

Commençant à l'intersection de la limite est du dit quart de section avec la limite nord-est du droit de passage du chemin de fer Canadien du Pacifique, de là dans une direction nord le long de la dite limite est jusqu'à la limite nord du dit quart de section, de là dans une direction ouest le long de la dite limite nord jusqu'à son intersection avec la limite nord-est du dit droit de passage, de là S. 49° 51′ E., le long de la dite limite nord-est jusqu'au point de départ, contenant quatre acres et vingt-huit centièmes plus ou moins, tel que coloré rose sur le plan, et que la dite moitié nord de la subdivision légale 14 de la section 33, township 11, rang 28 à l'ouest du premier méridien soit mis à part en vertu de l'article 31 de l'*Acte des terres fédérales* pour l'usage de l'école industrielle des Sauvages à Elkhorn, Manitoba.

APPOINTMENTS.

DEPARTMENT OF THE SECRETARY OF STATE OF CANADA.

HIS EXCELLENCY THE GOVERNOR GENERAL has been pleased to make the following appointment, viz. :—

OTTAWA, 13th June, 1904.

DÉSIRÉ VÉSINA, of Isle-aux-Grues, in the Province of Quebec : to be Wharfinger of the Government wharf at Isle-aux-Grues, in the Province aforesaid.

DESPATCHES, ETC.

AT THE COURT AT BUCKINGHAM PALACE,

The 29th day of January, 1904.

PRESENT :

THE KING'S MOST EXCELLENT MAJESTY IN COUNCIL.

WHEREAS by an Order in Council dated the 5th day of May 1873, after reciting that by "The Merchant Shipping Act Amendment Act, 1862," it was enacted that, whenever it was made to appear to her late Majesty that the rules concerning the measurement of tonnage of merchant ships for the time being in force under the principal Act, had been adopted by the Government of any foreign country, and were in force in that country, it should be lawful for Her Majesty, by Order in Council, to direct that the ships of such foreign country should be deemed to be of the tonnage denoted in their certificates of registry or other national papers, and thereupon it should no longer be necessary for such ships to be remeasured in any port or place in Her Majesty's dominions, but such ships should be deemed to be of the tonnage denoted in the certificates of registry or other papers, in the same manner, to the same extent, and for the same purposes, in, to, and for which the tonnage denoted in the certificates of registry of British ships was to be deemed the tonnage of such ships, and reciting that it had been made to appear to Her Majesty that the rules concerning the measurement of tonnage of merchant ships then in force under "The Merchant Shipping Act, 1854," had been adopted by the President of the French Republic, and were in force in the French dominions, Her Majesty was thereby pleased, by and with the advice of Her Privy Council, to direct that the ships of France, the certificates of French nationality and registry of which were dated on or after the first day of June, one thousand eight hundred and seventy-three, should be deemed to be of the tonnage denoted in the said certificates of French nationality and registry.

And whereas the "Merchant Shipping Act Amendment Act, 1862," was repealed by the "Merchant Shipping Act, 1894," but by section 745 of the latter Act it is amongst other things provided that any Order in Council made under any enactment thereby repealed shall continue in force as if it had been made under the said Act of 1894 :

And whereas by section 84 of the "Merchant Shipping Act, 1894," it is enacted as follows :—

84. (1) Whenever it appears to Her Majesty the Queen in Council that the tonnage regulations of this Act have been adopted by any foreign country, and are in force there, Her Majesty in Council may order that the ships of that country shall, without being remeasured in Her Majesty's dominions, be deemed to be of the tonnage denoted in their certificates of registry or other national papers, in the same manner, to the same extent, and for the same purposes as the tonnage denoted in the certificate of registry of a British ship is deemed to be the tonnage of that ship.

(2) Her Majesty in Council may limit the time during which the Order is to remain in operation, and make the Order subject to such conditions and qualifications (if any) as Her Majesty may deem expedient, and the operation of the Order shall be limited and modified accordingly.

(3) If it is made to appear to Her Majesty that the tonnage of any foreign ship, as measured by the rules of the country to which she belongs,

> materially differs from that which would be her tonnage if measured under this Act, Her Majesty in Council may order that, notwithstanding any Order in Council for the time being in force under this section, any of the ships of that country may, for all or any of the purposes of this Act, be remeasured in accordance with this Act.

And whereas by section 30 of the Interpretation Act, 1889, it is enacted that in that Act and in every other Act whether passed before or after the commencement of that Act references to the Sovereign reigning at the time of the passing of the Act or to the Crown shall unless the contrary intention appears be construed as references to the Sovereign for the time being and that Act shall be binding on the Crown :

And whereas it has been made to appear to His present Majesty that the tonnage of French ships as measured by the rules concerning the measurement of tonnage of merchant ships of France materially differs from that which would be the tonnage of such ships if measured under the "Merchant Shipping Act, 1894":

Now, therefore, His Majesty in Council doth order that notwithstanding the hereinbefore recited Order in Council dated the 5th day of May, 1873, any of the ships of France may for all or any of the purposes of the "Merchant Shipping Act, 1894" be remeasured in accordance with the said Act.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

WHEREAS by Section 11 of the Regulations governing the disposal of timber on Dominion Lands in Manitoba, the North West Territories and within the Railway Belt in the Province of British Columbia it is provided that an actual settler may be granted a permit without competition to cut timber for his own use upon payment of the following dues :—

Building logs of pine, spruce, tamarac and any other wood unenumerated	1 cent per lineal ft.
Building logs of oak, elm, ash or maple	1½ cts. per lineal ft.

Square timber and saw logs of oak	$3.00 per M. ft. B.M.

The above mentioned dues are for both green and dry timber.

Therefore the Governor General in Council is pleased to order, and it is hereby ordered as follows :

If settlers request the Department of the Interior to allow them to cut dry timber upon certain described lands, an inspection thereof shall be made, and if it is considered advisable to allow the timber to be cut, permission shall be given to settlers to cut the same by paying dues at the rate of 25 cents per thousand feet B. M., such cutting to be done under the immediate supervision of an officer of the said Department.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 14th April, 1904, from the Minister of the Interior, submitting with reference to the Order in Council of the 30th January, 1904, and to previous Orders in Council of the 27th May and 30th June, 1903, with respect to an investigation to be made by Mr. Justice Britton and Mr. Benjamin Taylor A. Bell, as Commissioners, into certain matters in the Yukon Territory, that on the 18th March last, one of the Commissioners, Mr. Bell, met with an unfortunate accident which resulted in his death on the first April instant.

The Minister states that the Commissioners had shortly after their appointment proceeded to the Yukon Territory and taken much evidence there, but, as appears in the Order in Council of 30th January, it was then proposed to continue the enquiry at Ottawa and elsewhere in Canada in order to secure the evidence of many important witnesses not resident in the Territory.

The Minister recommends that a supplementary Commission be issued to Mr. Justice Britton authorizing him to continue and complete the investigation as sole Commissioner with all the powers conferred upon the Commissioners by former Orders in Council and the Commission issued thereunder, and that he be required to report to the Secretary of State the result of the whole investigation and any opinions he may see fit to express as to the matters which have been the subjects thereof.

The Committee submit the same for approval.

(125) Lake Superior—Thunder bay—Kaministikwia river—Front range tower moved—New back range tower.

In consequence of the erection by the Canadian Pacific Railway Company of a coal unloading and storing plant on the ground formerly occupied by the range lights, on the north shore of the Kaministikwia river, at its mouth, near Fort William, it has been necessary to re-arrange these lighthouse towers.

The front tower has been moved forward 100 feet in the line of range, and now stands on the east end of the timber facing of the coal yard, which forms the north shore of the river at that point, and is close to the water's edge.

It has been raised 12 feet higher than formerly on an open post foundation, and the light is now elevated 42 feet above the water.

The back range light building with dwelling attached, formerly used, has been (or will be) taken down, and is replaced by a skeleton steel tower surrounding a column of lattice work, which projects 33 feet through the platform on top of the tower, on which a lantern is hoisted and held in place. The total height of the structure is 122 feet and it is painted red.

A daymark near the top of the lantern column consists of a black square, six feet on a side, with a white diamond in its middle.

The light shown from this tower is an incandescent electric light, shown from the focus of a reflector. It is elevated 128 feet above the level of the lake, and should be visible 11 miles in the line of range.

This new tower stands behind the trestles and pockets of the coal plant, by which it is partially hidden from the water. It is distant 1212 feet S. 67½° W. from the front light.

CONSIDÉRANT que par un arrêté en conseil daté le 5e jour de mai 1873, il est dit que par l'*Acte modificatif de l'Acte de la marine marchande*, 1862, il est statué que lorsqu'il sera représenté à Sa Majesté que les règlements concernant le mesurage du tonnage des

bâtiments marchands alors en vigueur en vertu de l'acte principal, ont été adoptés par le gouvernement d'un pays étranger et sont en vigueur dans ce pays, il sera loisible à Sa Majesté de déclarer par un arrêté en conseil, que les bâtiments de ce pays étranger seront censés avoir le tonnage indiqué sur leurs certificats d'enregistrement ou autres papiers nationaux, et que dès lors il ne sera plus nécessaire pour ces bâtiments d'être mesurés de nouveau dans un port ou lieu quelconque des possessions de Sa Majesté, mais que ces bâtiments seront censés être du tonnage inscrit sur leurs certificats d'enregistrement ou autres papiers, de la même manière, au même degré et pour toutes les fins pour lesquelles le tonnage inscrit sur les certificats d'enregistrement des bâtiments britanniques est censé être le tonnage de ces bâtiments.

Et qu'il a été représenté à Sa Majesté que les règlements concernant le mesurage du tonnage des bâtiments marchands maintenant en vigueur sous l'autorité de l'*Acte de la marine marchande de* 1854, ont été adoptés par le Président de la République Française et étaient en vigueur dans les possessions françaises, Sa Majesté a bien voulu, par et avec l'avis de Son Conseil privé, décréter que les navires de France dont les certificats de nationalité et d'enregistrement français auront été datés le ou après le premier jour de juin mil huit cent soixante-treize, seront censés être du tonnage indiqué dans les dits certificats de nationalité et d'enregistrement français.

Et considérant que l'*Acte modificatif de la marine marchande de* 1862, a été abrogé par l'*Acte de la marine marchande de* 1894, mais que par l'article 745 de ce dernier acte il est entre autres choses statué que tout arrêté en conseil rendu en vertu d'un statut abrogé par le présent acte continuera en vigueur comme s'il avait été fait en vertu du dit acte de 1894 ;

Et considérant que par l'article 84 de l'*Acte de la marine marchande de* 1894, il est statué comme suit :—

> 84.—(1.) Lorsqu'il appert à Sa Majesté la Reine en conseil que les règlements de tonnage du présent acte ont été adoptés par un pays étranger, et y sont en force, Sa Majesté en conseil pourra ordonner que les navires du dit pays, seront, sans être remesurés dans les possessions de Sa Majesté, censés être du tonnage indiqué dans leurs certificats d'enregistrement ou autres papiers nationaux, de la même manière, au même degré et pour les mêmes fins que le tonnage indiqué dans le certificat d'enregistrement d'un navire britannique est censé être le tonnage de ce navire.
>
> (2.) Sa Majesté en conseil pourra limiter le temps durant lequel l'arrêté restera en opération, et rendra l'arrêté sujet aux conditions et qualifications (si aucun il y a) que Sa Majesté jugera expédient, et l'opération de l'arrêté sera limitée et modifiée en conséquence.
>
> (3.) Toute et chaque fois qu'il sera représenté à Sa Majesté que le tonnage d'un navire étranger, tel que mesuré d'après les règlements de son pays, diffère matériellement de ce que serait son tonnage s'il était mesuré en vertu du présent acte, Sa Majesté pourra, par arrêté en conseil, ordonner que nonobstant tout arrêté en conseil alors en vigueur en vertu du présent article tout navire de ce pays étranger pourra, pour toutes les fins du présent acte, être remesuré en conformité du présent acte.

Et considérant que par l'article 30 de l'*Acte d'interprétation de* 1889, il est statué que dans le dit acte et dans tout acte passé soit avant soit après le commencement du dit acte, les expressions "souverain régnant à l'époque de l'adoption de l'acte," ou "la Couronne" seront censées jusqu'à preuve du contraire signifier le Souverain alors régnant, et le dit acte sera obligatoire pour la Couronne.

Et considérant qu'il appert à Sa Majesté que le tonnage des navires français, tels que mesurés d'après les règles concernant le mesurage du tonnage des navires marchands de France diffère essentiellement de ce que serait le tonnage de ces navires s'ils étaient mesurés en vertu de l'*Acte de la marine marchande de* 1894 :

A ces causes Sa Majesté en conseil décrète que nonobstant l'arrêté en conseil du 5e jour de mai 1873, tous les navires de France pourront pour toutes et chacune des fins de l'*Acte de la marine marchande de* 1894, être remesurés en conformité du dit acte.

Lundi, le 30e jour de mai 1904.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT que l'article 11 des règlements concernant la vente du bois de construction sur les terres fédérales au Manitoba, les territoires du Nord-Ouest et dans la zone du chemin de fer dans la province de la Colombie Britannique établit qu'un colon de bonne foi pourra avoir le droit sans concurrence de couper du bois de construction pour son propre usage, moyennant le paiement des droits suivants :—

Billots de construction de peuplier	½ c. par pied linéaire.
Billots de construction de pin, épinette blanche, épinette rouge et autre bois non énuméré	1¼ c. par pied linéaire.
Billots de construction de chêne, orme, frêne ou érable	1½ c. par pied linéaire.
Bois carré et billes de sciage de peuplier, pin, cèdre, épinette blanche, épinette rouge et autres bois non énumérés	$1.50 par M. pds M.P.
Bois carré et billes de sciage de chêne	$3.00 par M. pds M.P.

Les droits ci-dessus mentionnés sont pour le bois vert et le bois sec.

Et considérant qu'à la présente date, de grandes étendues de terres fédérales contiennent du bois sec qu'il serait à propos d'enlever vu qu'il constitue un danger pour le bois vert, et s'il restait sur le sol, il serait soit brûlé ou pourrirait ;—

A ces causes, il plaît au Gouverneur général en conseil d'ordonner, et il est par le présent ordonné comme suit :—

Si des colons demandent au ministère de l'Intérieur la permission de couper du bois sec sur certaines terres désignées, une inspection en sera faite, et s'il est jugé à propos de permettre que le bois soit coupé, permission sera donnée aux colons de le couper en payant des droits au taux de 25c. par mille pieds mesure de planche, cette coupe étant faite sous la surveillance immédiate d'un officier du dit ministère.

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

SUR un rapport daté le 28 d'avril 1904, du ministre de l'Intérieur, énonçant qu'en vertu d'un arrêté en conseil daté le 30 décembre 1898, certaines terres furent mises à part conformément aux dispositions de l'article 31 de l'*Acte des terres fédérales* pour les fins de l'école industrielle des Sauvages à Elkhorn, dans la province du Manitoba, et que dans les terres se trouve le quart sud-ouest de la section 4, township 12, rang 28 à l'ouest du premier méridien, sauf et excepté les quatre acres et un cinquième de terre compris dans le droit de la Compagnie de chemin de fer Canadien du Pacifique de passer sur le dit quart de section.

Le Ministre dit de plus que depuis la date du susdit arrêté en conseil un arrangement a été conclu avec la Compagnie de chemin de fer Canadien du Pacifique à l'effet que du moment que la compagnie cèderait à la Couronne pour les fins scolaires ci-dessus mentionnées vingt acres de l'angle nord-est du quart nord-ouest de la section 33, township 11, rang 28, à l'ouest du premier méridien, comprenant la moitié nord de la subdivision légale 14 requis comme terre à foin attachée à l'école, le ministère des Affaires des Sauvages paierait à la compagnie la somme de $150, et que la compagnie recevrait de la Couronne un octroi de toute cette partie de l'angle nord-est du quart sud-ouest de la dite section 4, township 12, rang 28 à l'ouest du premier méridien, dont a besoin la compagnie comme fosse à gravier, et contenant 4.28 acres.

Le Ministre recommande, une fois les conditions remplies de part et d'autre, qu'il soit autorisé à délivrer à la Compagnie de chemin de fer Canadien du Pacifique, des lettres patentes pour cette partie du quart sud-ouest de la section 4, township 12, rang 28 à l'ouest du premier méridien, ci-dessus mentionné, dont a besoin la compagnie comme fosse à gravier, et décrit comme suit :—

Commençant à l'intersection de la limite est du dit quart de section avec la limite nord-est du droit de passage du chemin de fer Canadien du Pacifique, de là dans une direction nord le long de la dite limite est jusqu'à la limite nord du dit quart de section, de là dans une direction ouest le long de la dite limite nord jusqu'à son intersection avec la limite nord-est du dit droit de passage, de là S. 49° 51′ E., le long de la dite limite nord-est jusqu'au point de départ, contenant quatre acres et vingt-huit centièmes plus ou moins, tel que coloré rose sur le plan, et que la dite moitié nord de la subdivision légale 14 de la section 33, township 11, rang 28 à l'ouest du premier méridien soit mis à part en vertu de l'article 31 de l'*Acte des terres fédérales* pour l'usage de l'école industrielle des Sauvages à Elkhorn, Manitoba.

Le comité soumet ce qui précède à l'approbation.

JOHN J. McGEE,
49–4 Greffier du Conseil privé.

Toutes demandes, quelles qu'elles soient, adressées au Parlement pour bills privés, devront être précédées d'un avis dans la *Gazette du Canada ;* le dit avis devra énoncer clairement et distinctement la nature et l'objet de la demande, et devra être signé par ou au nom des postulants avec les adresses des signataires ; et lorsque la demande aura pour objet un acte constitutif, le nom de la compagnie projetée devra être donné dans l'avis. Et si les travaux de quelque compagnie (constituée ou à être constituée légalement) doivent être déclarés comme étant d'utilité générale, cette intention sera spécifiquement mentionnée dans l'avis ; et les postulants feront adresser une copie du dit avis, par lettre chargée, au greffier de chaque municipalité qui pourra être affectée spécialement par la construction ou l'exploitation des dits travaux, et aussi au secrétaire de la province dans laquelle les dits travaux sont ou pourront être situés ; et une déclaration statutaire devra constater que cette formalité a été remplie par les postulants.

Après la seconde lecture et avant la prise en considération du bill par tout comité, le pétitionnaire aura aussi à payer au greffier du Sénat, ou au comptable de la Chambre des Communes (selon le cas) un honoraire de $200, plus une somme suffisante pour défrayer le coût de l'impression de l'acte dans les Statuts. L'honoraire de $200 ne sera payé que dans la Chambre où le bill a pris naissance ; mais les frais de réimpression et de traduction seront payés dans la Chambre où ces frais sont encourus.

Aucune pétition pour l'obtention d'un bill privé ne sera reçue par le Sénat ou par la Chambre des Communes, après les premières trois semaines de la session.

Aucun bill privé ne pourra être présenté au Sénat ou à la Chambre des Communes après les premières quatre semaines de la session.

Nulle pétition demandant la construction légale d'une compagnie de chemin de fer ou d'une compagnie de canal, ou le prolongement de la ligne de quelque chemin de fer ou canal existant ou autorisé, ne sera prise en considération par les comités des Ordres Permanents, à moins qu'il n'ait été soumis au comité une carte ou plan indiquant le territoire sur lequel

devront être construits les travaux projetés, et chaque comté ou district dans lesquels devront être construits le chemin de fer ou canal projeté, ou quelqu'embranchement ou prolongement d'iceux.

SAML. E. ST. O. CHAPLEAU,

SAML. E. ST. O. CHAPLEAU,
Greffier du Sénat.

Règles additionnelles de la Chambre des Communes concernant les bills privés.

Tous les bills privés demandant des actes constitutifs devront être rédigés de manière à y incorporer, en les spécifiant, les *clauses* des Actes généraux concernant les détails qui font l'objet de ces bills ; les bills qui ne seront pas rédigés conformément à cette Règle, devront être remodelés par les auteurs et réimprimés à leurs frais, avant qu'aucun comité en examine les clauses.

51*a*. Tous les bills privés pour chartes ou pour modification de chartes de compagnies de chemins de fer seront rédigés conformément au bill-modèle dont copie peut être obtenue du greffier de la Chambre ;

(*a.*) Les dispositions contenues dans un bill quelconque qui ne seront pas conformes au bill-modèle, seront insérées entre crochets, et après avoir été revisées par l'officier compétent, elles seront imprimées ainsi ; et les bills qui ne seront pas rédigés en conformité de cette règle seront renvoyés aux auteurs pour être remodelés avant leur revision et impression ;

(*b.*) Toutes clauses d'actes existants que l'on proposera de modifier, seront imprimées en entier, avec les amendements insérés en leur lieu et place, et entre crochets ;

(*c.*) Toutes dispositions exceptionnelles que l'on proposera d'insérer dans un bill quelconque, seront imprimées dans l'avis publié.

51*b*. Nul bill pour la constitution légale d'une compagnie de chemin de fer ou pour changer le tracé du chemin de fer d'une compagnie déjà constituée ne sera pris en considération par le comité des chemins de fer à moins qu'il n'ait été donné au comité, au moins une semaine avant la prise en considération du bill—

(*a.*) Une carte ou plan à l'échelle de pas moins d'un demi-pouce au mille, indiquant le territoire sur lequel l'on se propose de construire les travaux projetés, ainsi que les lignes de travaux analogues existants ou autorisés dans les limites du district, ou partie du district que la ligne projetée doit desservir, ou affectant le dit district en aucune manière ; cette carte ou plan devra être signé par l'ingénieur ou toute autre personne qui l'aura fait ;

(*b.*) Un exhibit faisant connaître le montant total du capital que l'on se propose de prélever pour les fins de l'entreprise, et la manière dont on se propose de le prélever, soit au moyen d'actions ordinaires, obligations, débentures ou autres garanties, et le montant respectif de chacune.

THOMAS B. FLINT,
Greffier des Communes.

Substance des règles et formes de procéder du Sénat concernant les bills de divorce.

L'époux qui a l'intention de demander un bill de divorce doit faire connaître cette intention, ainsi que les noms de l'autre époux et la cause du divorce, par avis inséré durant six mois avant la présentation de sa pétition pour obtenir le bill, dans la *Gazette du Canada* et dans deux journaux du district où il avait sa résidence habituelle à l'époque de séparation d'avec son conjoint, s'il résidait alors dans la province de Québec, le Manitoba, la Colombie Britannique, ou les Territoires du Nord-Ouest,—ou du comté ou des comtés-unis, s'il résidait dans une autre province ; mais si ce nombre de journaux ne s'y trouve pas, l'avis sera publié dans le district, le comté ou les comtés-unis voisins. Dans les provinces de Québec et de Manitoba, les insertions seront faites dans un journal anglais et un journal français, s'il en existe des deux langues dans le district : autrement, elles se feront en anglais et en français au même journal.

Il doit être signifié, à la diligence de l'époux pétitionnaire, un mois au moins avant la présentation de la pétition, une copie de cet avis à l'autre époux en personne, si cela est possible.

Aucune pétition en divorce n'est reçue après l'expiration des trente premiers jours de la session.

Toute pétition en divorce devra être écrite lisiblement et porter la signature du pétitionnaire. Elle énoncera sommairement le fait du mariage, le lieu et l'époque de sa célébration, les noms du célébrant, les griefs qui donnent lieu à la demande de redressement et la nature du redressement demandé, et en outre contiendra assurance qu'il n'y a pas eu réconciliation, collusion ni connivence. Les allégations de la pétition seront appuyées de la déclaration du pétitionnaire faite en vertu de "l'Acte de la preuve en Canada, 1893."

Huit jours avant l'ouverture du Parlement, le pétitionnaire déposera au bureau du greffier du Sénat, une copie en langue anglaise ou française du bill de divorce qui doit être présenté, et en même temps une somme suffisante pour payer la traduction et l'impression et tirage à 600 exemplaires anglais et 200 exemplaires français de ce bill.

La pétition en obtention d'un bill de divorce n'est présentée que lorsque le pétitionnaire a versé au bureau du greffier du Sénat une somme de $200.

La pétition, au moment de sa présentation, doit être accompagnée de la preuve de la publication d'avis, d'une déclaration qu'il a été signifié une copie de l'avis, et d'une copie du bill qui doit être présenté.
